

199—21.8(476) Applications for water costs for fire protection services.

21.8(1) Definition. For purposes of these rules, “water costs for fire protection service” shall be defined as all or a part of the utility’s costs of fire hydrants and other improvements, maintenance, and operations for the purpose of providing adequate water production, storage, and distribution for public fire protection, as reflected in the utility’s current tariff for public fire protection water service.

21.8(2) Utility requirements. A rate-regulated utility which provides public fire protection water service to a city preparing an application pursuant to subrule 21.8(3) shall provide the city all necessary information and affidavits to enable the city to meet its application filing requirements.

21.8(3) Application contents. Any city filing an application with the board requesting inclusion of all or a part of the water costs for fire protection service in a rate-regulated utility’s rates or charges to customers covered by the city’s fire protection service shall submit, at the time the application is filed, the following information with supporting testimony:

a. A statement showing (1) the proposed method of allocating costs to affected customers, and (2) both the proposed per-customer rate increase and the average percentage increase by customer class, based on the utility’s current tariff, if the costs for fire protection water service are included in rates charged to affected customers;

b. Copies of all bills rendered to the city by the utility for public fire protection water service during the preceding 24-month period;

c. The current number of utility customers served within the city’s corporate limits, by customer class, with an affidavit from the utility verifying the information;

d. A map illustrating both (1) the city’s corporate limits, and (2) the portion of the utility’s customer service area within the city’s corporate limits, with an affidavit from the utility verifying the customer service area;

e. An affidavit from the utility showing that the notice required by Iowa Code section 476.6(18) “c” and subrule 21.8(4) has been provided and paid for by the applicant and mailed by the utility to all affected customers.

21.8(4) Customer notification.

a. Prior approval. The city shall submit to the board for its approval, not less than 30 days before providing notification to affected customers, ten copies of the proposed notice.

b. Required content of notification. The notice shall advise affected customers of the proposed increase in rates and charges, the proposed effective date of the increase, and the percentage increase by customer class. It shall advise customers that the city is requesting the increase and that they have a right to file with the board a written objection to the proposed increase and to request a public hearing. It shall also include a written explanation of the reason for the increase.

c. Notice of deficiencies. Within 30 days of the filing of the proposed notice, the city shall be notified of either the approval of the notice or of any deficiencies in the notice and the corrective measures required for approval.

d. Distribution. The city shall provide to the utility, for mailing, a sufficient number of copies of the approved notice. The city shall direct the utility either to (1) include the notice with the utility’s next regularly scheduled mailing to the affected customers; or (2) make a separate mailing of the notice to affected customers within 30 days of receiving from the city the requisite number of copies of the notice. The city shall pay all expenses incurred by the utility in providing notice to affected customers. The utility may require payment prior to the mailing.

e. Delivery. The written notice to affected customers shall be mailed or delivered by the utility not more than 90 days before the application is filed and no later than the date the application is filed.

21.8(5) Procedure.

a. Service of application. The applicant shall file an original plus ten copies of the application with the executive secretary’s office, serve two copies of the application on the public utility and serve two copies on the consumer advocate division of the Iowa department of justice.

b. Docketing. Within 30 days of the filing of the application, the board shall either approve the application or docket the case as a formal proceeding and establish a procedural schedule.

c. Rules. If the case is docketed as a formal proceeding, the rules in 199—Chapter 7, if not inconsistent, shall apply.

d. Decision. The board shall render its decision within six months of the date of the application. If the application is approved, the board shall order the rate-regulated utility providing the water service to the city to file tariffs implementing the board's decision. The utility shall include annually a bill insert explaining to customers that they are being charged for water-related fire protection costs. The city shall pay all costs incurred by the utility to file and implement the required tariff.
