

**567—72.10(455B) Pipeline river or stream crossings.** The following criteria shall apply to pipeline river and stream crossings:

**72.10(1) *Protection.*** Pipeline river or stream crossings shall be sufficiently buried in the stream bed and banks or otherwise sufficiently protected to prevent rupture.

**72.10(2) *Overflow and velocities.*** Pipeline river or stream crossings shall be constructed, operated, and maintained so as not to create premature overbank flow or excessive scour to the channel or banks.

**72.10(3) *Spoil.*** Spoil material resulting from the construction of a pipeline crossing shall be disposed of in a manner which will not obstruct low flow or flood flows.
