IAC Ch 73, p.1

875-73.6 (89A) Machines.

73.6(1) Friction gearing or clutch mechanisms shall not be used for connecting the drum or sheaves to the main driving mechanism.

- 73.6(2) Set screw fastenings shall not be used on power elevators in lieu of keys or pins on connections subject to torque or tension.
- **73.6(3)** Portable power-chain or cable hoist machines shall not be used to raise or lower an elevator car.
- **73.6(4)** No belt or chain driven power machine shall be used for any elevator unless the machine is provided with a broken belt or broken chain safety switch of the electrical nonautomatic reset type. EXCEPTION: Hydraulic machines.
