

21—67.2 (162) Housing facilities and primary enclosures.**67.2(1) *Housing facilities.***

a. Buildings shall be of adequate structure and maintained in good repair so as to ensure protection of animals from injury.

b. Shelter shall be provided to allow access to shade from direct sunlight and regress from exposure to rain or snow. Heat, insulation, or bedding adequate to provide comfort shall be provided when the atmospheric temperature is below 50° F. or that temperature to which the particular animals are acclimated. Indoor housing facilities shall be provided for dogs and cats under the age of eight weeks and for dogs and cats within two weeks of whelping.

c. Indoor and outdoor housing facilities shall at all times be provided with ventilation by means of doors, windows, vents, air conditioning or direct flow of fresh air that is adequate to provide for the good health and comfort of the animals. Such ventilation shall be environmentally provided as to minimize drafts, moisture condensation, odors or stagnant vapors of excreta.

d. Ample lighting shall be provided by natural or artificial means or both during sunrise to sunset hours to allow efficient cleaning of the facilities and routine inspection of the facilities and animals contained therein.

e. Ceilings, walls and floors shall be so constructed as to lend themselves to efficient cleaning and sanitizing. Such surfaces shall be kept in good repair and maintained so that they are substantially impervious to moisture. Floors and walls to a height of four feet shall have finished surfaces.

f. Food supplies and bedding materials shall be stored so as to adequately protect them from contamination or infestation by vermin or other factors which would render the food or bedding unclean. Separate storage facilities shall be maintained for cleaning and sanitizing equipment and supplies.

g. Washrooms, basins or sinks shall be provided within or be readily accessible to each housing facility, for maintaining cleanliness among animal caretakers and sanitizing of food and water utensils.

h. Equipment shall be available for removal and disposal of all waste materials from housing facilities to minimize vermin infestation, odors and disease hazards. Drainage systems shall be functional to effect the above purposes.

i. Facilities shall be provided to isolate diseased animals, to prevent exposure to healthy animals.

j. Outdoor dog runs and exercise areas shall be of sound construction and kept in good repair so as to safely contain the animal(s) therein without injury. Floors shall be concrete, gravel or materials which can be regularly cleaned and kept free of waste accumulation. Grass runs and exercise areas are permissible provided adequate ground cover is maintained, holes are kept filled and the ground cover is not allowed to become overgrown. Dog runs and exercise areas utilizing wire floors are permissible, provided that they are not injurious to the animals and adequately maintained.

k. Group housing is permitted for animals which are compatible with one another. Adequate space shall be provided to prevent crowding and to allow freedom of movement and comfort to animals of the size which are housed in the facility. Females in estrus shall not be housed with males, except for breeding purposes.

67.2(2) *Primary enclosures.*

a. Primary enclosures shall be of sound construction and maintained in good repair to protect the animals from injury.

b. Construction materials and maintenance shall allow the animals to be kept clean and dry. Walls and floors shall be impervious to urine and other moisture.

c. The shape and size of the enclosure shall afford ample space for the individual(s) to comfortably turn about, stand erect, sit or lie. Not more than 12 dogs or cats shall be housed in the same primary enclosure.

d. Litter pans, containing clean litter, shall be provided at all times for kittens and cats.

e. Means shall be provided to maintain that temperature and ventilation which is comfortable for the species within the primary enclosure. Lighting shall be adequate to allow observation of the animals but they shall be protected from excessive illumination.

f. Animals shall be removed from their primary enclosures at least twice in each 24-hour period and exercised, unless the primary enclosure shall be of sufficient size to provide this exercise.

g. If doghouses with chains are used as primary enclosures for dogs kept outdoors, the chains used shall be so placed or attached that they cannot become entangled with the chains of other dogs or any other objects. Such chains shall be of a type commonly used for the size dog involved and shall be attached to the dog by means of a well fitted collar. Such chains shall be at least three times the length of the dog as measured from the tip of its nose to the base of its tail and shall allow the dog convenient access to the doghouse.

67.2(3) *In-home kennel.*

a. For the purposes of this subrule, “in-home kennel” means an individual required to be licensed as a boarding kennel or as a commercial breeder under Iowa Code chapter 162 who maintains or harbors not more than six adult animals (including both breeding animals and surgically sterilized animals) in the individual’s living quarters.

b. Notwithstanding subrules 67.2(1), 67.2(2), and 67.3(2), an in-home kennel shall comply with the following standards:

(1) Food supplies shall be stored so as to adequately protect them from contamination or infestation by vermin or other factors which would render the food unclean.

(2) Ample lighting shall be provided by natural or artificial means or both during sunrise to sunset hours. Animals shall be protected from excessive illumination.

(3) Building shall be of adequate structure and maintained in good repair so as to ensure protection of animals from injury.

(4) Facilities shall be provided to isolate diseased animals to prevent exposure to healthy animals.

(5) Outdoor dog runs and exercise areas shall be of sound construction and kept in good repair so as to safely contain the animal(s) therein without injury. Floors shall be concrete, gravel or materials which can be regularly cleaned and kept free of waste accumulation. Grass runs and exercise areas are permissible provided adequate ground cover is maintained, holes are kept filled and the ground cover is not allowed to become overgrown. Wire floors are permissible, provided they are not injurious to the animals and adequately maintained.

(6) Group housing is permitted for animals which are compatible with one another. Adequate space shall be provided to prevent crowding and to allow freedom of movement and comfort to animals of the size which are housed within the facility. Females in estrus shall not be housed with males, except for breeding purposes.

(7) If the animals are confined to a restricted area of the living quarters, the restricted area shall meet the space requirements set out in paragraph 67.2(2)“c.”

(8) Litter pans, containing clean litter, shall be provided at all times for kittens and cats.

(9) Means shall be provided to maintain that temperature and ventilation which is comfortable for the species within the primary enclosure or housing facility.

(10) Animals shall be removed from their primary enclosures at least twice in each 24-hour period and exercised.

(11) Housing facilities shall be cleaned as necessary to reduce disease hazards, and an effective program shall be established and maintained for the control of vermin infestation.

This rule is intended to implement Iowa Code sections 162.8 and 162.9.
