

**495—14.3(97B) Designation of beneficiaries.**

**14.3(1) *Designation of beneficiaries.*** To designate a beneficiary, the member must complete an IPERS designation of beneficiary form, which must be filed with IPERS. The designation of a beneficiary by a retiring member on the application for monthly benefits revokes all prior designation of beneficiary forms. IPERS may consider as valid a designation of beneficiary form filed with the member's employer prior to the death of the member, even if that form was not forwarded to IPERS prior to the member's death. If a retired member is reemployed in covered employment, the most recently filed beneficiary form shall govern the payment of all death benefits for all periods of employment. Notwithstanding the foregoing sentence, a reemployed IPERS Option 4 or 6 retired member may name someone other than the member's contingent annuitant as beneficiary, but only for death benefits accrued during the period of reemployment and only if the contingent annuitant has died or has been divorced from the member before the period of reemployment. If a reemployed IPERS Option 4 or 6 retired member dies without filing a new beneficiary form, the death benefits accrued for the period of reemployment shall be paid to the member's contingent annuitant, unless the contingent annuitant has died or been divorced from the member. If the contingent annuitant has been divorced from the member, any portion of the death benefits awarded in a qualified domestic relations order (QDRO) shall be paid to the contingent annuitant as alternate payee, and the remainder of the death benefits shall be paid to the member's estate, or the member's heirs if no estate is probated.

**14.3(2) *Change of beneficiary.*** The beneficiary may be changed by the member by filing a new designation of beneficiary form with IPERS. The latest dated designation of beneficiary form on file shall determine the identity of the beneficiary. Payment of a refund to a terminated member cancels the designation of beneficiary on file with IPERS.
