

199—36.3(476) Initial energy efficiency plan filing. Each utility not required to be rate-regulated shall offer energy efficiency programs to its customers through an energy efficiency plan. The utility shall assess the maximum potential energy and capacity savings available through cost-effective energy efficiency measures and programs; establish an energy efficiency goal; and establish cost-effective energy efficiency programs designed to meet the energy efficiency goal. Each utility's energy efficiency plan shall include a description of the procedures or criteria used to continue current and to select future energy efficiency programs for implementation.
