

661—301.33(103A) Sustainable design criteria for residential projects. A residential building construction project will be approved as sustainably designed if it meets any of the following requirements:

301.33(1) Satisfaction of all of the mandatory criteria of the economic development authority's Iowa green streets criteria; or

301.33(2) Compliance with ICC 700 National Green Building Standard®, (ICC 700-2008 NGBS) published by the International Code Council, at the bronze level; or

301.33(3) Certification from the United States Green Building Council at the certified level or better in the Leadership in Energy and Environmental Design (LEED) green building rating system for residential projects; or

301.33(4) Satisfaction of any alternative set of criteria submitted in advance to and approved by the commissioner as equivalent to the requirements of 661—subrules 300.33(1) through 300.33(3).
