

567—101.4(455B) Permits. In addition to the permit requirements in 567—Chapter 100 and as otherwise required by law, the following permit requirements shall apply to all sanitary landfills.

101.4(1) *Operating permits.* An MSWLF, construction and demolition debris, or industrial landfill operating permit shall be issued and may be renewed for a period no longer than five years. A coal combustion residuals landfill operating permit shall be issued and may be renewed for a period no longer than ten years. If an MSWLF adopts research, development, and demonstration (RD&D) provisions pursuant to 101.104(2), an MSWLF operating permit with RD&D provisions shall be issued and may be renewed for a period no longer than three years.

101.4(2) *Closure permits.* An MSWLF or industrial landfill closure permit shall be issued for a period of 30 years. A coal combustion residuals landfill closure permit shall be issued for a period of ten years. A sanitary landfill requires a closure permit until the department determines that post-closure operations are no longer necessary. A request for a closure permit renewal or termination shall be filed at least 180 days before the expiration of the current permit. If the department finds that a sanitary landfill has completed all required post-closure activities and no longer presents a significant risk to human health or the environment, then the department shall issue written notification that a closure permit is no longer required for the facility. If the department extends the post-closure period, then the duration of the subsequent closure permit will be determined on a site-specific basis.
