

701—52.40 (15) High quality jobs program. Effective for tax periods beginning on or after July 1, 2009, a business which qualifies under the high quality jobs program is eligible to receive tax credits. The high quality jobs program replaces the high quality job creation program. An eligible business under the high quality jobs program must be approved by the Iowa department of economic development and meet the qualifications of Iowa Code section 15.329. The tax credits available under the high quality jobs program are based upon the number of jobs created or retained that pay a qualifying wage threshold and the amount of qualifying investment. The administrative rules for the high quality jobs program for the Iowa department of economic development may be found at 261—Chapter 68.

52.40(1) Research activities credit. An eligible business approved under the high quality jobs program is eligible for an additional research activities credit as described in subrule 52.7(4) for awards issued by the Iowa department of economic development prior to July 1, 2010. The eligible business is eligible for the research activities credit as described in subrule 52.7(6) for awards issued by the Iowa department of economic development on or after July 1, 2010.

Research activities allowable for the Iowa research activities credit include expenses related to the development and deployment of innovative renewable energy generation components manufactured or assembled in Iowa; such expenses related to the development and deployment of innovative renewable energy generation components are not eligible for the federal credit for increasing research activities. For purposes of this subrule, innovative renewable energy generation components do not include components with more than 200 megawatts in installed effective nameplate capacity. The research activities credit related to renewable energy generation components under the high quality jobs program and the enterprise zone program shall not exceed \$2 million for the fiscal year ending June 30, 2010, and \$1 million for the fiscal year ending June 30, 2011.

These expenses related to the development and deployment of innovative renewable energy generation components are applicable only to the additional research activities credit set forth in this subrule and in subrule 52.7(5) for businesses in enterprise zones, and are not applicable to the research activities credit set forth in subrule 52.7(3).

52.40(2) Investment tax credit. An eligible business can claim an investment tax credit equal to a percentage of the new investment directly related to new jobs created or retained by the location or expansion of an eligible business. The percentage is equal to the amount provided in Iowa department of economic development 261—subrule 68.4(7).

The determination of the new investment eligible for the investment tax credit, the eligibility of a refundable investment tax credit for value-added agricultural product or biotechnology-related projects and the repayment of investment tax credits for the high quality jobs program is the same as set forth in subrule 52.28(2) for the high quality job creation program.

This rule is intended to implement Iowa Code chapter 15.
