

701—219.11(423) Distinguishing machinery and equipment from real property. A construction contract may include many activities, but it does not include a contract for the sale and installation of machinery or equipment. Machinery and equipment includes property that is tangible personal property when it is purchased and remains tangible personal property after installation. Generally, tangible personal property can be moved without causing damage or injury to itself or to the structure, it does not bear the weight of the structure, and it does not in any other manner constitute an integral part of a structure. Manufactured machinery and equipment which does not become permanently annexed to the realty remains tangible personal property after installation.

- b.* Portable items such as casework, tables, counters, cabinets, lockers, athletic and gymnasium equipment and other related easily movable property attached to the structure.
