

**701—219.8(423) Types of construction contracts.** The term “construction contract” is defined as an agreement under the terms of which an individual, corporation, partnership or other entity agrees to furnish the necessary building or structural materials, supplies, equipment or fixtures and to erect the same on the project site for a second party known as a sponsor. Nonexclusive examples of the types of construction contracts include: lump-sum contracts; cost plus contracts; time and material contracts; unit price contracts; guaranteed maximum or upset price contracts; construction management contracts; design built contracts; and turnkey contracts.

The following is a nonexclusive list of activities and items which could fall within the meaning of a construction contract or are generally associated with new construction, reconstruction, alteration, or expansion of a building or structure. The list is provided merely for the purpose of illustration. It should not be used to distinguish machinery and equipment from real property or structures since such a determination is factual. See rules 701—219.11(423) and 701—219.12(423) for details.

- Ash removal equipment (installed as distinguished from portable units)
- Automatic sprinkler systems (fire protection)
