

**129—20.3(8B,427) Broadband availability maps and data sources.** To determine whether a communications service provider offers or facilitates broadband service in a particular census block at or above 25 megabits per second of download speed and 3 megabits per second of upload speed as of July 1, 2015, the office utilized broadband availability maps and corresponding data sources made available by Connect Iowa, LLC, a subsidiary of Connected Nation, Inc. Such maps and data sources were widely accepted for accuracy and made available for public review and comment. By selecting these maps and data sources, the office has satisfied its obligation to reference broadband availability maps or data sources that are widely accepted for accuracy and available for public review and comment as required by Iowa Code section 8B.10(1).
