

**129—20.4(8B,427) Targeted service area determination.** The office will create a statewide map divided into census blocks. Based on the maps and data sources referenced in rule 129—20.3(8B,427), the statewide map will designate census blocks within which, as of July 1, 2015, no communications service provider offered or facilitated broadband service to the public at or above 25 megabits per second of download speed and 3 megabits per second of upload speed. This statewide map shall be available online at <http://ocio.iowa.gov/>. As of November 30, 2016, targeted service area designations as shown on the statewide map shall be considered the office's final determination and finding of whether a particular census block constitutes a targeted service area, unless a person or party successfully challenges the office's determination pursuant to the appeals and contested case process outlined in this chapter, in which case the office will update the statewide map to reflect the outcome of such challenge(s). For the sake of clarity, failure to challenge the office's determination and finding of whether a particular census block constitutes a targeted service area by filing a notice of appeal within the 20-day period established by subrule 20.5(1) shall render the office's determination and finding with respect to that particular census block final and no longer subject to challenge. A party's failure to challenge the office's determination and finding of whether a particular census block constitutes a targeted service area by filing a notice of appeal within the 20-day period established by subrule 20.5(1) shall be deemed a failure to exhaust administrative remedies.
