

481—301.39(103A) Standards. Any weather safe room shall be designed and constructed in compliance with the provisions of ICC 500-2014, ICC/NSSA Standard for the Design and Construction of Storm Shelters, published by the International Code Council, located at www.iccsafe.org. Any provision that would apply to a hurricane safe structure but not to a tornado safe structure does not apply. For any provision for which a distinction is made between a tornado safe structure and a hurricane safe structure, the requirement for a tornado safe structure applies.
