

**721—21.401(376) Signature requirements in cities with primary or runoff election provisions.** In cities using the provisions of Iowa Code section 376.4 for nomination of candidates and in which more than one council member was elected at-large at the last preceding regular city election, the number of signatures shall be calculated by the following formula:

V = the total number of votes cast for all candidates for council member at-large at the last regular city election;

E = the number of people to be elected at the last regular city election;

$$\frac{V}{E} \times .02 = \text{the number of signatures needed by each candidate in the next regular city election.}$$

This rule is intended to implement Iowa Code section 376.4.
