UNEMPLOYMENT INSURANCE CLAIMS — JUNE 25, 2020

Unemployment Claims Weekly News Release. The U.S. Department of Labor (DOL) releases national and state-level unemployment insurance (UI) claims data each Thursday. The [data](#) released on Thursday, June 25, 2020, provides preliminary initial claims for the week ending June 20, 2020, and the week ending June 13, 2020, for continued claims. The June 25 report represents the 14th consecutive weekly release in which unemployment claims are significantly impacted by the recent economic turmoil and government response resulting from the COVID-19 pandemic.

The data set published by the DOL provides two statistics covering the number of unemployment claims each week. The DOL defines the two statistics in the weekly news release as follows:

- **Initial Claims:** An initial claim is a claim filed by an unemployed individual after a separation from an employer. The claimant requests a determination of basic eligibility for the UI program. When an initial claim is filed with a state, certain programmatic activities take place, and these result in activity counts including the count of initial claims. The count of U.S. initial claims for unemployment insurance is a leading economic indicator because it is an indication of emerging labor market conditions in the country. However, these are weekly administrative data which are difficult to seasonally adjust, making the series subject to some volatility.
- **Continued Claims:** A person who has already filed an initial claim and who has experienced a week of unemployment then files a continued claim to claim benefits for that week of unemployment. Continued claims are also referred to as insured unemployment. The count of U.S. continued weeks claimed is also a good indicator of labor market conditions. Continued claims reflect the current number of insured unemployed workers filing for UI benefits in the nation. While continued claims are not a leading indicator (they roughly coincide with economic cycles at their peaks and lag at cycle troughs), they provide confirming evidence of the direction of the U.S. economy.

This week's DOL report shows continued unprecedented initial unemployment claim counts at both the State and national level, with a U.S. year-over-year increase in initial claims of 549.0% and an Iowa increase of 302.4%. As expected, the substantial increase in initial claims reported since mid-March has produced a large increase in continued claims for the week ending June 13, 2020, when compared to the same week last year. National continued claims increased 1,049.8% compared to the same week last year, while Iowa continued claims increased 980.4%.

The following table provides U.S. and Iowa initial and continued claims numbers for the most recent report week as well as the previous week and the same week last year. Please note that the claims reported are actual claims numbers and have not been seasonally adjusted. The initial claims numbers represent preliminary (advanced) reporting and the numbers are subject to revision the next week. In many instances, the preliminary number is revised lower one week later.

Weekly Continued Claims		Weekly Initial Claims	
Week ending 6/13/2020		Week ending 6/20/2020	
Time Period	U.S. Continued Claims	Time Period	U.S. Initial Claims
Last Year	1,558,646	Last Year	224,565
Last Week	18,422,569	Last Week	1,463,363
This Week	17,921,282	This Week	1,457,373
Time Period	Iowa Continued Claims	Time Period	Iowa Initial Claims
Last Year	14,233	Last Year	2,123
Last Week	152,739	Last Week	9,069
This Week	153,771	This Week	8,542

Claim numbers are not seasonally adjusted.

The following chart displays the number of Iowa continued claims over the past 16 weeks for 2019 and 2020. Iowa continued claims have declined over the past six weeks. However, the decline over the last three weeks has been minimal.

Unemployment claim payments are made to qualified unemployed workers, and the payments are generally made from the State Unemployment Insurance Fund. That Fund is financed through a payroll tax paid by employers. In response to the recent economic decline, the federal government is currently financing a [portion](#) of unemployment insurance payments.
