### UNEMPLOYMENT INSURANCE CLAIMS — SEPTEMBER 10, 2020

**Unemployment Claims Weekly News Release.** The U.S. Department of Labor (DOL) releases national and state-level unemployment insurance (UI) claims data each Thursday. The [report](#) released on Thursday, September 10, 2020, provides preliminary initial claims for the week ending September 5, 2020, and continued claims for the week ending August 29, 2020. The September 10 report represents the 25th consecutive weekly release in which unemployment claims are significantly impacted by the recent economic turmoil resulting from the COVID-19 pandemic.

The dataset published by the DOL provides two statistics covering the number of unemployment claims each week. The DOL defines the two statistics in the weekly news release as follows:

- **Initial Claims:** An initial claim is a claim filed by an unemployed individual after a separation from an employer. The claimant requests a determination of basic eligibility for the UI program. When an initial claim is filed with a state, certain programmatic activities take place, and these result in activity counts including the count of initial claims. The count of U.S. initial claims for unemployment insurance is a leading economic indicator because it is an indication of emerging labor market conditions in the country. However, these are weekly administrative data that are difficult to seasonally adjust, making the series subject to some volatility.
- **Continued Claims:** A person who has already filed an initial claim and who has experienced a week of unemployment then files a continued claim to claim benefits for that week of unemployment. Continued claims are also referred to as insured unemployment. The count of U.S. continued weeks claimed is also a good indicator of labor market conditions. Continued claims reflect the current number of insured unemployed workers filing for UI benefits in the nation. While continued claims are not a leading indicator (they roughly coincide with economic cycles at their peaks and lag at cycle troughs), they provide confirming evidence of the direction of the U.S. economy.

This week's DOL report shows continued elevated initial unemployment claim counts at both the State and national levels, with a U.S. year-over-year increase in initial claims of 395.1% and an Iowa increase of 236.2%. The substantial increase in initial claims reported since the week ending March 14, 2020, has produced a large increase in continued claims for the week ending August 29, 2020, when compared to the same week last year. National continued claims increased 794.0% compared to the same week last year, while Iowa continued claims increased 463.6%.

The following table provides U.S. and Iowa initial and continued claims numbers for the most recent report week as well as the previous week and the same week last year. Please note that the claims reported are actual claims numbers and have not been seasonally adjusted. The claims numbers represent preliminary (advanced) reporting and the numbers are subject to revision the next week. In many instances, the preliminary number for a week is revised lower one week later.

<b>Weekly Continued Claims</b> Week ending 8/29/2020		<b>Weekly Initial Claims</b> Week ending 9/5/2020	
Time Period	U.S. Continued Claims	Time Period	U.S. Initial Claims
Last Year	1,476,199	Last Year	173,134
Last Week	13,142,587	Last Week	837,008
This Week	13,197,059	This Week	857,148
Time Period	Iowa Continued Claims	Time Period	Iowa Initial Claims
Last Year	12,711	Last Year	1,692
Last Week	75,877	Last Week	5,914
This Week	71,644	This Week	5,689

Claim numbers are not seasonally adjusted.

The following chart displays the number of Iowa continued claims over each of the past 27 weeks for 2019 and 2020. Iowa continued claims have declined by 117,999 claims since the week ending May 2, 2020. However, continued claims remain significantly higher than last year, with claims for the week ending August 29, 2020, exceeding claims for the week ending August 31, 2019, by 58,933 claims.

Iowa initial claims for the week ending September 5, 2020, decreased slightly compared to the previous week, and the claim count was 3,902 higher than the week ending September 7, 2019.
