View from the 2015 Amended Capitol Complex Master Plan
The Capitol Planning Commission is authorized under Chapter 8A.371—378 of the Code of Iowa.

“It shall be the duty of the commission to advise upon the location of statues, fountains and monuments and the placing of any additional buildings on the capitol grounds, the type of architecture and the type of construction of any new buildings to be erected on the state capitol grounds as now encompassed or as subsequently enlarged, and repairs and restoration thereof, and it shall be the duty of the officers, commissions, and councils charged by law with the duty of determining such questions to call upon the commission for such advice.

“The commission shall, in cooperation with the director of the department of administrative services, develop and implement within the limits of its appropriation, a five-year modernization program for the capitol complex.

“The commission shall annually report to the general assembly its recommendations relating to its duties under this section. The report shall be submitted to the chief clerk of the house and the secretary of the senate during the month of January.”

—Code of Iowa, Chapter 8A.373

All capital projects on the capitol complex shall be planned, approved, and funded only after considering the guiding principles enunciated in any capitol complex master plan adopted by the commission on or after January 1, 2000. At a minimum, the extent to which the proposed capital project does all of the following shall be considered:

a. Preserves and enhances the dignity, beauty, and architectural integrity of the capitol building, other state office buildings, and the capitol grounds.
b. Protects and enhances the public open spaces on the capitol complex when deemed necessary for public use and enjoyment.
c. Protects the most scenic public views to and from the capitol building.
d. Recognizes the diversity of adjacent neighborhoods and reinforces the connection of the capitol complex to its neighbors and the city of Des Moines.
e. Accommodates pedestrian and motorized traffic that achieves appropriate public accessibility.

—Code of Iowa, Chapter 8A.376
Date: January 2020

To: Mr. W. Charles Smithson, Secretary of the Senate
    Ms. Meghan Nelson, Chief Clerk of the House

I am pleased to submit the Capitol Planning Commission’s Annual Report for FY2019 to
the Legislature. This report includes information for the fiscal year starting July 1, 2018
and ending June 30, 2019. If you have any questions, please contact Jim Kurtenbach,
Director of the Department of Administrative Services and Secretary of the Capitol
Planning Commission.

Sincerely,

William M. Dikis, Chair
Capitol Planning Commission

# Vision

The vision set forth in the Capitol Complex Master Plan is for a Capitol Complex that exemplifies in setting and function the dignity it embodies in spirit and purpose.

# FY2018 Members of the Capitol Planning Commission

The Commission utilizes two committees to make recommendations to the Commission and address issues that arise between the Commission’s quarterly meetings:

- Master Plan Committee, Annette Renaud, 2019 Chair
- Site Features Committee, Carol Grant, 2019 Chair

In FY2019 the Capitol Planning Commission met on July 18, 2018, October 17, 2018, January 9, 2019, and April 17, 2019. Agendas, minutes, and handouts from these meetings can be found at: https://das.iowa.gov/general-services/capitol-planning-commission.
Executive Summary

This Annual Report summarizes the work of the Commission during FY2019 and provides planning recommendations for the future of the Capitol Complex. Please note that Iowa Code Chapter 8A.373 provides that before any physical changes are made to the state capitol complex "it shall be the duty of the officers, commissions, and councils charged by law with the duty of determining such questions to call upon" the Capitol Planning Commission for advice.

The Capitol Planning Commission members, as well as DAS staff, welcome the opportunity to discuss future projects at the request of any legislator or member of the public.

The Commission offers the following recommendations for FY2021.

1. Fund at the earliest feasible date those projects that address timely Master Plan
   Phase 1 (2010-2020) goals.
   • Wallace Building Renovation
   • Fleet Building Demolition
   • East Capitol Mall

2. Continue funding for a project not discussed in the Master Plan:
   • State Historical Building Renovation

   Exhibit A summarizes costs for these four projects.

3. Make the annual increase for the Capitol Complex Association Fee permanent, indexed to an industry standard benchmark.

4. Increase the appropriation for routine maintenance for the Capitol Complex to $4,500,000 each year as required by Iowa Code 7E.5A.

5. Identify and initiate an ongoing strategy for annual maintenance funding at a level sufficient to reduce and eventually eliminate deferred maintenance.

6. Establish a policy of annual funding for the conservation of both non-endowed and insufficiently endowed monuments and public art located on the Capitol grounds.
Building Renovation, Restoration and Placement

“... the placing of any additional buildings on the capitol grounds, the type of architecture and the type of construction of any new buildings to be erected on the state capitol grounds ... and repairs and restoration thereof ...”

Master Plan Update

The Iowa State Capitol Complex Master Plan, as amended January 2019, is available at https://das.iowa.gov/general-services/capitol-planning-commission

The guiding principles of the Master Plan are contained within the following topics:

- Concept
- Approaches and Gateways
- View Corridors and Streets
- Access and Circulation
- Landscape Framework
- Monuments and Public Art
- Site Amenities
- Signs and Visitor Information
- Buildings
- Architectural Design
- Utilities
- Parking
- Transit
- Pedestrian and Bicycle Circulation
- Sustainable Design Principles

The Commission annually reviews the Master Plan and documents any updates in Master Plan Appendix D to keep the Plan current and useful as a guide to planning decisions. Appendix D is an ongoing summary of accomplished goals of the Plan, recognizing work completed and changed circumstances, if any, as well as documenting by amendment any modifications, with rationale, made to the Master Plan.

Other Related Capitol Complex Projects

In FY2019, the Capitol Planning Commission meetings provided a forum for the Commission members, the Department of Administrative Services and others to discuss on-going improvement issues and events on the Capitol Complex. The Commission monitored the following FY2019 projects:

- Capitol Windows – a project to repair windows on the north and south faces of the Capitol.
- Ola Babcock Miller – a project to repair windows.
- State Historical Building Roof & Skylight Replacement – a project to replace the roof and skylight system.
- Parking Ramp Lighting – a project to replace all interior lighting with LED fixtures in the parking ramp on E. Grand Ave. and Penn Ave.
- Capitol Complex Improvements including ongoing sidewalk replacements and parking lot repairs/replacements.
- Court Avenue Hillside Prairie – a partnership between the Departments of Administration and Natural Resources to landscape the area with prairie plantings.
Monuments and Site Features

“... advise upon the location of statues, fountains and monuments ...”

Proposals for Monuments and Site Features

The Site Features Committee makes recommendations to the Commission on proposed monuments and issues relating to monuments and site features on the Capitol Complex.

- Iowa Law Enforcement K9 Memorial – the Peace Officer Memorial Committee completed their evaluation of designs for the memorial and will present to the Site Features Committee in FY20.
- Soldiers in White – the Site Features Committee approved a request to add 10 White Oak Trees and a two-ton boulder marker near the WWII Memorial Plaza to honor 10 Iowa nurses who died in service during WWI.

Legislation regarding maintenance of Capitol Complex monuments

- The 2018 Iowa Legislature passed HF765 relating to the Rebuild Iowa Infrastructure Fund. The $100,000.00 appropriated as part of SF2324 in 2016, as part of the 2:1 match for raising private dollars for major maintenance of the monuments will now not revert until the close of the fiscal year that begins July 1, 2023. This extends time for the Commission to raise private funds to maximize the match from the original appropriation until June 30, 2024.

Maintenance

“...and repairs and restoration thereof...”

The Commission was briefed on the maintenance issues facing the Capitol Complex buildings. There are five important terms related to the funding of maintenance that are used by the Legislature and State agencies:

- Capitol Complex Association Fee
- State Capitol Maintenance Fund
- Statewide Routine Maintenance
- Statewide Major Maintenance
- Deferred Maintenance

Capitol Complex Association Fee is the “rent” that agencies located on the Capitol Complex pay for office space. The fee is intended to cover the day-to-day building operational costs, including the upkeep of mechanical and electrical systems; life, health and safety systems (such as fire alarms and sprinklers), custodial services; and grounds care. The fee is applied to the number of square feet utilized by each agency including a pro rata share of common areas.

The Commission, concerned that the fee had failed to keep pace with escalating costs, urged in past years that the Association Fee be increased to address the increasing costs of ongoing routine maintenance needs on the Capitol Complex. The Commission is pleased that the Customer Council subsequently agreed to increase the FY2015 fee of $3.46 per SF to $4.86 per SF in FY2016, $5.75 per SF in FY2017, $5.75 per SF in FY2018, $6.00 per SF in FY2019, $6.25 per SF in FY2020, $6.25 per SF in FY2021, and $6.50 per SF in FY2022.

The Commission urges that the concept of an annual increase be made permanent, indexed to an industry standard benchmark.
State Capitol Maintenance Fund is defined as expenditures for maintenance projects for the Iowa state capitol and the Ola Babcock Miller building.

- $500,000 was appropriated from the rebuild Iowa infrastructure fund, for the fiscal year beginning July 1, 2018, and for each fiscal year thereafter; additionally, funds remaining from the Iowa state capitol dome project are deposited into this fund which currently totals approximately $2,000,000.

Statewide Routine Maintenance is defined as expenditures for regular upkeep of land, buildings, and equipment for all state-owned properties, including the Capitol Complex. This includes ongoing and preventive maintenance to maintain the usefulness and efficiency of critical and non-critical building systems and equipment.

- $2,000,000 was appropriated from the rebuild Iowa infrastructure fund, for the fiscal year beginning July 1, 2019, and for each fiscal year thereafter. For FY2020, the Department of Administrative Services was allocated $368,672.88.

Statewide Major Maintenance is defined as expenditures beyond the regular, normal upkeep of land, buildings, and equipment. Such costs include the repair or replacement of failed or failing building components as necessary to return a facility to its currently intended use, to prevent further damage, or to make it compliant with changes in laws, regulations, codes or standards.

Examples of major maintenance include repair or replacement of components (such as roofs, boilers and windows), additions or changes to safety systems (such as fire alarms, fire sprinklers and security systems), and changes required to meet regulatory requirements of the Americans with Disabilities Act (ADA) or other codes and standards.

Annual statewide major maintenance funding has ranged from $195,000 to $24,500,000 since FY2010. During the FY18 legislative session, the following was appropriated for Statewide Major Maintenance:

- FY2019, $24,500,000 was appropriated for statewide major maintenance of which $3,300,000 is allocated for roof repairs to the State Historical Building;
- FY2020, $20,000,000 was appropriated of which $3,300,000 is allocated for roof repairs to the State Historical Building;
- FY2021 through FY2023, $20,000,000 was appropriated for each fiscal year.

Deferred Maintenance is defined as maintenance work that has been postponed beyond timely attention. Such delay often results in geometrically increased costs due to accelerated deterioration of the component and nearby materials and systems. Good stewardship requires a long term commitment to proper maintenance funding as the only logical solution to reduce and eventually eliminate the deferred maintenance backlog.

- Maintenance of State buildings has been routinely underfunded, and the State’s deferred maintenance has reached critical levels. The estimate as of FY2019 of the unfunded amount for all state-owned properties is approximately $360 million.

Depending on the length of deferral time, a common rule of thumb is that the postponement of $1 of timely maintenance will cost between $4 and $40 at a later time.
**Routine Maintenance Funding**

While increasing the association fee for the Capitol Complex and indexing the fee to an industry benchmark will assist in meeting the basic operational needs at the Capitol Complex, more funding must be dedicated to address and eventually eliminate the deferred maintenance backlog and provide for future major maintenance needs.

Iowa Code 7E.5A states “A department shall, within its five-year capital budget request, identify … the proposed costs for annual routine and preventive maintenance based on an industry standard of one percent of the estimated replacement cost of the department’s facilities.”

Based on a conservative estimated value of $215 per square foot, application of the one percent guideline would require an annual appropriation of nearly $4,500,000 for the Capitol Complex.

**Modernization Program for the Complex**

“… develop and implement … a five-year modernization program for the capitol complex.”

Capital projects are generally defined as those projects with a cumulative cost equaling or exceeding $250,000 and requiring specific review and recommendations from the Governor, as defined in 8.3A of the Code of Iowa. Examples of capital projects include new construction and major building renovations. Funding for capital projects on the Capitol Complex has ranged from $0 to $9,900,000 since FY2010.

Each year, the Commission reviews the Capitol Complex Infrastructure Five Year Plan for capital projects and recommends funding of projects of special importance to the Commission.

**FY2021 Infrastructure Funding Requests and Rankings**

The Commission has been briefed on the Five-Year Infrastructure Plan developed by the Department of Administrative Services for FY2021 through FY2025. With regard to recommendations in the DAS Infrastructure Plan that address the needs for health and safety, access for disabled persons, and major and routine maintenance, the Commission in considering funding priorities defers to the technical expertise of DAS staff and the wisdom of the Legislature and the Governor.

However, as an overarching comment, the Commission recognizes that annual funding has historically been inadequate for routine maintenance, updating for safety and accessibility, and major repairs and replacement (as materials and systems reach the end of their useful life). Such funding is critical to protecting the public investment in the state’s buildings and grounds.

*The Commission urges the Legislature and the Governor to identify an ongoing strategy for annual maintenance funding at an enhanced level sufficient to reduce and eventually eliminate deferred maintenance.*
**FY2021 Commission Priority Recommendations**

The Commission recommends funding for projects that address Master Plan goals envisioned for the period 2010 to 2020, including:

- Wallace Building Renovation
- Fleet Building Demolition
- East Capitol Mall
- Annual funding for the care and conservation of both non-endowed and insufficiently endowed monuments and public art located on the Capitol grounds.\(^1\)

The Commission also recommends continued funding for a project not discussed in the Master Plan:

- State Historical Building Renovation

The Commission’s priorities address those projects that primarily address the preservation and enhancement of “the dignity, beauty, and architectural integrity” of the buildings and grounds of the Capitol Complex.

**Exhibit A** summarizes cost estimates for these projects based on the DAS FY2021 Infrastructure Five Year Plan (costs rounded).

**Exhibit B** summarizes related aspects of the DAS FY2021 Infrastructure Five Year Plan.

---

\(^1\) The Commission established a policy in 1984 to require proposals for new monuments and public art to include a maintenance endowment of 10% of the installed cost. The Commission subsequently found through experience that maintenance costs vary widely with the nature of the materials used. In response, the Commission increased the requirement to 15% of installed cost in 2017.
Exhibit A

Costs in the following are summarized from Exhibit B, DAS FY2021 Infrastructure Five Year Plan. The costs are rounded for ease of understanding.

**Wallace Building Renovation - Estimated Costs**

DAS recommended funding for design and renovation:

- FY2021  $2,000,000
- FY2022  $31,500,000
- FY2023  $31,500,000

If total funding is not feasible at this time, the DAS alternative incrementally addresses the most critical needs, all of which would also be required in a whole-building renovation, thus mostly not a wasted investment. However, total project costs are higher when the appropriations and contracts for a project are divided into multi-year increments, due to both the diseconomy of fragmentation and the effects of inflation.

- FY2021  $850,000 for Replacement of Elevators
- FY2021  $325,000 for Replacement of Windows,
- FY 2021  $1,100,000 for Tuckpointing and Waterproofing of the Exterior
- FY 2021  $525,000 for Removal of the Terrarium
- FY2022-FY2023  $20,100,000 for Renovation of the HVAC Systems

**Fleet Building Demolition – Preliminary Estimated Costs**

DAS recommended funding for demolition and site repair:

- FY2021  $1,500,000

Fleet Services was reorganized in 2017. The building occupied by Fleet Service is now vacant. This cost estimate does not include costs to complete the original West Capitol Terrace Master Plan.

**East Capitol Mall - Estimated Costs**

DAS recommended funding:

- FY2024  $3,650,000
- FY2025  $3,650,000

The East Capitol Mall project is the Commission’s top aesthetic (and functional) goal to beautify the east side of the State Capitol Building. The cover of this report illustrates the Master Plan proposal to relocate parking areas to the perimeter of the central Capitol Complex and create a landscaped mall on the main east-west axis of the State Capitol. The Plan assumes there is no net loss of parking spaces and may result in new parking.

The Commission highly recommends that this project be funded sooner than the DAS projection of FY2024. To avoid waste, it is critically important that the parking lot relocations occur before further funds are expended on repairing the existing parking lots #13, 14, 15 and 19.
State Historical Building Renovation - Estimated Costs as of December 2019

DCA recommended funding for design and renovation:

- FY2021 $22,900,000
- FY2022 $18,200,000
- FY2023 $7,600,000

DCA recommended funding for Collections

- FY2021 $10,600,000
- FY2022 $9,400,000

If total funding is not feasible at this time, the DAS alternative incrementally addresses the most critical needs, all of which would also be required in a whole-building renovation, thus mostly not a wasted investment. However, total costs are higher when the appropriations and contracts for a project are divided into multi-year increments, due to both the diseconomy of fragmentation and the effects of inflation.

- FY2022 $19,150,000 for Repair of Exterior Walls, Lighting; and Wood Floor
- FY2022 $550,000 for Repair of Wood Floors
- FY2023 $1,425,000 for Replacement of Chiller
- FY2023 $500,000 for Replacement of Boiler
- FY2023 $2,025,000 for Replacement of HVAC Controls with Direct Digital Controls
- FY2024 $2,124,000 for Replacement of Elevators
