Executive Summary
This report has been developed for the state fiscal year 2019 (SFY19), Annual Report July 1, 2018 to June 30, 2019, for the Healthy and Well Kids in Iowa (Hawki) program. Iowa Code Section 514I.5 (g) directs the Hawki Board to submit an annual report concerning the Board’s activities, findings, and recommendations.

Iowa was one of 15 states with an increase in enrollment in SFY19 in their Children’s Health Insurance Program (CHIP). There was an eight percent increase in enrollment for CHIP which equates to 5,494 members. The total CHIP enrollment for SFY19 was 73,797.

In March 2019 the Iowa Department of Human Services (Department) rebranded the Hawki program with a new logo and color scheme and changed the program’s abbreviation from hawk-i to Hawki. All communication and outreach materials now include the new logo, branding and abbreviation.

In May 2019, the Department transferred the work of the Hawki third party administrator to the Department to consolidate members transitioning between Hawki and Medicaid and to align systems and services to better serve Hawki members. The Department now performs all aspects of application processing, eligibility determination, customer service, management of information systems, premium billing and collection, health and dental plan enrollment, policy and program oversight.

Program Description
Title XXI of the Social Security Act enables states to provide health care coverage to uninsured, targeted low-income children. In Iowa, targeted low-income children are those children covered by a Medicaid Expansion, a separate program called Healthy and Well Kids in Iowa (Hawki), and the Hawki Dental-Only Program which was implemented on March 1, 2010.

Effective January 1, 2014, the countable income levels were changed based on the introduction of the Modified Adjustable Gross Income (MAGI) methodology in accordance with the Affordable Care Act. This change aligns financial eligibility rules across all insurance affordability programs; creates a seamless and coordinated system of eligibility and enrollment; and maintains eligibility of low-income populations, especially children.

The Medicaid Expansion component covers children ages 6 to 18 years of age whose countable family income is between 122 and 167 percent of the Federal Poverty Level (FPL) and infants 0 to 1 year of age whose countable family income is between 240 and 375 percent of the FPL. The Hawki program provides healthcare coverage to children under the age of 19 whose countable family income is less than or equal to 302 percent of the FPL, who are not eligible for Medicaid and who are not covered under a group health plan or other health insurance. The Hawki Dental-Only Program covers children who meet the financial requirements of the Hawki program but are not eligible because they have health insurance. The Dental-Only program and the dental coverage with Hawki provide
preventive and restorative dental care services as well as medically-necessary orthodontia. (See Attachment 2 Iowa’s Health Care Programs for Non-Disabled Children).

See Attachment One: Organization of the Hawki program.

Federal History
Congress established the Children’s Health Insurance Program (CHIP) with passage of the Balanced Budget Act of 1997, which authorized $40 billion for the program through Federal Fiscal Year (FFY) 2007. Under the program, a federal block grant was awarded to states to provide health care coverage to children of families with income above Medicaid eligibility levels.

On February 4, 2009, President Obama signed the Children’s Health Insurance Program Reauthorization Act of 2009 (CHIPRA), Public Law 111-3, into law. The CHIPRA legislation reauthorized CHIP for four and a half years through FFY 2013 and authorized approximately $44 billion in new funding for the program.

The Patient Protection and Affordable Care Act (ACA) was signed into law on March 23, 2010, and continued CHIP programs through September 30, 2019. Federal funding was authorized through September 30, 2017. The ACA has resulted in substantial changes to the program. Noteworthy changes include a single streamlined application as part of the enrollment process and switching to the MAGI methodology to determine family income. ACA also prohibits states from reducing current eligibility standards, referred to as maintenance of effort (MOE), until September 30, 2019.

Reauthorization of CHIP
On January 22, 2018, Congress passed a Continuing Resolution (CR) called the HEALTHY KIDS Act that approved funding for CHIP for six years. Another CR was then passed on February 8, 2018, the ACCESS Act, that approved funding for four more years. CHIP funding is now authorized through Federal Fiscal Year (FFY) 2027 (September 30, 2027). Other CHIP provisions in the HEALTHY KIDS Act and the ACCESS Act included:

- CHIP match rate. The federal match for CHIP (known as e-FMAP or enhanced federal medical assistance percentage), was increased by 23 percentage points by the ACA. This increase is also known as a “bump”. The HEALTHY KIDS Act continued this bump through FFY19. The "bump" decreases to 11.5 percentage points in FFY 2020 and then returns to normal CHIP funding levels for future years).

- Maintenance of Effort (MOE). MOE is the provision that states are required to maintain eligibility standards, methodologies and procedures. This remains in effect until FFY2027. Some states may change their eligibility beginning October 1, 2019, if their eligibility is above 300 percent of the FPL. Iowa is currently at 302 percent, so may have the option of moving to 300 percent FPL.
Iowa’s CHIP Program
CHIP is a federal program operated by the state, financed with federal and state funds at a federal match rate of approximately 94 percent. CHIP was enacted to cover uninsured children whose family income is above the income limits for Medicaid. As noted previously, Iowa’s CHIP program has three components:

- **Medicaid Expansion** (Implemented 1998) – Provides health and dental services to infants 0 to 1 year of age and qualified children ages 6 – 19 through the state’s Medicaid program at the enhanced federal matching rate. The children covered have income that is higher than regular Medicaid but lower than the income criteria for the Hawki program.

- **Hawki** (Implemented 1999) – Qualified children are covered through contracts with Managed Care Organizations (MCOs) and a dental plan to deliver a full array of health and dental services. The Hawki program covers preventive care (immunizations), primary care, hospital and emergency care, chiropractic care, vision, skilled nursing care, dental care, medically necessary orthodontia, and behavioral care including substance abuse and mental health treatment. The coverage package is similar to a comprehensive commercial health and dental insurance plan. The children covered are those with family income higher than the Medicaid Expansion program, and below 302 percent of the FPL.

- **Hawki Dental-Only Program** (Implemented 2010) - The Hawki Dental-Only Program provides preventive and restorative dental care services as well as medically necessary orthodontia to children with income under 302 percent of the FPL that do not qualify for healthcare benefits under Hawki because they have health insurance.

- **Managed Care** (Implemented April 2016) – Most Medicaid members, including those enrolled in the Hawki program, were transitioned to a managed care program, and receive health coverage through an MCO.

**Key Characteristics of the Hawki Program**
The Department pays monthly capitation premiums to MCOs. Hawki program benefits are provided in the same manner as for commercial beneficiaries. The covered services under Hawki are different from regular Medicaid and are approximately equivalent to the benefit package of the state’s largest employee plan available at the beginning of the program.

Within the Hawki program (effective January 1, 2014), families with income over 181 percent of the FPL pay a monthly premium of $10 - $20 per child with a maximum of $40 per family based on family income. Premiums have not been increased since the program’s implementation and Iowa’s monthly premium compared to established FPLs are consistently lower than most other states charging a monthly enrollee premium. In June 2019, 65 percent of enrolled Hawki families paid a monthly premium and 35 percent paid no monthly premium amount.
In May 2019, the Department transferred the work of the Hawki third party administrator to the Department to consolidate members transitioning between Hawki and Medicaid and to align systems and services to better serve Hawki members. The Department now performs all aspects of application processing, eligibility determination, customer service, management of information systems, premium billing and collection, health and dental plan enrollment, policy and program oversight.

Enrollment in Iowa’s CHIP program has been instrumental in providing coverage to thousands of uninsured children since 1998 and Iowa has historically been among the top five states with the lowest uninsured rate among children.

See Attachment Three: History of Participation.

Budget

Federal Funding History
The CHIP program is authorized and funded through Title XXI of the Social Security Act. The program is capped with a fixed annual appropriation established by the legislation authorizing the program. Since implementation in 1997, state CHIP programs across the nation have provided healthcare coverage to millions of uninsured children.

From the initial total annual appropriation, every state was provided an allotment for the year based on a statutory formula established in the original legislation. Prior to FFY05, states were allocated federal funding based on the estimated number of uninsured children in the state estimated to be eligible for the program. In FFY06, the allocation formula was based on 50 percent of the number of low-income children for a fiscal year and 50 percent of the number of low-income uninsured children defined in the three most recent population surveys of the Bureau of Census, with an adjustment for duplication.

States were allowed three years to spend each year’s original allotment. At the end of the three-year period, any unused funds were redistributed to other states. States receiving redistributed funds had one year to spend them. Unused funds remaining at the end of the year were returned to the U.S. Treasury.

With the passage of CHIPRA in 2009, the annual allotment formula was revised to more accurately reflect projected state and program spending. The new allotment formula for each of the 50 states and the District of Columbia was determined as 110 percent of the highest of the following three amounts:

- Total federal payments under Title XXI to the state for FFY08, multiplied by an “allotment increase factor” for FFY09;
- FFY08 CHIP allotment multiplied by the “allotment increase factor” for FFY09; or
The projected FFY09 payments under Title XXI as determined on the basis of the February 2009 estimates submitted and certified by states no later than March 31, 2009.

CHIPRA allowed states to maintain the three-year availability of funds for FFY98-FFY08 allotments but changed to two-year availability of funds for allotments beginning with FFY09. Additionally, unexpended allotments for FFY07 and subsequent years were redistributed to states that were projected to have funding shortfalls after considering all available allotments and contingency fund payments.

Section 2104(m) (2) (A) (ii) of CHIPRA added a “rebasing” process in determining the FFY11 allotments. This requirement meant that the state payments, rather than their allotments, for FFY10 must be considered in calculating the FFY11 allotments. Specifically, the FFY11 allotments are determined by multiplying the increase factor for FFY11 by the sum of:

1. Federal payments made from states available allotments in FFY10;
2. Amounts provided as redistributed allotments in FFY10 to the state; and
3. Federal payments attributable to any contingency fund payments made to the state for FFY10 determined under Section 2104(n) of the Act.

Rebasing occurred in FFY13 using the allotments and expenditures from FFY12.

**State Funding for SFY19:**

The total original appropriation of state funds for SFY19 was: $7,064,057
Amount of Hawki Trust Fund Dollars added to appropriation: $589,433
Total State Funding $7,653,490

*See Attachment Four: Federal Funding and Expenditure History, SFY19 Final Budget, and SFY20 Budget*

**Enrollment**

As of June 30, 2019, 73,797 children were enrolled in Iowa’s CHIP program. This was an eight percent increase from SFY18. Of the total number enrolled:

1. 17,077 (23 percent) were enrolled in Medicaid Expansion (M-CHIP),
2. 53,270 (72 percent) in Hawki, and
3. 3,450 (5 percent) in the Hawki Dental-Only program.
It is projected that by June 30, 2020, the total number of children enrolled in CHIP will reach 75,569.

**Quality**

The MCOs are responsible for developing a quality management/quality improvement program to improve quality outcomes for Medicaid and Hawki members. The MCOs are also to report on quality measures such as well-child visits, adolescent well-child visits, diabetes management, etc. The Department monitors the quality measures to ensure that children, as well as adults, are receiving needed medical care. These reports can be found on the Department’s website: [https://dhs.iowa.gov/ime/about/performance-data/MC-quarterly-reports](https://dhs.iowa.gov/ime/about/performance-data/MC-quarterly-reports)

**Provider Network Access**

The Department reviews the provider networks of the MCOs on a monthly basis to ensure that there is adequate access to all Medicaid and CHIP members. Assessment of the provider networks includes reviewing the number of primary care providers, specialists, and hospitals.

**Outreach – Four Required Focus Areas**

In SFY19, successful collaboration continued between the Department, the Iowa Department of Public (IDPH) and the Hawki Board. Designated Hawki outreach coordinators were established in each child and adolescent center agencies that are contracted with IDPH. Local agency outreach coordinators provided presumptive eligibility determinations for children and teens, which allowed access to Medicaid covered services to medical, dental and pharmacy issues until a formal Medicaid or Hawki eligibility determination can be made. Outreach coordinators continue to provide critical outreach to communities in each of four required focus areas:
• Schools
• Faith-based communities
• Diverse ethnic populations
• Medical/Dental providers

Outreach to Schools

Providing outreach to schools at both the local and statewide levels continues to be important in reaching uninsured, eligible children. Local coordinators from across the state work directly with school nurses as one method of finding these children. All local outreach coordinators develop significant relationships with school nurses to ensure uninsured children are connected to coverage. Many local outreach coordinators attended kindergarten round-ups and school registrations to talk directly to families about healthcare coverage, and some were able to complete presumptive eligibility determinations on the spot so the children could walk away with coverage. In some communities, outreach coordinators also worked with guidance counselors, coaches, or teachers in order to reach uninsured children. The state Hawki outreach coordinator attended two Iowa School Nurse Organization conferences during the year to talk to school nurses about Hawki and provide updates about the program.

Almost all of the agencies worked directly with their school-based sealant programs to provide Hawki information to children whose parents requested information on the release form. This was and is an effective way to identify uninsured children who may be eligible for Medicaid or Hawki.

Outreach to the Faith-Based Community

Local Hawki outreach coordinators establish relationships with faith-based organizations in their service areas to promote the Hawki program. Many local agencies provide Hawki materials to faith-based organizations through email list-serves and mass mailings. Building relationships with the leadership of faith-based organizations allows the outreach coordinators to provide Hawki materials to members and establishes the coordinators as a resource for families in need.

Outreach to Medical/Dental Providers

Hawki outreach coordinators provide direct outreach to Iowa’s medical and dental providers to educate them about the Hawki program. There was continued emphasis on engaging hospitals, medical clinics, dental offices and pharmacists across the state and having these trusted community leaders to talk to families about the Hawki program. Since January 2014, hospitals and other providers have the ability to become Qualified Entities (QE) to provide presumptive eligibility for children and other populations. All local Hawki outreach coordinators worked with medical providers to encourage them to become QEs or to
establish a referral system to ensure uninsured children are able to access healthcare coverage.

Outreach to Diverse Ethnic Populations

Hawki outreach coordinators continue to partner with and provide outreach to multicultural and diverse populations across Iowa. Outreach continues to be conducted at local and statewide ethnic health fairs, conferences, festivals, ethnic radio stations, and numerous other events that target ethnic populations. Local outreach coordinators were offered culturally competent resources and information throughout the year to help in their local outreach efforts. These resources were typically print resources, face-to-face trainings and webinars.

Additional Outreach Activities

Local Hawki outreach coordinators focus on many different areas outside of the four required focus areas. They have a strong understanding of their community needs and have developed partnerships to ensure families in their service area are aware of the Hawki program. They work closely with other professionals who know which families need healthcare coverage and other services. Below are examples of additional outreach activities:

- Participating on a Rapid Response Team. This is a community partnership of agencies who offer information and resources to workforce and businesses that are experiencing layoffs in their communities. They are able to offer Hawki and presumptive eligibility services as an option.
- Working with insurance agents to identify children who need affordable healthcare coverage. They provide training and updated information and accept referrals from insurance agents.
- Attending health fairs and community events to promote the Hawki program and increase awareness. The outreach coordinators continually work on new and innovative ways to bring families to their booths to talk to them about Hawki, such as sharing unique promotional items and providing fun activities for children.
- Working closely with I-Smile™ coordinators to promote the Hawki Dental-Only program. I-Smile™ coordinators frequently work with local dental offices and schools to find children who need dental care. The provide Hawki Dental-Only information to families in need of dental coverage who may qualify for Hawki and coordinate their care.
- Utilizing social media to promote the Hawki program. The statewide Hawki outreach coordinator provides social media ideas and contents for local outreach coordinators to use.

The statewide Hawki outreach coordinator exhibited Hawki information at several conferences in 2019, including the Iowa School Nurse Organization’s Conference, the Pediatric Childhood Injury Conference, and the Fall Seminar for Maternal and Child & Adolescent Health agencies.
Presumptive Eligibility

Iowa Code 514I.5(e) requires the Department to utilize presumptive eligibility when determining a child’s eligibility for the medical assistance program. Effective March 1, 2010, Iowa implemented presumptive Medicaid eligibility for children under age 19.

Within the presumptive eligibility program, only qualified entities can enroll applicants into the program. A qualified entity is defined in 42 CFR 435.1101 and qualified entities must be determined by the Department to be capable of making presumptive eligibility determinations. Based on other states’ experience implementing presumptive eligibility, certification of qualified entities was initially limited to a select number of Hawki outreach coordinators.

To date, Iowa has gradually expanded qualified entities (QEs) and continues to add QEs in provider categories including: Head Start programs, Women, Infants and Children (WIC) clinics, physicians, rural health clinics, general hospitals, federally qualified health centers (FQHC), local and area education agencies, maternal health centers, and birthing centers. As of June 30, 2019, there were 226 QEs (individuals, hospitals and agencies) that have been authorized to sign up children for the presumptive eligibility program. In SFY19, a total of 6,825 children were approved for presumptive eligibility.

All presumptive eligibility applications are automatically forwarded from the QEs to the Department for a determination of ongoing Medicaid or Hawki coverage.

Participating MCOs and Dental Plans

During SFY19, families in all 99 counties had a choice of two MCOs: Amerigroup Iowa Inc. (Amerigroup) and UnitedHealthcare Plan of the River Valley, Inc. (United). (At the start of SFY20, United left the Hawki program and a new MCO, Iowa Total Care, started serving Hawki members.)

There is one dental plan, Delta Dental of Iowa that participated in Hawki in SFY19.

Board of Directors

Membership

The Hawki Board is comprised of four public members, the Directors of Education and Public Health, and the Insurance Commissioner or their respective designees. There are four ex-officio legislative members, two from the House and two from the Senate.

See Attachment Seven: Hawki Board Members
Board Activities and Milestones

Iowa Code Section 514I.5 (1) requires the Hawki Board to meet no less than six and no more than 12 times per calendar year. The Board generally meets the third Monday of every other month; meeting agendas and minutes are available on the Department’s website at https://dhs.iowa.gov/hawki.

Attachment Five – Referral Sources – Outreach Points

Any entity that is accessed by children or their families is potentially an outreach point where applications and information about the Hawki program could be available. In addition to local DHS offices, schools, daycare centers, WIC sites, etc., other potential sources through which information could be provided may include organizations that deal with children and their families (churches, schools, health fairs, etc.).

**Functions of the outreach points:**

The function of the outreach points includes, but is not limited to:
1. Disseminating information about the program.
2. Assisting with the application process if able.

**Hawki Board**

The function of the Hawki Board includes, but is not limited to:

1. Adopt administrative rules developed by DHS.
2. Establish criteria for contracts and approve contracts.
3. Approve enrollee benefit package.
4. Define regions of the state.
5. Select a health assessment plan.
6. Solicit public input about the Hawki program.
7. Establish and consult with the clinical advisory committee/advisory committee on children with special health care needs.
8. Make recommendations to The Governor and General Assembly on ways to improve the program.

**Department of Human Services (DHS)**

The function of DHS includes, but is not limited to:

1. Determine eligibility, premium processing, and enrollment.
2. Work with the Hawki Board to develop policy for the program.
3. Oversee administration of the program.
4. Administer the contracts with the MCOs, Dental Plan, IDPH and Telligen.
5. Administer the State Plan.
6. Provide statistical data and reports to CMS.

**Clinical Advisory Committee**

The Clinical Advisory Committee is made up of health care professionals who advise the Hawki Board on issues around coverage and benefits.

**MCO and Dental Plans**

The functions of the MCOs and dental plan are to:

1. Provide services to the enrollee in accordance with their contract.
2. Issue insurance cards.
3. Process and pay claims.
4. Provide statistical and encounter data.
