The Iowa Department of Public Safety gratefully acknowledges the state and local law enforcement agencies who have made every effort to comply with Chapter 692.15 of the *Code of Iowa* which charges them with the responsibility of reporting crimes to the Department.

A special note of thanks is also extended to those persons who process the crime reports at the sheriff's offices, police departments and state university departments of public safety across the state. Without their diligence and hard work, there would be no crime report.

EXECUTIVE SUMMARY

Overall, reports of crime declined in Iowa in 2008. It is important to keep in mind, however, that crime is a local event. Crime rates and crime reports will vary from one locale to another across the state, and crime rates and crime reports in any locale may vary from year to year. Crime rates and crime reports are best understood when compared in the aggregate over a period of years. The Iowa Uniform Crime Report attempts to provide that aggregate summary, as well as a meaningful comparison with previous years in order to understand general trends in crime reporting in Iowa.

Introduction

Historical Perspective

In 1974, the 65th Iowa General Assembly enacted a provision of Chapter 749 B of the *Code of Iowa* requiring law enforcement agencies to submit reports of crime and arrests to the Bureau of Criminal Investigation. The following language now is contained in section 692.15 of the *Code of Iowa* concerning Uniform Crime Reports:

If it comes to the attention of a sheriff, police department or other law enforcement agency that a public offense or delinquent act has been committed in its jurisdiction, the law enforcement agency shall report information concerning the public offense or delinquent act to the department on a form to be furnished by the department not more than thirty-five days from the time the public offense first comes to the attention of the law enforcement agency. The reports shall be used to generate crime statistics. The department shall submit statistics to the governor, the general assembly, and the division of criminal and juvenile justice planning of the department of human rights on a quarterly and yearly basis.

During December, 1974 the Bureau of Criminal Investigation conducted schools throughout the state on the proper completion of Uniform Crime Reports. The schools were attended by most of the law enforcement agencies that were to contribute Uniform Crime Reports. On January 1, 1975, the Iowa Uniform Crime Reporting program was implemented, with forms being sent to 210 agencies. Forms provided by the Federal Bureau of Investigation were used in implementing this program since most contributing agencies had previously submitted their forms to the FBI. Monthly reports were received from 209 agencies throughout 1975 and 1976. In 1977, the number of agencies submitting reports grew to 220, which remained the case in 1978. In 1979, the number of reporting agencies rose to 223, and in 1980 to 225. The number of reporting agencies were reduced to 223 in 1981 but rose again in 1986 to 224 and to 225 in 1990. With very few exceptions the reporting agencies submitted data for every month from 1977 to 1990.

In 1977, the responsibility for Uniform Crime Reports was transferred from the Bureau of Criminal Investigation to the Department of Public Safety's Division of Administrative Services (which maintained UCR field personnel in the Field Services Bureau who responded to questions concerning data entry policy and procedures and received raw data from contributing agencies) and the Data Services Bureau (which performed computer analysis of the data). The Research and Development Bureau of the Commissioner's Office performed the function of further analyzing the data, preparing reports, and responding to requests for information based on the data. From 1993 the function was housed in what is now known as the Program Services Bureau. The data collection process is still housed in the Program Services Bureau, but analysis and reporting has been housed in the State of Iowa Intelligence Fusion Center since 2006.

The National Uniform Crime Reporting System began with 400 cities representing 20 million inhabitants in 43 states on January 1, 1930. Since the establishment of the Uniform Crime Reporting Program, the volume, diversity, and complexity of crime steadily increased while the UCR program remained virtually unchanged. Recognizing the increasing need for more in-depth statistical information and the need to improve the methodology used for compiling, analyzing, auditing, and publishing the collected data, an extensive study of the Uniform Crime Reports was undertaken. The objective of this study was to meet law enforcement needs into the 21st century. The result of the study was NIBRS (National Incident Based Reporting System). Adoption of the NIBRS system took place in the mid 1980s and Iowa began organizational efforts to implement the system. Conversion to IBR (Incident Based Iowa Uniform Crime Reporting) was completed January 1, 1991, as part of a national effort to implement incident based crime reporting, coordinated by the Federal Bureau of Investigation and the Bureau of Justice Statistics of the U.S. Department of Justice. Iowa was the fifth state in the nation to be accepted as a certified "reporting state" of incident based crime data to the national system.

Incident-Based, Iowa Uniform Crime Reports Overview

The incident-based crime reporting system (IBR) involves collection of data on individual criminal incidents rather than monthly statistical summaries. These individual crime incidents and arrests are submitted in the form of reports using prescribed data elements and data values to describe each incident and arrest. The National Incident-Based Reporting System (NIBRS) compiles the specified information on two types of Offenses: "Group A Offenses" and "Group B Offenses". Both incidents and arrests are reported for Group A offenses while only arrests are reported for Group B offenses.

Group A Offenses

Arson
Assault Offenses
Bribery (Except Sports Bribery)
Burglary/Breaking and Entering
Counterfeiting/Forgery
Destruction/Damage of Property (Except Arson)
Drug/Narcotics Offenses (Except Driving Under the Influence)
Embezzlement
Extortion/Blackmail
Fraud Offenses (Except Counterfeiting/Forgery and Bad Checks)
Gambling Offenses
Homicide Offenses
Kidnapping/Abduction
Larceny/Theft Offenses
Motor Vehicle Theft
Pornography/Obscene Material
Prostitution Offenses
Robbery
Sex Offenses, Forcible
Sex Offenses, Non-forcible
Stolen Property Offenses
Weapon Law Violations

The above 22 Group A crime categories are further divided into 46 offenses. The criteria for deciding whether a crime is to be designated as a Group A offense depends upon:

- The seriousness or significance of the offense
- The frequency or volume of its occurrence
- How widespread is the occurrence of the offense in the United States
- How likely the offense will come to the attention of law enforcement

- Whether law enforcement is the best channel for collecting data regarding the offense
- The burden placed on law enforcement in collecting data regarding the offense
- The statistical validity and usefulness of the collected data
- The National UCR Program's responsibility to make crime data available not only to law enforcement but also to others having a legitimate interest in it.

Group B Offenses

Bad Checks
Curfew/Loitering/Vagrancy Violations
Disorderly Conduct
Driving Under the Influence
Drunkenness
Family Offenses (non-violent)
Liquor Law Violations
Peeping Tom
Runaway
Trespass of Real Property
All Other Offenses

More complete definitions of Group A and Group B offenses can be found in Appendix B. These definitions were taken from a federal publication entitled: *Uniform Crime Reporting, National Incident-Based Reporting System*, Volume 1 *Data Collection Guidelines.* September, 1996.

The federal definitions of offenses are general definitions. "The definitions which were developed for NIBRS are not meant to be used for charging persons with crimes. To the contrary, they are meant to be "receptacles" or "pigeonholes" for reporting crimes that are committed throughout the United States. The purpose for UCR as developed by law enforcement is to provide a "common denominator" language, which transcends varying local and state laws. State statutes and local ordinances must be very specific in defining crimes so that persons facing prosecution will know the exact charges being placed against them. On the other hand, the definitions used in NIBRS are generic in order not to exclude varying State and Federal statutes relating to the same type of crime."

2008 Incident-Based, Iowa Uniform Crime Reports: Part I Analysis

Contained in the 2008 Incident-based, Iowa Uniform Crime Reports is the analysis found in Part 1. The narrative for total crimes (Group A and Index), murder, total sexual assaults, forcible sexual assaults (forcible rape, forcible sodomy, sexual assault with an object, forcible fondling), non-forcible sexual assaults (incest and statutory rape), robbery, aggravated assault, simple assault, intimidation, stalking, burglary, larceny, motor vehicle theft, fraud, arson, vandalism, weapons laws violations as well as drug violations is found in Section A of Part 1. A short explanation of Group A and B arrests and victim information is also in Section A of Part 1. Hate/Bias Crime is found in Section B, Domestic Abuse is found is Section C and Law Enforcement is found in Section D.

The analysis of the above mentioned crimes includes illustrations in the form of tables and figures to make the analysis more comprehensible. Total incidents, rates per 100,000 population, gender, race, date and time are just a few of the breakdowns found in the analysis of murder, sexual assault, robbery, aggravated assault, simple assault, intimidation, burglary, larceny, motor vehicle theft, drug violations, and arrests. The hate/bias and domestic abuse sections include a narrative documenting the historical perspective of each category as well as other interesting background details. The law enforcement section includes employment information as well as officers killed or assaulted in the line of duty. Five and ten year comparison tables are also included throughout this section showing rates and total offenses and arrests.

The rates used in Part 1 of this report are figured on a population basis of those law enforcement jurisdictions reporting more than six months worth of consistent offense data. Adjusted rates are used also for total arrests in the narrative, but table rates are figured on the combined populations of law enforcement jurisdictions having **any** arrests. There is no accurate way to compensate for incomplete reporting of arrest data, particularly juvenile arrest data. (For further discussion on the completeness of this report refer to Appendix A, B or C in the back of this publication and Total Crime in Iowa found in the narrative section.)

- Juveniles are considered all persons less than 18 years of age.
- Rates are figured by dividing the crimes, arrests or etc. by a population and multiplying the answer times 100,000.

2008 Incident-Based Iowa Uniform Crime Reports: Part II Statistical Data

Contained in the 2008 Incident-Based Iowa Uniform Crime Reports are several tables, found in Part II, illustrating state totals as well as tables breaking down state totals by reporting law enforcement jurisdiction. The reports are set up in four sections with Section A containing general crime information, Section B containing hate/bias crime information, Section C containing domestic abuse information and section D containing LEOKA and law enforcement personnel information.

As an added feature, some of the agency specific tables now contain population summaries at the end of those tables. The population summaries are broken down by:

Cities of 50,000 and over population
Cities between 25,000 and 49,999 population
Cities between 10,000 and 24,999 population
Cities between 5,000 and 9,999 population
Cities under 5,000 population
Suburban Sheriff's Offices
Rural Sheriff's Offices
State Universities

- Cities under 5,000 population usually include cities between 2,500 and 5,000 population. Cities under 2,500 population report through their Sheriff's Office unless they have applied to be a direct reporting agency (fewer than 10 agencies have done this since 1991 when this became possible). In 2003, Johnston and Pella increased in population and moved from a size six to a five, or between 2,500 and 9,999 population to between 10,000 and 24,999 population.
- Suburban Sheriff's Offices include those in Black Hawk, Dallas, Dubuque, Johnson, Linn, Polk, Pottawattamie, Scott, Warren and Woodbury Counties. The Bureau of Census through the FBI added additional counties in 2005 (for 2003 data and beyond) to be considered. The metropolitan counties that were added are: Benton, Bremer, Grundy, Guthrie, Harrison, Jones, Madison, Story and Washington. Rural area sheriff's offices include those in the 80 counties that are not classified as suburban sheriff's offices (as listed above).
- State Universities include the University of Northern Iowa, the University of Iowa, and Iowa State University.

Section A, Table 1 shows Group A offenses for each reporting agency. Section A, Table 2 converts IBR data to summary data similar to Part 1 crimes seen in reports for 1990 and before in the (summary based) Iowa Uniform Crime Reports. In both Table 1 and Table 2 the rates for the state totals reflect the adjustment in population, subtracting the non-reporting jurisdictions. (For further discussion on the completeness of this report refer to Appendix A in the back of this publication or in the Chapter on Totals).

More specifically, Table 1 shows the complete list of Group A offenses that have been reported by the incident-based method. Those 46 Group A crimes have been broken down by the direct reporting law enforcement geographic jurisdictions (the 99 county sheriffs, the three state university departments of public safety and the 131 local police departments) as well as the state totals. Included in these totals are the submissions of the state law enforcement agencies. The major contributing state agency has been the Iowa Department of Public Safety's Division of State Patrol. Data reported by state agencies is attributed to the jurisdictions in which the crimes occurred.

Table 2 contains incidents of crime converted back to the summary-based method (formerly Part 1 Crimes). The crimes of murder, rape, robbery, aggravated assault, burglary, and motor vehicle theft are shown in this table.

Reported arrest information is presented in tables by jurisdiction in the 2008 Incident-Based Iowa Uniform Crime Reports. These tables may be used to report adult and juvenile arrest information together or separately. The tables show arrest rate figures per 100,000 population. Arrest rates for the state are figured by the accumulated population of the law enforcement jurisdictions when **any** arrests are entered for that jurisdiction.

Reported clearance information and percentage of offenses cleared by jurisdiction is also represented in table format. A clearance usually occurs when an arrest occurs. However, a case can also be cleared exceptionally. The following four conditions must be met to exceptionally clear an offense: 1) the investigation must have clearly and definitely established the identity of at least one offender; 2) sufficient probable cause must have been developed to support the arrest, charging, and prosecution of the offender; 3) the exact location of the offender must be known so that an arrest could be made; 4) there must be a reason outside the control of law enforcement which prevents the arrest, i.e.:

- Death of the offender/suspect
- Prosecution declined (by the prosecutor for other than lack of probable cause)
- Extradition denied
- Victim refused to cooperate (in the prosecution)
- Juvenile/no custody (the handling of a juvenile without taking him/her into custody, but rather by oral or written notice given to the parents or legal guardian in a case involving a minor offense)
- Warrant issued
- Turned over to another agency

The Hate/Bias Crime information can be found in Section B listed by offense type, victim, offender, target, motivation and jurisdiction. Additional tables listing Hate/Bias Crime history by agency can be found in the Part II tables.

The Domestic Abuse reports for 2008 are reported in Section C. Included in the information collected is data on time and location of occurrence, victims, offenders, relationships, signs of abuse, weapons used, referrals made by law enforcement, presence of the offender, presence of the children and whether they were harmed, and the use of alcohol and drugs. Although the Domestic Abuse Reports were always counted by 1 incident per victim, they were not a part of the general crime data before 1991 but were maintained by a separate system. With the incident-based system, domestic abuse offenses are an integral part of the tabulations. However, the number of victims per incident may be different than the number of victims per agency. This is reflected in the tables generated in this section.

The remaining tables in this report examine statewide totals in different ways. Arson, property stolen and recovered, and reported weapon information by offense, among other statewide data, can be found in the List of Tables.

An information requesting system is available to complement the incident-based crime records data system. This system is dependent on the main data system and will be used for specialized requests on a time available basis.

Anyone wishing to request specialized data should contact the State of Iowa Intelligence Fusion Center, Department of Public Safety, 215 East 7th Street, Des Moines, Iowa 50319-1900, (515)725-6322. Those on-line may e-mail requests to: ibrinfo@dps.state.ia.us.

It should be noted that increases in reporting within the first few years of implementation of a new reporting system are common. Therefore, comparisons of the early years 1991 and 1992 data from the incident-based system should be viewed cautiously. Similarly, comparisons of reporting levels between data from the incident-based system and data from 1990 and before may also be inappropriate.

Much work has been accomplished in the last few years towards total conversion to the Incident-Based Iowa Uniform Crime Reports. The Iowa Department of Public Safety acknowledges the challenge it has been for the reporting agencies in Iowa to comply with the new standards and commends those law enforcement agencies that have made the substantial effort required to submit their data in an accurate and timely manner.

Adjusted Rates

NOTE: Data for this report is based on incidents submitted by the law enforcement jurisdiction throughout Iowa to the Iowa Department of Public Safety. Although not all of the law enforcement agencies in Iowa were able to report statistical data, or complete data, the numbers show a marked increase in compliance with the reporting system since the 1991 introduction.

The adjusted population criterion is based on an individual agency entering more than six months worth of consistent data for the year. The adjusted population figure for 2008 is 2,908,540 or 96.9 percent of the total population, which is a slight increase from 2007 when the adjusted population was 2,837,012 or 96.7 percent of the total population. The adjusted population figures since 1999 are as follows: 2006 is 2,830,970; 2005 is 2,796,657; 2004 is 2,780,998; 2003 is 2,697,640; 2002 is 2,680,799; 2001 is 2,608,047; 2000 is 2,493,096; and 1999 is 2,458,008. All ten year comparison tables or figures displayed in this analysis were computed using these adjusted populations.

The following law enforcement agencies' corresponding populations are not included in the adjusted population figure for 2008:

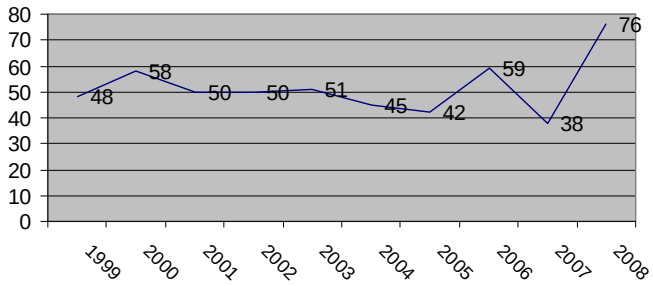
MURDER VICTIMS
1999 - 2008

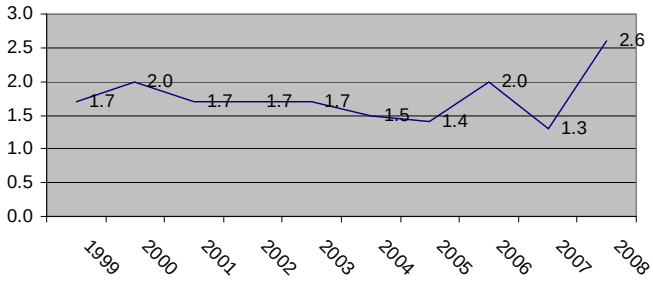
Figure 24



There were 76 murders reported in 2008, which is the second highest number since the Department became the repository for crime data in 1974. The only higher reported number was in 1981 when there were 77 recorded murders. The number of murders doubled from 2007 when only 38 murders were reported. The 38 murders recorded in 2007 was an all time low since 1974. It is difficult to identify a trend in murders because of the relatively small numbers involved. However, murders generally increased from 1992 (44) to a period peak in 1996 (66) and 1998 (66) before declining substantially in 1999 (48). During the last decade the number of murders peaked slightly in 2000 (58) followed by a relatively constant number from 2001 through 2003. The number of murder victims declined in 2004 (45) and again in 2005 (42) before increasing in 2006 (59).

MURDER
ADJUSTED RATES 1999 - 2008

Figure 25



Murder rates per 100,000 population for the years 1999 – 2008 are displayed in Figure 25. They follow a similar pattern to the number of victims displayed in Figure 24, but vary slightly depending on the population changes.

NOTE: Since statewide crime reporting was instituted, supplemental homicide reports have been submitted by law enforcement agencies to the Iowa Department of Public Safety. These reports contained more detailed homicide information than was required by the summary based crime reporting system. Since the inception of the incident-based system in 1991, supplemental homicide reports have been requested (when applicable) of law enforcement agencies that have not been able to report to the incident-based system.

MURDER: AGES OF VICTIMS
IOWA, 2008

Figure 26

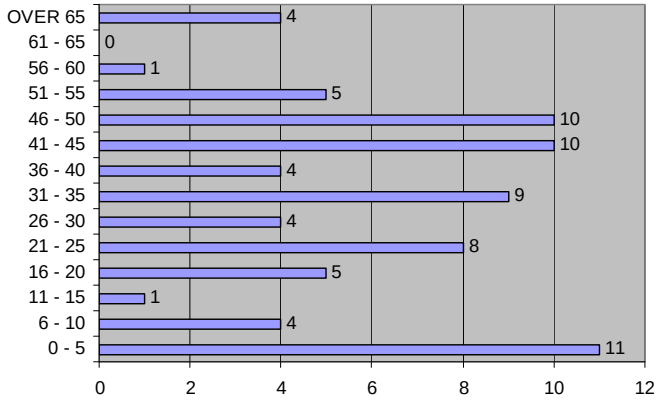

Figure 26 shows the ages of the 76 murder victims during 2008. The age category 0 - 5 accounted for the highest number of victims (11), which is 14.5% of the total number of victims. This is an increase from 2007 in which only 5% of the victims were aged 5 and under. By comparison the percentage logged in other years is as follows: 7% in 2006, 14% in 2005, 7% in 2004, and 16% in 2003. Two age categories recorded the next highest number of victims (10): 41 – 45 and 46 - 50.

The age group 46 – 50 recorded the largest victim increase with no victims recorded in 2007, but ten victims recorded in 2008.

Victims over the age of 50 decreased in 2008 accounting for 13.2% of the total number of victims compared to 23.6% recorded in 2007.

Males were the victim of homicide most often over the last decade. In 1998, the victim's gender was evenly distributed, but all other years in the past decade show a higher percentage of male victims. In 1993 (not shown), female victims accounted for 53% of the total. In 2008, males accounted for 61% of the total number of victims, which is a decrease from the decade high set in 2007.

In 2006, African American murder victims accounted for 10% of the total, the same percentage recorded in 2001, which is the lowest percentage recorded since 1991 when the request for supplemental homicide reports for the incident-based system began. In 2007, the percentage spiked to 34%, which is the highest percentage recorded. The percentage decreased to 24% in 2008. White victims accounted for 64%, which is the lowest percentage recorded for the decade. Asian victims recorded a decade high 7% in 2008. Four of the five Asian victims were children in the same family and were killed in the same incident.

There were six reported Hispanic murder victims in 2008, which is 8% of the total number of victims for the year. The six Hispanic victims are recorded under White for their race.

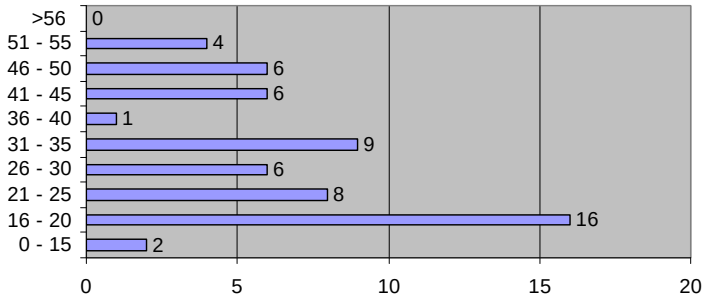
Figure 30



There are 79 known offenders, who participated in the murder of the 76 victims in 2008. Among those 79 offenders there were 58 arrests recorded. In some cases supplemental information was not received on the arrest of offenders, so it is possible that not all arrest information was recorded.

In 2008, 16 of the 58 arrested offenders were in the age category 16 – 20, which is 27.5% of the total. Fifty-two percent of the offenders were between ages 16 and 30. Over the last decade offenders between the ages of 16 and 30 have been the most reported group. Specifically, the offenders in this age range were reported 66% of the time in 2007, 57% in 2006, 65% in 2004, 58% in 2003, 71% in 2002, 55% in 2001, 60% in 2000, 49% in 1999, and 65% in 1998. The only exception is in 2005 when 52% of the known offenders were recorded between the ages of 21 and 35.

Following a marked decrease from 2006 to 2007, White offenders increased to 63% of the total number of offenders in 2008. The percentage of African American offenders decreased to 33% after having set a decade high 46% in 2007. In 2008, Asian persons and an offender of an unknown race each accounted for 2% of the total.

In 2008, five of the white offenders were identified as being Hispanic. Hispanic offenders accounted for 6.6% of the total in 2008, which is an increase from the 5.3% reported in 2007.

JUVENILES INVOLVED IN HOMICIDE

In 2008, the highest number of juvenile victims was recorded for the decade with 17 reported juvenile victims. Fifteen of the seventeen child victims were killed by their parent, parents significant other and/or guardian. The decade low was recorded in 2007 with only three juvenile victims. In 2008, 11 of the juvenile victims were aged five and under. The year also recorded two juvenile offenders including 15 year old and 13 year males. The decade high for juvenile offenders was in 2002 with nine young persons involved in the commission of a murder: one 15 year old, four 16 year olds, and four 17 year olds.

RELATIONSHIPS BETWEEN VICTIM AND OFFENDER

MURDER: RELATIONSHIP BETWEEN VICTIMS AND OFFENDERS
IOWA, 2008

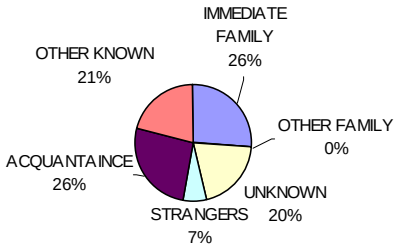

Figure 36

No victim/offender relationship was identified in eight of the cases due to no known offender being recorded. Several of the incidents also had more than one offender listed. There were 76 victim/offender relationships identified, 26% of which were recorded as Acquaintance. Child/Step-Child was the second accounted for the second highest number of identified relationships at 14.5%. Offenders identified as Immediate Family accounted for 26% of the total relationships. This category peaked in 1998 accounting for 35% of the total.

MURDER CIRCUMSTANCES

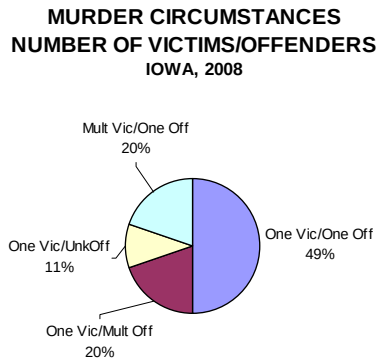

Figure 37

Figure 37 shows the 2008 murder situations broken down by number of victims and offenders for each incident. One victim/one offender accounted for 49% of the situations, which is a decrease from the 71% reported in 2007. Fifteen victims were recorded in incidents where there was either multiple victims/one offender or one victim/multiple offenders. Domestic/child abuse related circumstances were recorded in all of the incidents where multiple victims were killed by one perpetrator. A relationship was identified in 89% of the cases.

The previous decade high for child abuse murders was in 2000 when 19.2% of the victims were due to child abuse. In 2008, domestic murders accounted for 16% (12 of 76).

MURDER WEAPONS

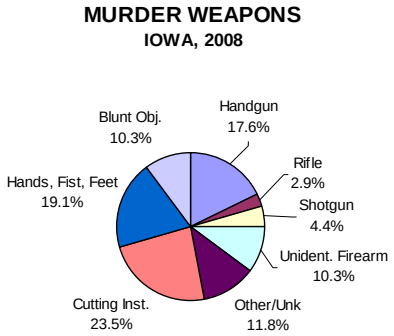

Figure 39

The combined Firearm category accounted for 35.3% of weapons used during the commission of a murder. Handguns (12 of 24) were the most used firearm. Knives or Cutting Instruments accounted for 23.5% (16 of 68) of the total, which was the most often used weapon. Handguns were used more often than Cutting Instruments in 2003 to 2005, but Cutting Instruments have surpassed Handguns for the past three years.

WHEN

Usually no clear pattern emerges when comparing previous years' murder incidents by month. In 2008, the highest number of incidents occurred in July (9), which was also the highest recorded month in 2006 (10). In 2007, the highest recorded month was December (6). In 2005, May and June had the highest number of incidents with five each. January and February had the most reported incidents in 2004.

In 2007, there was only one incident reported in both March and November. The other three years represented in Table 17 varied as follows: September was the lowest month in 2006, August in 2005, and September in 2004.

Over the last five years no specific day of the week has been identified as having more murder incidents, however, Saturday was the most reported day in 2007 (10) and 2008 (14). Sunday was the most common day in 2006 (13) and shared with Monday in 2005 (8 each). In 2004, Tuesday had twelve incidents, which was the highest day. Tuesday was the least reported day in 2006, 2007 and 2008.

WHERE

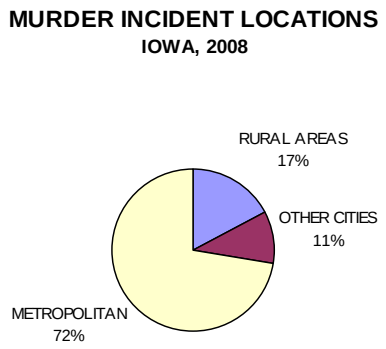

Figure 43

Metropolitan incidents accounted for 72% of the murders in 2008, which is a decrease from the 83% reported in 2007. In recent years metropolitan incidents have accounted for the majority of the reported murders as follows: 52% of incidents in 2006 were located within metropolitan areas, 55% in 2005, and 79% in 2004. "Other" refers to the cities, usually over 2,500 population, which submit their own statistical data. Other cities accounted for 11% of the reported homicides in both 2007 and 2008. Rural areas are the county sheriffs' jurisdictions that are not in a Metropolitan area. Rural county sheriffs' offices recorded 17% of the murder incidents in 2008, which is an increase from the 6% reported in 2007.

The number of sexual assault victims decreased for the second year in a row. The sexual assault adjusted rate decreased 6.6% from 77.2 in 2006 to 72.1 per 100,000 population in 2008. Overall for the decade, sexual assault offenses increased through 2006 with the exception of 2003. However, due to the decrease over the last two years the number of offenses is comparable to the first part of the decade. Due to population growth over the last ten years the adjusted rate is at a decade low.

Sexual assault arrest rates per 100,000 population decreased from 12.5 in 2007 to 11.8 in 2008. The arrest rate has decreased 22.8% over the ten year period.

HATE/BIAS CRIME

HATE CRIMES

HISTORICAL PERSPECTIVE

In the past two decades, criminal acts motivated entirely or in part by prejudice have come to be known as hate crimes. These crimes continue to occur in Iowa, as well as throughout the country. Hate crimes not only affect individuals or groups, but also can disrupt the very ideals of a democratic society. Individuals and/or groups are affected more deeply because hate crimes are not random; the victims are targeted for who they are. The entire community can be threatened because of the increased level of fear and distrust related to or perceived after a hate/bias incident. The aftermath of fear related to a criminal act in the community can then escalate into other criminal incidents. In response to the seriousness of these crimes, state and national programs have been instituted to focus on these incidents. Specifically, new law enforcement techniques were developed to investigate these crimes along with data collection enhancements to determine the scope and nature of these offenses.

Public Law 101-275 or the "Hate Crimes Statistics Act" was approved, after passing both the House and Senate of the United States, on April 23, 1990. The purpose of this Act is to acquire and publish data of crimes that include evidence of bias based on race, religion, sexual orientation, or ethnicity. The collection elements thought to be appropriate include the crimes of murder, non-negligent manslaughter, forcible rape, aggravated assault, simple assault, intimidation, arson, and destruction, damage, or vandalism of property.

On a state level, beginning in 1990, the 73rd Iowa General Assembly enacted into law precise language defining a hate crime and making special provisions for hate crimes. Revised in 1992, Iowa's law provides a broader range of protection than the national law, reiterating the violation of an individual's rights and including victims of prejudice because of their sex, age, political affiliation, or disability. Iowa law provides:

SEC. 729A.1 VIOLATIONS OF AN INDIVIDUAL'S RIGHTS PROHIBITED.
Persons within the state of Iowa have the right to be free from any violence, or intimidation by threat of violence, committed against their persons or property because of race, color, religion, ancestry, national origin, political affiliation, sex, sexual orientation, age, or disability.

SEC. 729A.2 VIOLATION OF INDIVIDUAL RIGHTS – HATE CRIME.
"Hate crime" means one of the following public offenses when committed against a person or a person's property because of the person's race, color, religion, ancestry, national origin, political affiliation, sex, sexual orientation, age, or disability, or the person's association with a person of a certain race, color, religion, ancestry, national origin, political affiliation, sex, sexual orientation, age, or disability.

Bias Crime Indicators
From the National Center for Hate Crime Prevention

Racial, Ethnic, Gender and/or Cultural Differences

- The race, religion, ethnicity/national origin, disability status, gender, or sexual orientation of the victim differs from that of the offender.
- The victim is a member of a group that is overwhelmingly outnumbered by members of another group in the area where the incident occurred.
- The victim was engaged in activities promoting his or her group.
- The incident coincided with a holiday or date of particular significance to the victim's group.
- The victim, although not a member of the targeted group, is a member of an advocacy group that supports the victim group, or the victim was in the company of a member of the target group.
- Historically, animosity exists between the victim's group and the offender's group.

Comments, Written Statements, or Gestures

- Bias-related comments, written statements, or gestures were made by the offender.

- There are indications that a hate group was involved; for example, an organized hate group claimed responsibility for the crime or was active in the neighborhood.

Previous Bias Crimes or Incidents

- Victim was visiting a location where previous bias crimes had been committed against members of the victim's group.
- Several incidents occurred in the same area, and the victims were members of the same group.
- Victim had received previous harassing mail or phone calls or had experienced verbal abuse based on his or her affiliation with a targeted group.
- Recent bias incidents or crimes may have sparked a retaliatory hate crime.

Victim/Witness Perception

- Victims and/or witnesses perceive that the incident was motivated by bias.

Motive of Offender

- Offender was previously involved in a similar incident or is a member of, or associates with members of, an organized hate group.
- The victim was in the company of or married to a member of a targeted group.
- The victim was perceived by the offender as violation or breaking from traditional conventions or working in nontraditional employment.
- The offender has a history of previous crimes with a similar modus operandi, and involving other victims of the same race, religion, ethnicity/national origin, disability, sexual orientation, or gender.

Location of Incident

- The victim was in or near an area or place commonly associated with or frequented by members of a particular race, religion, ethnicity/national origin, disability, sexual orientation, or gender (e.g., a gay bar).
- The incident occurred at or near a house of worship, religious cemetery, or a home or establishment of a group considered a minority or "outsider" in a given neighborhood (e.g., a Korean store in an African American neighborhood, a gay bar, or an African American home in a predominately White neighborhood).

Lack of Other Motives

- No clear economic or other motive for the incident exists.

Anti-African American crimes accounted for 54.3% of the hate crimes in 2008 and 46.8% for the decade. Anti-Male Homosexual (gay) was the next most reported group accounting for 8.6% in 2008 and 10.7% for the decade. Anti-Hispanic continued to record the third highest percentage accounting for 5.7% in 2008, compared to 7.2% for the decade.

SECTION C

DOMESTIC ABUSE

DOMESTIC VIOLENCE

HISTORICAL PERSPECTIVE

The Iowa Department of Public Safety is charged under Chapter 236 of the *Code of Iowa* with the responsibility for collecting information on incidents of domestic abuse in Iowa from local law enforcement agencies. The national Uniform Crime Report guidelines do not require the reporting of domestic abuse separately. The Department began collecting domestic abuse data on July 1, 1985, assuming a function previously performed by the Iowa Department of Human Services. The domestic abuse reporting system was the only incident-based crime data collected by the Department from 1986 through 1990. The incidents of domestic abuse rose rapidly each year between the years of 1986 to 1990 increasing from a reported 3,501 incidents in 1986 to 6,199 reported incidents in 1990. Beginning with the 1991 data the Department incorporated the domestic abuse data and hate/bias crime data with the new Iowa Incident-Based Uniform Crime Reporting System, housing all crime data in one computerized system.

Domestic Abuse is defined by Section 708.2A(1) and in Section 236.2 of the Code of Iowa under any of the following circumstances:

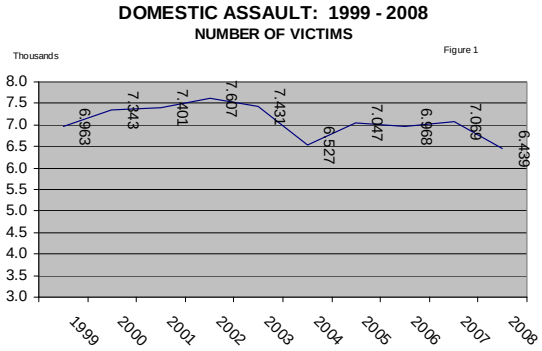
a. The assault is between family or household members who reside together at the time of the assault.
b. The assault is between separated spouses or persons divorced from each other and not residing together at the time of the assault.
c. The assault is between persons who are parents of the same minor child, regardless of whether they have been married or have lived together at any time.
d. The assault is between persons who have been family or household members residing together within the past year and are not residing together at the time of the assault.
e. The assault is between persons who are in an intimate relationship or have been in an intimate relationship and have had contact within the past year of the assault.

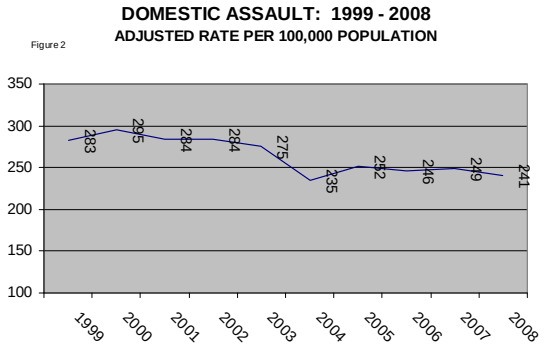
Some factors of an intimate relationship can be: duration, frequency of interaction, termination, either party's sexual or romantic expectations and the relationship does not have to be exclusive.

Although the definition of Domestic Abuse has changed since 1985, the meaning of "family or household members" has stayed much the same. The major changes have been in 1987, 1989, 1991, 1993, 2002 and 2003.

HOW MANY…

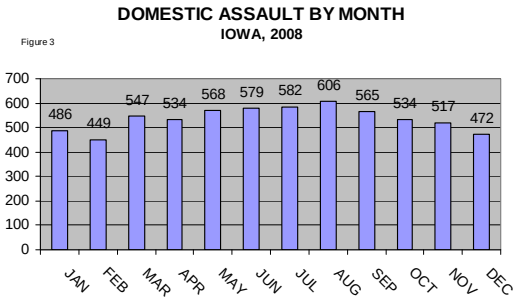
Counted by Victims





In 2008, the domestic abuse adjusted rate decreased 3.2% from 2007. The decade high adjusted rate was reported in 2000 (292 per 100,000 population), but the highest number of reported victims was reported in 2002 (7,607).

WHEN



July was the most reported month for incidents of domestic violence in 2004, 2006, and 2007. However, June was the most reported month in 2003, and in 2008 it was August. February was the lowest recorded month for the years 2006 through 2008; while it was November in 2004 and 2005.

In every year, Monday reported the least number or tied for the lowest number of victims of any other day.

The percentage of Asian and Native American victims have remained fairly constant, not exceeding 2% in any given year, over the last decade. The percentage of African American victims has increased almost 4% since 1999. Conversely, White victims have decreased nearly 4% since 1999. In 2008, White persons accounted for 81.2% of the total victims. There were 311 reported Hispanic victims, a slight decrease from 2007 (347) which reported the highest number for the last decade. The previous high had been recorded in 2006 with a reported 326 Hispanic victims.

In 2008, the percentage of female offenders was slightly lower than the previous year, but still the second highest recorded for the decade. The number of White offenders has decreased more than 6% since 1999, while African American offenders have increased nearly 6%. Asian and Native American offenders have shown little change. In 2008, Asian and Native American offenders were more often than not at the scene when the report was made, but White and African American offenders were more often not present.

The largest percent of persons involved in a domestic abuse situation were between the ages of 16 and 25. In 2008, 37% of victims of domestic abuse were between the ages of 16 and 25. The second highest age category was 26 through 35, which accounted for 32%.

Among known offenders the age category 16 through 25 also accounted for the largest percentage recording 2,404 offenders or 37% of the total. The second highest age category was 26 through 35, which accounted for 32%. The number of victims and offenders under age 16 and over age 65 mirrored each other.

WHAT

The investigating officer reports a number of characteristics of each domestic abuse incident. Included are observed signs of abuse (injuries) to the victim, the weapon used to inflict the abuse and who reported the abuse to law enforcement. The law enforcement officer also notes any referrals made, the presence or absence of children during the abuse, whether an arrest was made, and if the offender was present at the time of the report

Under Iowa law, investigating officers may be asked for referrals, but are not mandated to make any referrals. Programming options vary widely across the state. No referral was made in 48.5% of the cases in 2008, which is an increase from the 47.7% recorded in 2007. Shelter referrals decreased 1% while all other referral categories maintained the same percentages. Officers may make multiple referrals for one incident.

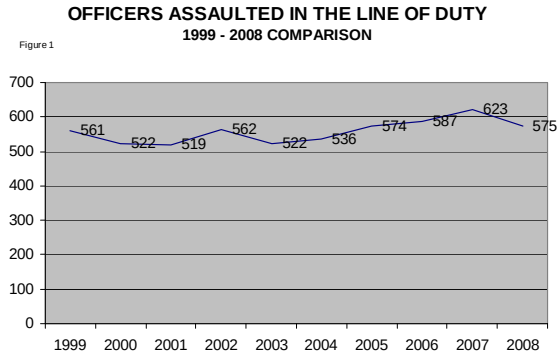
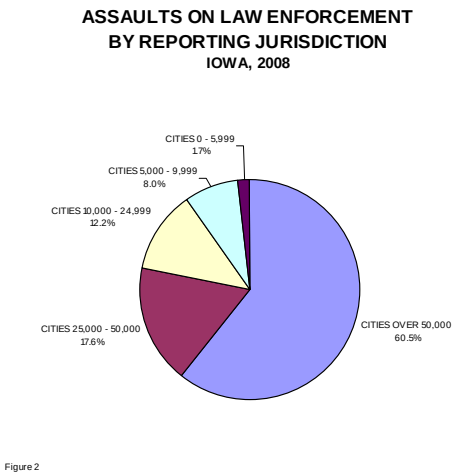
IOWA OFFICERS ASSAULTED IN THE LINE OF DUTY

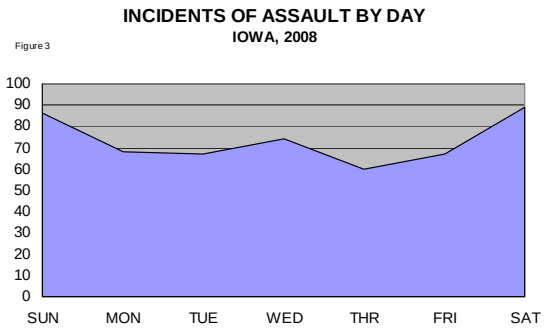


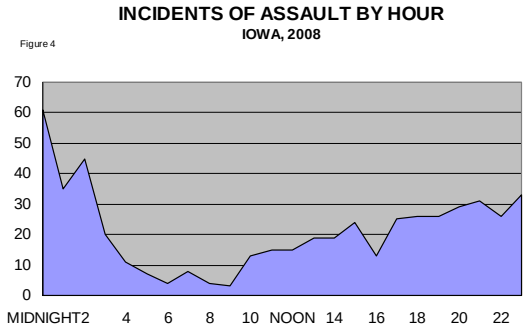
Caution should be used when analyzing this data. As with the crime data, it represents reports from law enforcement jurisdictions accounting for 96.7% of the total population of Iowa.

Over the last decade the number of Iowa law enforcement officers assaulted annually in the line of duty increased from 2003 through 2007 In 2008, 575 officers were reported as being assaulted, which equates to a 7.7% decrease from 2007. Over the past decade the lowest reported number of officer assaults occurred in 2001 (519) and the highest number in 2007 (623).

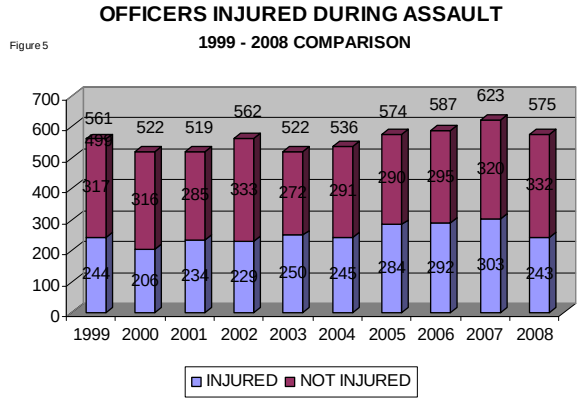


Assaults on law enforcement officers in the line of duty most often occurred in larger metropolitan areas of Iowa. Seventy-eight percent of the assaults were reported as occurring within suburban areas. Cities reporting a population less than 6,000 people reported the lowest number of assaults.





In 2008, officer assaults occurred most often on Saturdays (89) followed by Sunday (86). A peak number of assaults were also recorded on Wednesday. This matches the trend over the last decade that shows the majority of officer assaults occurring on the weekends with a lower peak on one of the midweek days. A time of day trend has also been identified over the last decade with the midnight hour being the most recorded assault time for each year. The highest percentage of assaults has occurred between the hours of 10:00 pm and 2:00 am. The lowest assault times have been recorded between 6:00 am and 8:00 am.



The percentage of assaults resulting in injuries to the officer peaked in 2006 accounting for 49.7% of the total assaults. Officers reported being injured from the assault more often during the second half of the decade (47%) compared with injured officers during the first five years (43%). In 2008, injuries to assaulted officers were reported in 42.3% of the assaults, which is a more than 6% decrease from 2007.

In 2008, the highest percentage of officer assaults were perpetrated when the officer responded on a disturbance call (37.2%) followed by officers assaulted while making an arrest on a separate charge (17.7%). In 2008, the offender used personal weapons such as hands and feet to assault the officer in 76.9% of the incidents. Weapons other than a firearm or knife were used 20.3% of the time. Injury resulted from an assault with personal weapons 45.7% of the time.

Officer assaults by assignment follow similar patterns from year to year. The majority of assaults occur among uniformed single officer cars and primarily when an assisting officer is present. In 2008, one officer cars accounted for 64% of the assaults compared with 63% in 2007. Uniformed officers accounted for 85% of the officers assaulted in 2008 compared with 80% in 2007.

National statistics indicate that the vast majority of police departments use one-officer cars. Recent research indicates that assaults of officers are closely related to resistance to police use of force, and that resistance may be greater for one-officer cars than for two officer cars.

APPENDIX A

A previously used indicator of the completeness of crime data has been "agency months". Agency months refers to the formula that counts the number of months in a year times the number of agencies, divided into the number of actual months some data is entered for all of the agencies. For example, in 1991 through 1993 Iowa had 225 reporting law enforcement agencies times 12 possible months of data submission equals 2,700 months that could be possible for 100% reporting. In 1991, crime data was entered in 1,872 months divided by the possible months would equal 69.3 percent complete reporting. In 1992, 2033 agency months had some crime data entered for a total of 75.3 percent complete reporting. There were 2,171 months entered for 1993 to account for 80.0 percent completeness. Eight agencies joined the direct reporting agencies in 1994. Therefore, the possible months of reporting rose to 2,796 in 1994. There were 2,323 months entered in 1994 to account for 83.1 percent completeness. One more agency joined the direct reporting agencies in 1995 to bring the total to 2,808 possible months. There were 2,391 months entered in 1995 to increase to 85.1 percent completeness. The same number (2,808) of months was possible in 1996, but completeness decreased to 2,306 months entered or 82.1 percent. In 1997, the number of months possible was again 2,808 and completeness increased to 84.0 percent with 2,360 months entered. In 1998 some data was entered in 2,455 months, which raised completeness to 87.4 percent of the possible 2,808 months. Three agencies were deleted in 1999 and one was added to bring the total number of reporting agencies to 232 with 2, 784 possible months. Decreasing slightly, the months complete for 1999 was 86.4 percent. In 2000 the number of agencies stayed constant with 2, 784 possible months and 2,364 months entered for 84.9 percent. A total of 237 agencies or 2,844 months were possible in 2001 with 2,481 months entered or 87.2 percent complete. Five agencies were deleted in 2002 for a possible 2, 784 months for 232 agencies. In 2002, 2,467 agency months were entered for 88.6 percent complete. An additional agency was added in 2003 for a total of 233 agencies or 2, 796 months. Additionally, 2,445 months were entered for 87.4 percent complete in 2003 and 2004. In 2005, 2,473 agency months were entered for the 233 agencies or 88.4 percent complete. In 2006, 2,527 agency months were entered for the 233 agencies or 90.4 percent complete. In 2007, 2,458 agency months were entered for the 233 agencies or 87.9 percent complete. In 2008, one agency was added increasing the total number of agencies to 234 or 2,808 possible months worth of data. A total of 2,458 months worth of data was entered, which equates to the data being 87.5% complete. (This method does not account for completeness of the number of crimes entered per month.)

Another way that can be used to indicate completeness involves comparisons of completeness of populations for participating in a given year with the statewide total populations. Considering only agencies which reported in all 12 months in each year, 1991 data represents 54.6 percent of the state's population, 1992 data represents 60.8 percent of the state's population and the 1993 data represents 74.2 percent of the state's population. The 1994 data represents 72.1 percent of the state's populations while the corresponding figure for 1995 is 81.7 percent of the state's population and the 1996 figure is 70.9 percent. Increasing again in 1997, the data represents 79.9 percent of Iowa's population but dropped to 77.8 percent of Iowa's 1998 population. In 1999, the data represented 82.9 percent of the state's population but again dropped to 74.6 percent of the 2000 population and 75.5 percent of the 2001 population. The 2002 data increased markedly to 89.2 percent of the population, 2003 was 88.6 percent of the population but decreased in 2004 to represent 79.4 percent of the total population and 2005 to represent 78.5 percent of the population. The 2006 and 2007 data also increased markedly to 94.4% in 2006 and 94.2% of the population in 2007. In 2008, contributing agency represented 96.9% of the population. (This method does not account for small agencies that would truly have no crimes during a month or does not account for the completeness of the number of crimes entered per month in larger agencies).

APPENDIX B

Definitions of Crime Categories

"The following definitions are not meant to be used for charging persons with crimes. To the contrary, they are meant to be "receptacles" or "pigeonholes" for reporting crimes throughout the United States. State statutes must be very specific in defining crimes so that persons facing prosecution will know the exact charges being placed against them. On the other hand, the definitions used in NIBRS must be generic in order not to exclude varying state statutes relating to the same type of crime."
