Access to Obstetrical Care in Iowa: A Report to the Iowa State Legislature Calendar Year 2020

Introduction

This report has been prepared annually in response to a 1997 mandate that amended Iowa Code 135.11 (16) to require:

16. Consult with the Office of Statewide Clinical Education Programs at the University of Iowa Carver College of Medicine and annually submit a report to the general assembly by January 15 verifying the number of physicians in active practice in Iowa by county who are engaged in providing obstetrical care. To the extent data are readily available, the report shall include information concerning the number of deliveries per year by specialty and county, the age of physicians performing deliveries, and the number of current year graduates of the University of Iowa Carver College of Medicine and the Des Moines University College of Osteopathic Medicine entering into residency programs in obstetrics & gynecology, and family medicine. The report may include additional data relating to access to obstetrical services that may be available.

Report to the 2022 Legislature

The Iowa Department of Public Health (IDPH), Division of Health Promotion & Chronic Disease Prevention, Bureau of Family Health, respectfully submits this report in response to the legislative mandate. The data summarized in this report provides an overview of the obstetrical workforce in Iowa for calendar years 2016 through 2020.

This report uses birth certificate data to generate the number and percent of licensed providers who attended deliveries in our state. Health Department staff link birth certificate data to data from the [University of Iowa-Carver College of Medicine-Office of Statewide Clinical Education Programs](#) to obtain demographic and physician specialty information.

Definitions:

The categories of providers who attend deliveries and who are included in this report are defined as follows:

- An obstetrician/gynecologist physician has either an MD or DO degree and has completed a four-year obstetrics/gynecology residency. This specialty is devoted to medical and surgical care to women and has particular expertise in pregnancy, childbirth and disorders of the reproductive system.
- A family medicine physician has either an MD or DO degree and has completed a three-year family medicine residency. This specialty is devoted to comprehensive care for people of all ages. Often family medicine physicians do not perform surgical deliveries (cesarean sections.)
- Certified Nurse-Midwives CNMs are advanced practice nurses, registered both as nurses and as midwives. They have completed at least a baccalaureate program and a midwifery education program in addition to having passed a national certification examination to become licensed. In Iowa they have the ability to write prescriptions. CNMs tend to care for pregnant women at low risk for adverse maternal and newborn outcomes. Most have a physician back up if complications arise.

- A resident is a physician in training (one who holds the degree of MD or DO) who practices medicine usually in a hospital or clinic under the direct or indirect supervision of an attending physician.

National Data¹

- According to Rayburn² (2017), there were 4.5 obstetricians-gynecologists per 10,000 women of reproductive age (WRA)³ in the United States. In the same publication, Rayburn reported that there were 3.3 obstetricians-gynecologists per 10,000 WRA in Iowa.

2020 Iowa Population and Provider Information:

- 2020 estimated total Iowa population: 3,163,561⁴
- 2020 estimated Iowan WRA: 618,424³

Table 1. Rate of Physicians per 10,000 WRA, Iowa 2016-2020

Year	Physicians ⁵	Obstetricians-Gynecologists
2020	8.8	3.8
2019	9.6	4.0
2018	10.7	4.2
2017	10.5	4.1
2016	11.4	4.1

Table 2. Count of Unique Licensed Providers Who Delivered at Least One Infant, Iowa 2016-2020

	2016	2017	2018	2019	2020
Provider Type	Count of Providers				
<i>Obstetricians & Gynecologists</i>	245	244	252	243	232
<i>Family Medicine</i>	350	311	324	294	247
<i>Other Physicians</i>	76	66	59	53	66
<i>Residents⁶</i>	62	88	47	52	58
<i>CNM/ARNP</i>	79	76	91	90	83
<i>Total</i>	812	785	773	732	686

¹ The rates reported by the Rayburn report differ from those in this report because the report methods differ.

² Rayburn WF. *The Obstetrician-Gynecologist Workforce in the United States: Facts, Figures, and Implications, 2017*. The Office of Workforce Studies and Planning of the American Congress of Obstetricians and Gynecologists: Washington D.C.

³ Women of reproductive age are defined as women between the ages of 14 and 44.

⁴ U.S Census Bureau – accessed 11.19.21 via [IDPH Public Health Tracking Portal](#)

⁵ The total number of delivering physicians includes obstetricians, family medicine physicians and other types of physicians. This count excludes resident physicians.

⁶ Residents perform more deliveries than noted because frequently these deliveries are documented under the name of the supervising faculty physician

Table 3. Count and Percent of Births by Provider Type, Iowa 2016 -2020

<i>Year</i>	<i>2016</i>	<i>2017</i>	<i>2018</i>	<i>2019</i>	<i>2020</i>
<i>Provider Type</i>	Number (%)	Number (%)	Number (%)	Number (%)	Number (%)
<i>Obstetricians & Gynecologists</i>	26,909 (68.8)	26,552 (69.4)	26,117 (69.4)	26,213 (69.8)	25,762 (71.6)
<i>Family Medicine</i>	6,351 (16.3)	5,885 (15.4)	5,805 (15.4)	5,498 (14.6)	4,941 (13.7)
<i>***Other Physicians</i>	1,363 (3.5)	1,059 (2.8)	955 (2.5)	892 (2.4)	664 (1.9) ⁷
<i>Residents</i>	418 (1.1)	486 (1.3)	235 (0.6)	405 (1.1)	255 (0.7)
<i>CNM/ARNP</i>	3,691 (9.4)	3,923 (10.3)	4,109 (10.9)	4,095 (10.9)	3,853 (10.7)
<i>Unlicensed other⁸</i>	344 (0.9)	361 (0.9)	420 (1.1)	454 (1.2)	490 (1.4)
<i>Total</i>	39,076	38,266	37,641	37,577	35,965 ⁹

*** Other physicians include maternal/fetal medicine specialists, emergency room physicians, and general surgeons (who may perform cesarean sections for family medicine patients). Surgeons provided 78.3% (n=520) of the deliveries those categorized as “other physicians”.

Table 4. Demographic Information for Unique Licensed Providers Who Delivered at Least One Infant, Iowa 2020

<i>Provider Type</i>	<i>Provider Count</i>	<i>Avg. Age, Delivering Males</i>	<i>Avg. Age Delivering Females</i>	<i>% Delivery Providers, Male</i>	<i>% Delivery Providers, Female</i>
<i>Obstetricians & Gynecologists</i>	232	55.8	42.5	35.8	64.2
<i>Family Medicine</i>	247	44.7	39.0	53.0	47.0
<i>Other Physicians</i>	66	48.9	45.9	75.8	24.2

⁷ The number and percent of deliveries attended by “other physicians” has likely decreased due to improved data collection of provider specialty.

⁸ Unlicensed persons include lay midwives, registered nurses, EMT staff, and family members

⁹ n=1 missing provider type

Table 9: Occurrent Births by Hospital Level of Care, 2016-2020

	<i>2016</i>	<i>2017</i>	<i>2018</i>	<i>2019</i>	<i>2020</i>
<i>OB Level (# of hospitals)</i>	Number (%)	Number (%)	Number (%)	Number (%)	Number (%)
<i>++ Home births</i>	549 (1.4)	500 (1.3)	560 (1.5)	533 (1.4)	601 (1.7)
<i>Level 1 (35)</i>	9,625 (24.6)	9,134 (23.9)	8,487 (22.6)	8,964 (23.9)	8,595 (23.9)
<i>Level 2 (12)</i>	8,988 (23.0)	9,058 (23.7)	8,932 (23.7)	8,829 (23.5)	8,304 (23.1)
<i>Level 2 Regional (4)</i>	5,111 (13.1)	4,843 (12.7)	4,833 (12.8)	4,754 (12.7)	4,481 (12.5)
<i>Level 2 Regional Neonatal (2)</i>	4,333 (11.1)	4,207 (11.0)	4,275 (11.4)	4,336 (11.6)	4,168 (11.6)
<i>Level 3 (3)</i>	10,488 (26.8)	10,542 (27.5)	10,554 (28.0)	10,141 (27.0)	9,814 (27.3)
<i>Total</i>	39,094	38,284	37,641	37,557	35,963 ¹⁴

++ Home births are primarily attended by lay midwives and family members. Specifically, 72.2% (n=434) of home births were attended by unlicensed persons followed by ARNPs (22.3%; n=133), Family Medicine physicians (3.0%; n=18) and OBGYN physicians (1.7%; n=10). The remaining provider types were each less than 1% of home births.

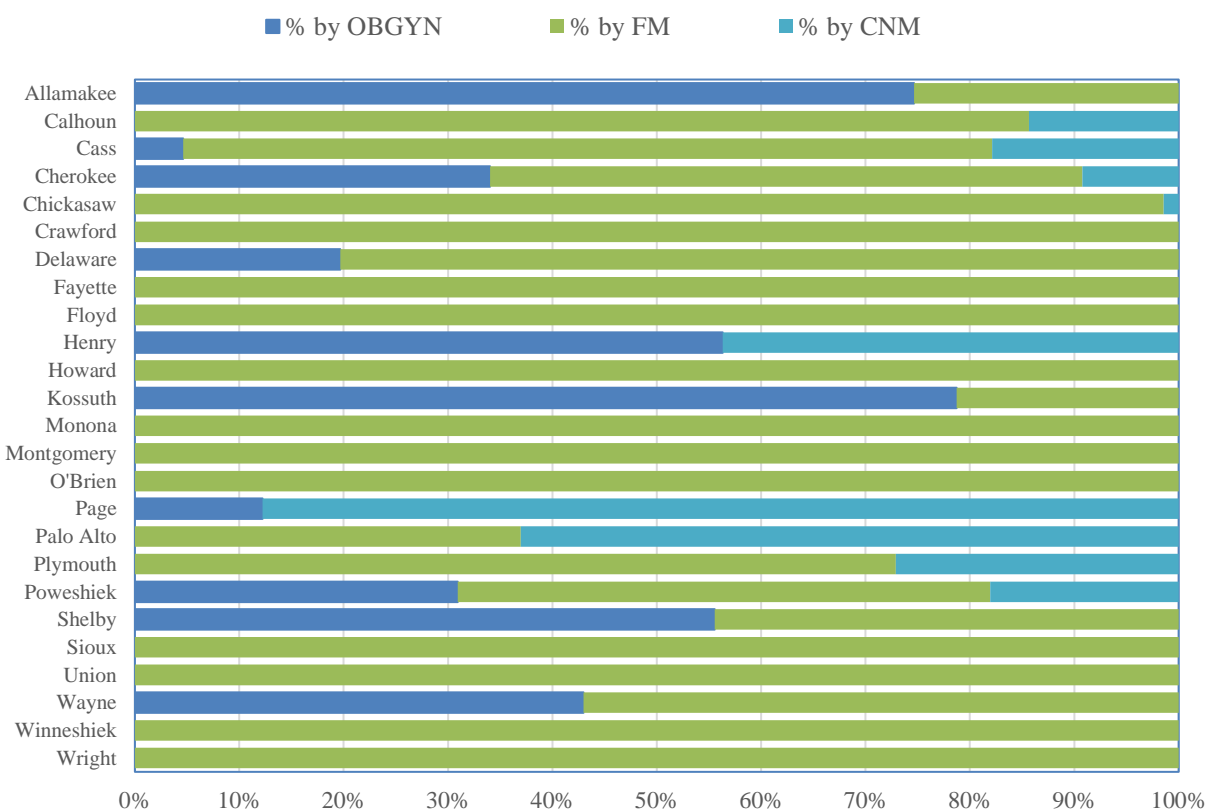

¹³ Data source: University of Iowa Graduate Medical Education Program

¹⁴ n=3 missing facility

Geographic variability of provider type: Three provider types, Obstetrics & Gynecology physicians (OBGYN), Family Medicine physicians (FM), and Certified Nurse Midwives (CNM) attended 96% of Iowa’s occurrent deliveries in 2020. At the state level, and based on these provider types 74.6% of deliveries were attended by OBGYN physicians, 14.3% by FM physicians, and 11.2% by CNMs. Based on county level of rurality, there is considerable variation in attendants by provider type. County levels of rurality (rural, micropolitan, metropolitan) are based on census determined metropolitan statistical areas (MSA)¹⁵ and are presented as a map in Figure 4.

Figures 1 through 3 illustrate provider type variability by rural, micropolitan, and metropolitan statistical areas.

Figure 1: In rural counties, 16.4% of deliveries are attended by OBGYN physicians, 72.3% by FM physicians, and 11.3% by CNMs.

¹⁵ <https://www.iowadatatcenter.org/aboutdata/statisticalareas> (State Library of Iowa accessed 11.16.21)

Figure 2: In micropolitan counties, 55.3% of births are attended by OBGYN physicians, 42.1% by FM physicians, and 2.6% by CNMs.

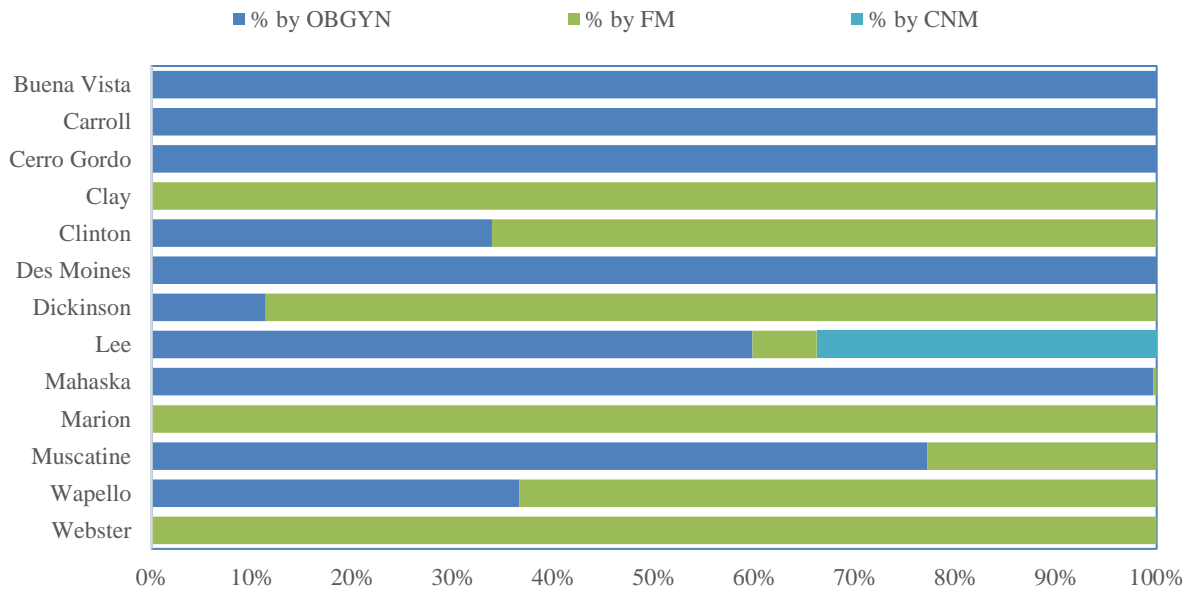

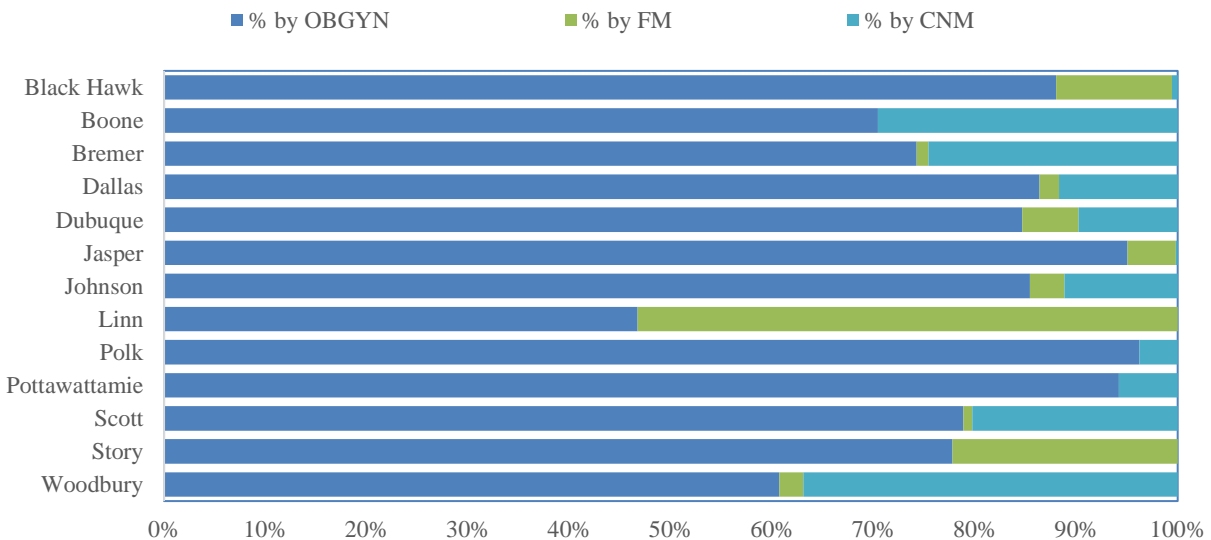

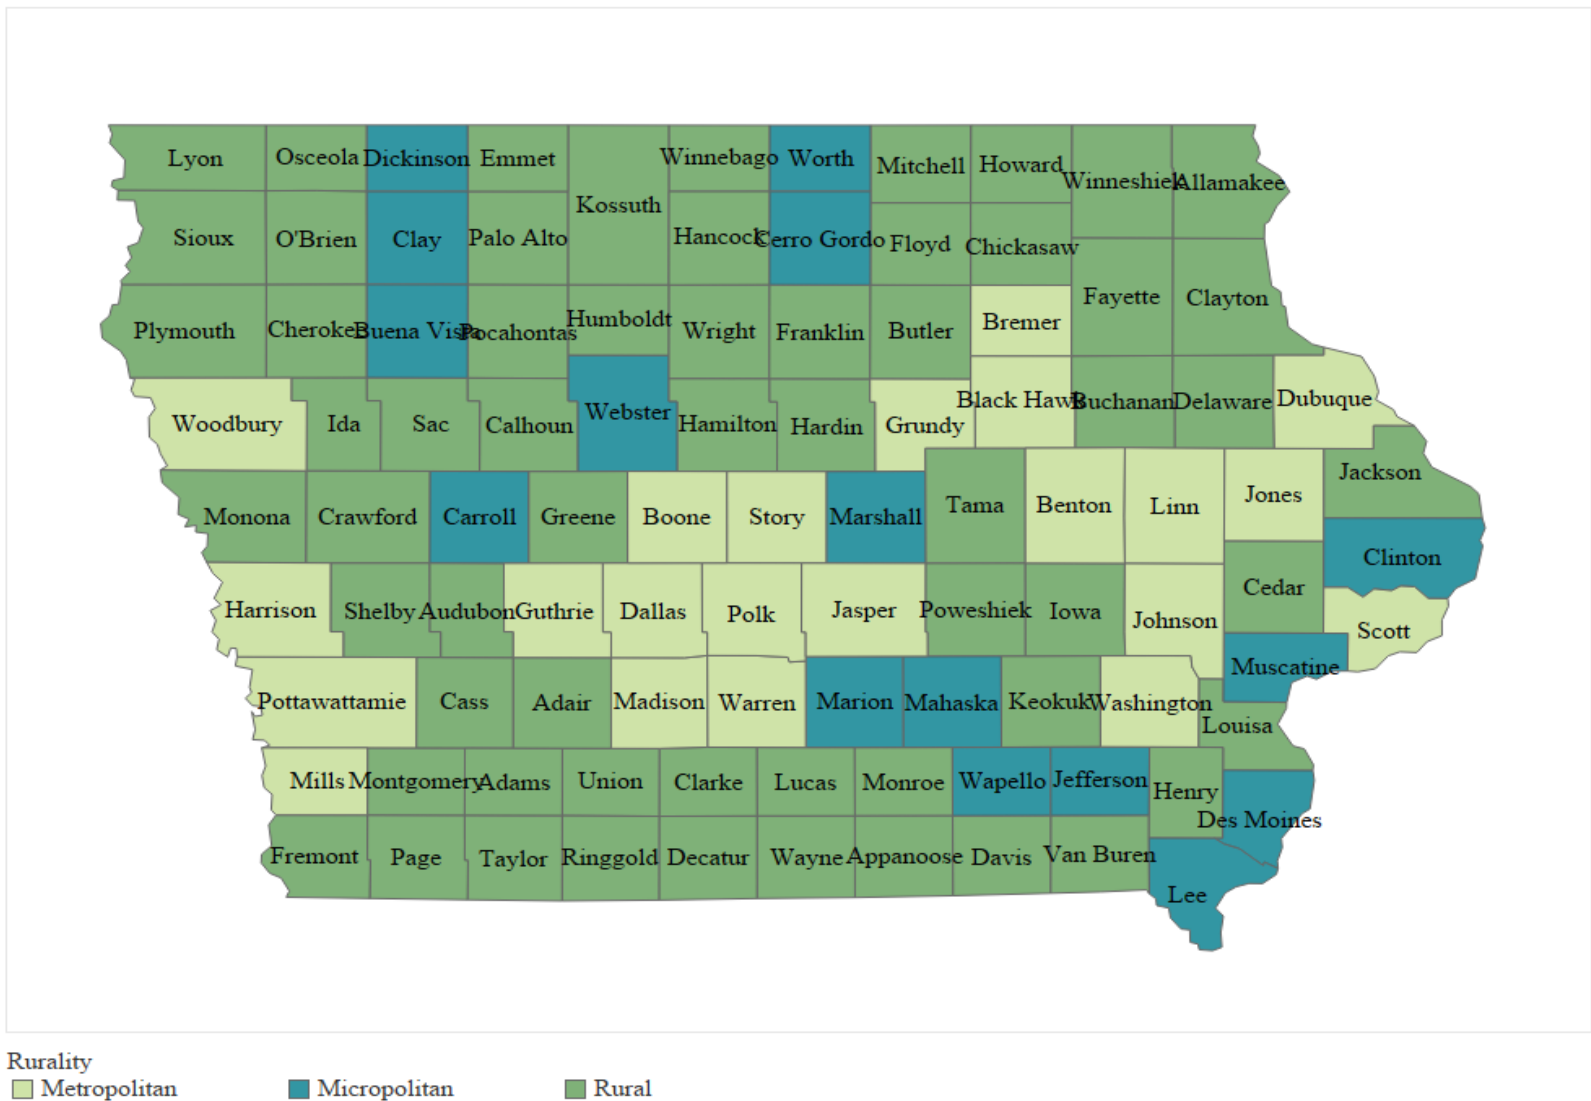

Figure 3: In metropolitan counties, 79.9% of births are attended by OBGYN physicians, 8.2% by FM physicians, and 11.9% by CNMs.

See Appendix A for the count and percent of deliveries by the top three provider types, by county, MSA, and by OB Unit availability.

See Appendix B for maps that present county level OB Unit availability and the percent of deliveries by the top three provider types and county level OB Unit availability.
