Executive Summary

The Iowa Insurance Division requested open and closed claim data for calendar year 2009 from licensed insurance companies pursuant to Iowa Code Section 505.27. Licensed companies who wrote medical malpractice insurance in Iowa during the period from January 1, 2009, through December 31, 2009, were asked to provide specific data for claims closed during that period and separately those remaining open at the end of the year.

Data was reviewed for consistency within and between companies, and for completeness and reasonableness. The accuracy of the report depends on the accuracy of the data obtained from the companies.

The report provides a portrayal of Iowa's medical malpractice insurance market. Average payments of benefits plus allocated loss adjustment expenses for all closed claims were about \$128,000. An increase in average benefits paid for one of the companies that reported was a primary reason for the large increase in average payments of benefits plus allocated loss adjustment expenses from last year to this year. The average incurred losses and allocated loss adjustment expenses for all open claims were about \$143,000. Of the specialty providers listed, Hospitals and Clinics or Corporations had the most number of claims reported in both the open and closed claim reports. Of closed claims provider specialty categories with 20 or more claims, Obstetrics or Gynecology had the highest average benefits and allocated loss adjustment expenses paid. Of open claims categories with 20 or more claims, Family Practice and Obstetrics or Gynecology had the highest average incurred losses and allocated loss adjustment expenses.

For closed and open claims, Failure to Diagnose/Monitor/Treat and Treatment Related Cause produced more claims than any other listed alleged cause of loss. For categories with at least 20 claims, the costliest closed claims on average were for Delay in Diagnosis claims and the open claims with the highest average incurred losses and loss adjustment expenses were from the Pregnancy or Birth Related Problems and the Delay in Diagnosis categories.

For closed claims, most were Death and Permanent - Major claims, with the costliest claims on average being for Permanent - Major. For open claims, most were Death and Permanent - Minor claims, with the highest average incurred losses and allocated loss adjustment expenses being for Grave. Average paid losses and expenses for closed claims by category ranged from less than \$9,000 to more than \$407,000. Average incurred amounts including reserves for allocated loss adjustment expenses ranged from about \$28,000 to more than \$788,000.

Minor rounding differences may exist, however no adjustments were made to the amounts reported.

The Division recommends that we evaluate the NAIC model law and review the guidelines for implementation of Medical Professional Liability Closed Claim Reporting to determine whether the model law should be adopted in Iowa. If the model law is adopted in Iowa it would help produce data that is comparable with other states that have adopted the model law and would provide companies with consistent reporting requirements for states that have adopted the model law. However, Iowa law still requires the reporting of open claims and closed claims data, thus creating dual reporting requirements should the NAIC model be adopted in Iowa.

Statutory language requests that carriers report the total amounts paid within six months after final disposition of the claims. In the four years of collecting this information only a few companies have data to report and it provides no information about the overall market. Therefore, the Division recommends considering elimination of the requirement to report these amounts paid.

Introduction

Pursuant to Iowa Code Section 505.27, the Iowa Insurance Division requested insurance companies report medical malpractice claim data for calendar year 2009.

Licensed insurers who wrote medical malpractice insurance in Iowa during 2009, were asked to provide data separately for any claims that closed during the year and any claims that were open at the end of the year.

Data Request

The Division requested that companies submit data for each *claim* or *lawsuit*.

Claims were defined as formal or written demands for compensation under a medical malpractice insurance policy relating to allegations of liability on the part of one or more providers for any act, error, or omission in the rendering of, or failure to render medical services for medically related injuries.

A *lawsuit* was defined as a complaint filed in any court in Iowa alleging liability on the part of one or more providers for any act, error, or omission in the rendering of, or failure to render medical services for medically related injuries.

Only direct business was to be included in the report. Adjustments for subrogation were to be made. Claims were to be reported separately for each insured associated with a claim; for each injured party associated with an incident; for each claimant that filed a claim for the same injury; and for each policy if filed under more than one policy. Reopened claims were to be reported considering only their final disposition date.

A copy of the data request is included at the end of this report.

Companies

Licensed insurers who wrote medical malpractice insurance in Iowa during 2009, were required to provide data for claims that closed during the year or that were open at the end of the year. These insurers represented 72.2% of the medical malpractice market in Iowa as determined by their percentage of calendar year 2009 direct written premiums. Non licensed companies accounted for 24.5% of the market and surplus lines companies accounted for 3.3% of the market.

Page 7 shows a history of the market shares for companies that wrote medical malpractice business in 2009. The market shares were determined by dividing the company's written premium for the year by the total written premium for all companies in that year.

The companies writing medical malpractice insurance in Iowa have changed from year to year. New companies start writing, others cease writing the business. From 2008 to 2009 3 companies (1 licensed) that didn't report written premium or reported \$0 in written premium in 2008 had positive written premium in 2009. Also 4 companies (1 licensed) that reported positive written premium in 2008 did not report written premium or reported \$0 in written premium in 2009. The premium volume that each company wrote also changed dramatically for some companies from year to year. Most of the business is written by a few companies, but even those companies have changed year to year and the market share written has shifted.

All of the companies required to comply with the data request responded either by providing the claims data or by stating that they had no applicable claims to report.

Data

All responses received were reviewed for consistency with the data request. Data elements were reviewed for completeness, reasonableness, and consistency with other data elements.

In cases where a company did not use the provided categories to identify claims, if a category could be reasonably assigned, that was done. Otherwise, the claim was listed in the Other/Unknown category. Any categories with less than five claims were combined and reported in total.

On the Benefits and Expenses by Company exhibits, companies with fewer than five claims were reported as a group. Page 25 shows the companies combined for the closed claim exhibits and for the open claim exhibits.

There were 11 claims that closed with total loss and allocated loss adjustment expenses above one million dollars and 13 open claims with incurred amounts of one million dollars or more. All but two of those claims were between \$1,000,000 and \$2,000,000.

Limitations

The accuracy of this report depends on the accuracy of the data provided by the companies. The Division reviewed the data for completeness, reasonableness, consistency with other data elements, and consistency with the data request. No adjustments were made to the data other than the assigning of categories to identify claims where a company did not use the provided categories but one could be reasonably assigned.

Although attempts were made to gather uniform data from all companies, complete uniformity is not possible. Some companies did not maintain records of all the data as requested. Some used company specific definitions that could not be manipulated to completely match the requested categories. Companies may have interpreted data elements differently from each other. Company practices, such as the timing of considering an incident an open claim or of closing a claim may differ by company.

Medical malpractice insurance is available for individuals and for a variety of institutions, including hospitals, clinics, and nursing homes. Insurance companies often specialize in what medical malpractice insurance they write. Differences in data between specialties or types of policyholders may be a result of or compounded by the companies writing the business.

Other factors internal to a company writing the business that affect the results of the study include, but are not limited to, the type of policies written, the limits of insurance requested by policyholders, the size of deductibles, company underwriting considerations and claim practices. Factors external to the company may also affect the report. These may include, but are not limited to, regulation, the legal environment, the general economy, and medical inflation. The report makes no adjustments for and does not attempt to analyze changes in economic conditions, exposures, medical practices, legal climate, rate levels, or medical inflation.

The companies writing medical malpractice insurance in Iowa and the premium volume that each company wrote have changed from year to year. This can have a significant effect on any analysis. No adjustments to the data have been made to reflect shifting business.

The report provides a snapshot of Iowa's medical malpractice insurance market. It includes claims from 2009 and earlier which either were closed in 2009 or remained open at the end of the year for those companies that responded to the data request. Since medical malpractice claims can take years to be reported and closed, the claims closed in a year and open at the end of the year do not correspond to premiums for that year.

Large losses are not individually identified in the report. They are included in the totals and averages.

Aggregate Claim Reports by Specialty of Provider

Companies were asked to classify each claim reported by a number of typical provider specialties. All claims in each category were totaled, separately for the open and the closed reports, and averaged by dividing the total dollar amounts by the number of claims. To maintain confidentiality of individual claims, any categories with fewer than five claims were grouped in the Other/Unknown category.

Average payments of benefits plus allocated loss adjustment expenses for all closed claims were about \$128,000. The average incurred losses and allocated loss adjustment expenses for all open claims were about \$143,000. The claims underlying these amounts are not comparable since the open claims represent all those open during calendar year 2009, without regard to when the injury occurred or the claim was reported. The closed claims include all claims closed in 2009, regardless of the date of injury or the date reported. The mix of claims, by type, severity, size, will not be the same for the open and closed reports.

Hospitals and Clinics or Corporations had the most number of claims reported in both the open and closed claim reports. Of closed claims provider specialty categories with 20 or more claims, Obstetrics or Gynecology had the highest average benefits and allocated loss adjustment expenses paid. Of open claims categories with 20 or more claims, Family Practice and Obstetrics or Gynecology had the highest average incurred losses and allocated loss adjustment expenses.

Aggregate Claim Reports by Nature of Claim

Companies were asked to classify each claim reported by a number of alleged cause of loss descriptions. Most companies used the provided descriptions to categorize the claims. For those claims that were not assigned to one of the listed cause of loss descriptions, one was assigned if it reasonably fit the description provided by the company. Otherwise the claim was listed in the Other/Unknown category.

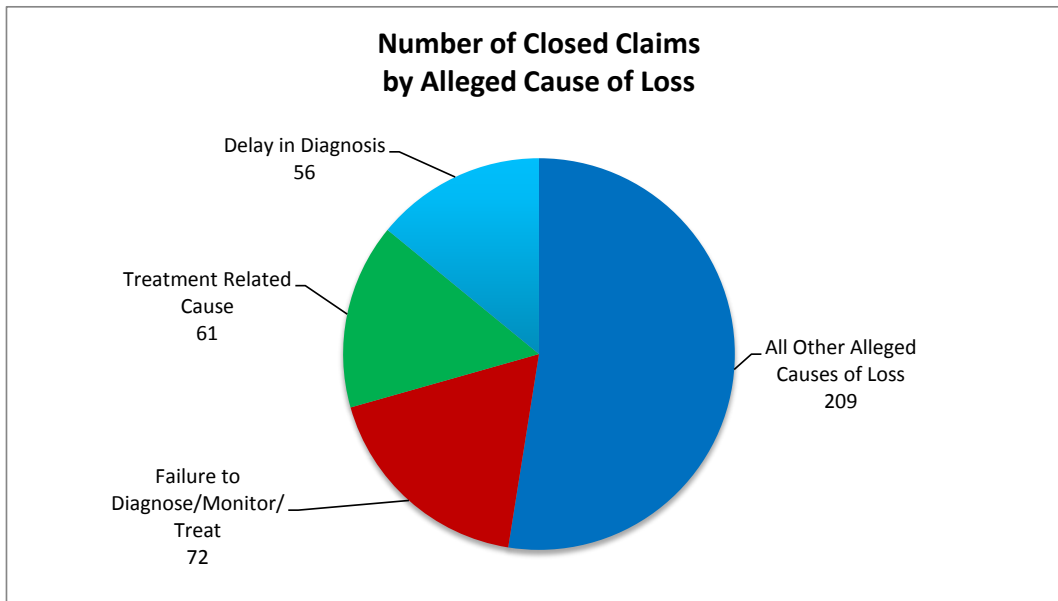

All claims in each category were totaled, separately for the open and the closed reports, and averaged by dividing the total dollar amounts by the number of claims. To maintain confidentiality of individual claims, any categories with fewer than five claims were grouped in the Other/Unknown category.

For closed claims, Failure to Diagnose/Monitor/Treat and Treatment Related Cause produced the most claims, with the costliest claims on average being for Delay in Diagnosis claims.

Most open claims were also from Failure to Diagnose/Monitor/Treat and Treatment Related Cause. The claims with the highest average incurred losses and allocated loss adjustment expenses were from the Pregnancy or Birth Related Problems and the Delay in Diagnosis categories.

Aggregate Claim Reports by Substance of Claim

Companies were asked to classify each claim by the following severity of injury types.

- Emotional Only (e.g. fright, no physical damage)
- Temporary - Insignificant (e.g. lacerations, contusions, minor scars, rash; no delay)
- Temporary - Minor (e.g. infections, misset fracture, fall in hospital; recovery delayed)
- Temporary - Major (e.g. surgical material left, drug side effect, brain damage; recovery delayed)
- Permanent - Minor (e.g. loss of fingers, loss or damage to organs; includes non-disabling injuries)
- Permanent - Significant (e.g. deafness, loss of limb, loss of eye, loss of one kidney or lung)
- Permanent - Major (e.g. paraplegia, blindness, loss of two limbs, brain damage)
- Grave (e.g. quadriplegia, severe brain damage, lifelong care or fatal prognosis)
- Death

For closed claims, most were Death and Permanent - Major claims, with the costliest claims on average being for Permanent - Major. For open claims, most were Death and Permanent - Minor claims, with the highest average incurred losses and allocated loss adjustment expenses being for Grave. Average paid losses and expenses for closed claims by category ranged from less than \$9,000 to more than \$407,000. Average incurred amounts including reserves for allocated loss adjustment expenses ranged from about \$28,000 to more than \$788,000.

Closed and Open Claim Reports by Company

The following summaries provide data by company for closed and open claims.

As described earlier in the report, in cases where a company did not use the categories provided in the data call to identify claims, if a category could be reasonably assigned, that was done. Otherwise, the claim was listed in the Other/Unknown category. Midwest Medical Insurance Company provided additional specialties that were included within this section, but not in the Aggregate Claim Reports by Specialty of Provider section. Any categories with less than five claims were combined and reported in total for the company.

Companies with fewer than five claims in total were reported as a group. Below are the grouped companies for the closed claim exhibits and for the open claim exhibits.

Companies Grouped for Closed Claim Report

ACE American Insurance Company
Cincinnati Insurance Company, The
COPIC Insurance Company
Fireman's Fund Insurance Company
Podiatry Insurance Company of America
Preferred Professional Insurance Company
Zurich American Insurance Company

Companies Grouped for Open Claim Report

Church Mutual Insurance Company
COPIC Insurance Company
Darwin National Assurance Company
Fireman's Fund Insurance Company
ISMIE Mutual Insurance Company

CHESTER J. CULVER
GOVERNOR

SUSAN E. VOSS
COMMISSIONER OF INSURANCE

PATTY JUDGE
LT. GOVERNOR

DATE: March 12, 2010
FROM: Iowa Insurance Division
TO: All Admitted Insurance Companies Writing Medical Malpractice Insurance in Iowa

ANNUAL REPORT

LINE(S) OF BUSINESS: Medical Malpractice Insurance per Line #11 of the Annual Statement.

REPORTING COMPANIES: All companies licensed by the Iowa Insurance Division to write the line(s) of business noted above, with direct written premiums on or after January 1, 2009 through December 31, 2009.

DATA REQUESTED: Regarding *closed claims* and *open claims*.

DUE DATE: June 1, 2010

IID CONTACT PERSON: Karen Armstrong karen.armstrong@iid.iowa.gov

GENERAL INSTRUCTIONS

The following pages provide detailed directions for completing the report. The report must be submitted in the format provided. Record layout and formatting instructions will be found on subsequent pages. The report should consist of two EXCEL spreadsheets, one for closed claims and one for open claims, and the contact information sheet. The report should be submitted via e-mail to Karen Armstrong at medmal@iid.iowa.gov by June 1, 2010.

MEDICAL MALPRACTICE INSURANCE CLOSED AND OPEN CLAIM REPORT REPORT INSTRUCTIONS/SPECIFICATIONS

1. Please provide data for all medical malpractice insurance claims and lawsuits closed or disposed of on or after January 1, 2009 through December 31, 2009. Also provide data for all medical malpractice insurance claims and lawsuits open as of December 31, 2009.
 2. A claim for the purpose of this report is a formal or written demand for compensation under a medical malpractice insurance policy relating to allegations of liability on the part of one or more providers for any act, error, or omission in the rendering of, or failure to render medical services for medically related injuries.
 3. A lawsuit for the purpose of this report is a complaint filed in any court in this state alleging liability on the part of one or more providers for any act, error, or omission in the rendering of, or failure to render medical services for medically related injuries.
 4. If more than one insured is associated with an incident, report separately for each insured.
 5. If more than one injured party is associated with an incident, report separately for each injured party.
 6. If a claimant filed claims for the same injury under more than one policy, report separately for each policy.
 7. Include only direct business.
 8. If a claim has been reopened, but had not yet closed as of December 31, 2009, report this only within the open claims report.
 9. If a claim was reopened and then closed within the period from January 1, 2009 through December 31, 2009, only include in the closed claims report.
 10. Submit information for each closed claim, whether closed with or without payment.
 11. Submit information for each open claim, whether a reserve amount has been established or not.
-

MEDICAL MALPRACTICE INSURANCE CLOSED AND OPEN CLAIM REPORT ELECTRONIC REPORTING INSTRUCTIONS

1. Please provide data in an EXCEL spreadsheet in accordance with the attached open and closed record layouts.
2. Please provide a separate spreadsheet for the closed claims report and a separate spreadsheet for the open claims report.
3. Companies within a group may report as a group rather than submitting separate reports for each company.
4. Each claim should be reported on one row within the appropriate spreadsheet, either the open claims spreadsheet or the closed claims spreadsheet.
5. Provide a separate document with the additional codes to explain the specified column when the date provided includes more codes than the closed and open layouts.
6. Data must be entered in the spreadsheets according to the definitions and report layout provided. To be accepted data must be entered in date format as MM/DD/YYYY for dates; numeric format for dollar amounts, numbers, and any designated codes; and alpha-numeric format for other entries. For any columns were %Other+is chosen, enter in alpha-numeric format. Do not use formulas in the cells.
7. Please submit your completed EXCEL spreadsheets and a copy of the Contact Information sheet via e-mail to Karen Armstrong at medmal@iid.iowa.gov. The EXCEL spreadsheets may be zipped using the WinZip program if the file is too large for e-mail.
8. The report is due June 1, 2010.
9. If you have any questions, feel free to e-mail or call either Karen Armstrong at karen.armstrong@iid.iowa.gov, 515-281-4450 or Ramona Lee at ramona.lee@iid.iowa.gov, 515-281-4095.

DEFINITIONS

Admitted Insurance Company . An insurer who has been licensed by the insurance division within the state to write specific lines of business.

Allocated Loss Adjustment Expenses . Expenses attributable to a particular claim (direct defense and cost containment expenses).

Calendar Year . January 1 through December 31.

Claim . A formal or written demand for compensation under a medical malpractice insurance policy relating to allegations of liability on the part of one or more providers for any act, error, or omission in the rendering of, or failure to render medical services for medically related injuries.

Closed Claim . A claim for which no further action is expected; final payment if any has been made. Report all claims closed within the reporting period regardless the date they were reported to the company.

Deductible . An amount of money set within a policy that must be paid by an insured before the insurer is liable for any payments.

Direct Business . Policies written by an insurer without consideration of reinsurance.

Loss Reserve . The liability established to pay for a claim.

Paid Losses (Indemnity Payment) . Losses, but not expenses, paid to a claimant to close a claim.

Lawsuit . A complaint filed in any court in Iowa alleging liability on the part of one or more providers for any act, error, or omission in the rendering of, or failure to render medical services for medically related injuries.

Limit of Insurance . The maximum amount an insurer will pay as set forth in a contract of insurance.

Open Claim . A claim for which further action is expected; the final payment has not been completed. Report all claims opened at the end of the calendar year regardless the date they were filed.

Reinsurance . Insurance coverage for the risks covered by other insurance companies.

Reopened Claim . A claim that had been closed, but for some reason, needs further action or payment.

Reserves . The liability set up to pay for a claim when the claim is ultimately closed. Reserves may be established for potential loss payments and allocated loss adjustment expenses separately or combined.

Reserves for Payment of Claims Incurred and Reported but not Disposed . The liability set up to pay for a claim when the claim is ultimately closed. Report reserves on all open claims during the calendar year that continue to be open at year-end.

Self-Insurance . A program in which an individual or entity assumes all or a portion of the risk for its medical malpractice claims.

Subrogation . Reimbursement by a party responsible for a payment to another party that had paid the amount.

ALLEGED INJURY

Please classify each claim by the following severity of injury types.

- Emotional Only (e.g. fright, no physical damage)
- Temporary . Insignificant (e.g. lacerations, contusions, minor scars, rash; no delay)
- Temporary . Minor (e.g. infections, fracture, fall in hospital; recovery delayed)
- Temporary . Major (e.g. surgical material left, drug side effect, brain damage; recovery delayed)
- Permanent . Minor (e.g. loss of fingers, loss or damage to organs; includes non-disabling injuries)
- Permanent . Significant (e.g. deafness, loss of limb, loss of eye, loss of one kidney or lung)
- Permanent . Major (e.g. paraplegia, blindness, loss of two limbs, brain damage)
- Grave (e.g. quadriplegia, severe brain damage, lifelong care or fatal prognosis)
- Death
- Other / Unknown (e.g. injury was not apart of the list above, data was not captured or maintained)
