INTERAGENCY COOPERATION PLAN
ANNUAL REPORT

Action Requested: In compliance with Iowa Code 262.9B, receive the annual report for the year ended June 30, 2013 on cooperative purchasing efforts between the Board of Regents and its institutions, the Department of Administrative Services, the Chief Information Officer of the State, and other state agencies.

Executive Summary: Now incorporated in Iowa Code 262.9B, the Reorganization Bill Senate File 2088 enrolled during the 2010 Legislative Session directs the Board of Regents and the institutions under its control to coordinate interagency cooperation with state agencies with the goal of annually increasing the amount of joint purchasing. Engaging the Department of Administrative Services (DAS), the Chief Information Officer of the State, and other state agencies authorized to purchase goods and services, Regent institutions are to pursue mutually beneficial activities relating to purchasing items and acquiring information technology.

The legislation states that the Board of Regents and Regent institutions shall assist the Department of Administrative Services in:

- Identifying best practices that produce cost savings and improve state government processes.
- Exploring joint purchases of general use items that result in mutual procurement of quality goods and services at the lowest reasonable cost.
- Exploring flexibility, administrative relief, and transformational changes through procurement technology.

The Regents are to convene at least quarterly an interagency purchasing and information technology group. The Board Office shall, before July 1 of each year, prepare a cooperative purchasing plan that identifies specific areas of cooperation between the Regent institutions and the Department of Administrative Services for the next fiscal year.

On or before November 1, the Board of Regents shall submit a report to the General Assembly and the Governor providing information on the cooperative purchasing plan, the results of quarterly interagency meetings and any specific cost savings or efficiency gains that resulted.

This report contains the accomplishments of interagency meetings for the year ended June 30, 2013.

Background:

The participating state agencies have followed the following set of guiding principles:

- Collaboration efforts must maintain or improve the quality and effectiveness of each participant.
- Collaborations should not introduce complexities or risks to infrastructure, business processes, or end-user experiences.
- No participant should pay more for a service or product than they could otherwise obtain on their own.
- Collaborations should occur where they make sense. Given the differing missions of the participants, some projects may not involve all institutions or state agencies.

Interagency meetings were held on a regular basis with representatives of the three public universities, Board of Regents staff, DAS, Department of Transportation (DOT), Iowa Prison Industries (IPI), and Iowa Communications Network (ICN) on:

- August 22, 2012 – at University of Iowa
- November 30, 2012 – at the Department of Administrative Services, Des Moines
- February 20, 2013 – at Department of Transportation, Ames
- May 31, 2013 – Telephonic

Using best practices in collaborative purchasing, and recognizing the unique purchasing environment in which each agency operates, Regent institutions and state agencies continued to jointly-bid purchasing contracts and search for new areas for collaboration. The approach of pursuing development of master contracts was not used if the resultant master purchasing agreement would cause pricing to increase for one or more purchasing entities, unless those entities could opt out of the contract without penalty and loss of existing contract pricing.

Regent universities have a long history of cooperative contracting efforts that began in 1989. Joint Regent contracting became a focused priority in 1992 at the Board's direction; since then purchases through joint contracting efforts have grown rapidly. In FY 2013, combined Regent contract spend through joint contracting totaled \$369 million, an increase of 6% over the previous year, and a growth of more than 166% from ten years ago.

Results for FY 2013 are still being compiled. Reviewing the results for FY 2012, in the last five years, Regent purchases from Department of Administrative Services' state contracts have increased 66% to over \$16 million per year; Regent purchases from Iowa Prison Industries were over \$3.5 million.

Tables of joint purchasing efforts are found on the following pages.

Additional Information:

Cooperative Technology Efforts –

The Regent institutions and DAS explored areas concerning information technology as follows:

ProTrav – SUI Procurement and Travel System Implementation at UNI. ProTrav is an SUI internally-developed application designed to manage procurement card and travel expenses. SUI and UNI have a signed Memorandum of Agreement and the project was kicked off in March 2013 with a proposed implementation in FY15.

Cyber Security – A joint Regents/DAS group meets quarterly to discuss security standards to minimize the number of successful cyber-attacks. This collaboration reviews standards, discusses lessons learned and explores the possibility of sharing technologies.

Regents Database – Designed by SUI, a database was developed for use by SUI, ISU, UNI and the Board Office to track legislative requests for information, legislative studies and bills in a timely and effective manner. Modifications are made annually.

Data Offsite for Disaster Recovery – UNI has located data servers in ISU's data center as an off-site location for critical data for disaster recovery purposes. This strategy provides physical separation of backup data without a need to lease commercial facilities and provides savings. UNI is also reviewing space needs with SUI. Costs run approximately \$10,000 per rack; a private data center would cost closer to \$30-\$40,000 per year.

Purchasing Efforts –

International Liability Insurance

The University of Iowa has issued a proposal for International Liability Insurance coverage which provides the universities with an insurance broker that was previously not in place. The selected broker may be requested to provide potential insurance which includes but is not limited to: General Liability, Property and Workers Compensation Insurance for international exposures. This proposed contract will allow the universities to have a broker that can identify and recommend procedures for their international needs. Currently SUI and UNI are interested in this service. The contract has not yet been awarded, and will be reviewed fully once potential cost is known.

Developing Best Practices – The Regent universities and state agencies have been discussing common contract language and terms to improve vendor communications. Common bid language has been worked on in the past as part of the Iowa Biotech Association's Office Supplies request for proposal and these terms have been used on other bids to minimize the time spent developing a joint bid process. Universities also worked with the state and the Attorney General's office to develop a set of terms for use when DAS and DOT are part of the bid process.

Plans are underway to bring procurement team members from the universities together to discuss topics of interest and align best practices; also under discussion is a purchasing agent exchange at the universities to share knowledge on specific areas of expertise.

Procurement Card Program – The consortium contract was developed in 2011 through a joint Regents effort. An amendment to the existing contract developed by SUI, working with US Bank, was instrumental in extending the program to DAS and others. The program continues to grow in membership. The following agencies have been added this past year: Bettendorf Community School District, Council Bluffs Community School District, Des Moines Area Community College, Iowa Association of School Boards, and Newton Community College. The aggregate spend has grown from \$108M to \$168M, or 56% in three years.

SUI along with ISU, UNI and DAS has reviewed an offer for a 5 year extension that will increase rebate revenue by \$425,000 the first year and a potential of \$225,000 each subsequent year.

Copier and Printing Paper – The University of Iowa issued an RFP for a contract for truck load copier paper as well as various paper products for printing operations. Initially the contract included only SUI, ISU, UNI and DOT. IPI has subsequently inquired and is interested in potentially utilizing the award for their printing operations. The contract has not yet been awarded and will be reviewed fully once potential cost is known.
