Annual Report to the Iowa Governor and to the Iowa Legislature

Introduction

This report was prepared by NovaRest Consulting for the Iowa Insurance Division (Division). We understand that the Division will use the information in this report as the basis of the annual report for the governor of Iowa and for the Iowa legislature. The annual report, required by statute (Iowa Code §505.18), provides findings regarding health spending costs for health insurance plans in Iowa for the previous fiscal year.

The purpose of the annual report is to increase health care insurance transparency and provide consumers with the information necessary, and the incentive, to choose health plans based on cost and quality. Reliable cost and quality information about health care insurance empowers consumer choice, which incentivizes and motivates the entire health care delivery system to provide better care and benefits at a lower cost. It is the purpose of this report to aid in making information regarding the costs of health care insurance readily available to consumers.

This report is intended to provide information in a form that can be used in the annual report to the governor of Iowa and the Iowa legislature.

This report uses information gathered from the top 95% of health insurers by premium in Iowa through a data request from the Iowa Insurance Division. Our goal is to ensure that we have the most accurate and complete information possible. We have noted all situations when the data request information was not complete. Additional information was extracted from statutory annual financial statement information filed with the National Association of Insurance Commissioners ("NAIC").

Since the carriers that fall in the top 95% can change every year, some carriers surveyed in 2015 do not have data in earlier years and some carriers included in earlier years do not have data in 2015.

The following companies were included in the 2015 data call based on their health care premium market share in Iowa in 2014:

- Coventry Health & Life Insurance Co.¹
- Coventry Health Care of Iowa, Inc.
- Federated Mutual Insurance Co.²
- Golden Rule Insurance Co.
- Medical Associates Health Plan, Inc.
- Time Insurance Co.³
- United Healthcare Insurance Co.
- United Healthcare Plan of the River Valley
- Wellmark Health Plan of Iowa, Inc.
- Wellmark, Inc.

Summary

As the following graph shows, the health insurance market in Iowa is dominated by Wellmark, Inc. (54% to 69% of the three markets – individual, small group and large group). Therefore, the weighted averages for loss ratios⁴ and rate increases provided in this report will fall very close to the Wellmark, Inc. values, even though there are significant differences between companies. These weighted averages were weighted by member months⁵, which results in an average closer to what most members are experiencing as rate increases in their premiums. Taking the rate increases as an example, the weighted average will result in the same value as if a surveyor totaled and averaged the rate increases across all members in Iowa. By averaging across members rather than carriers we will attain a better estimate of the rate increases experienced by the population in Iowa.

We have provided charts of member months to demonstrate the large variance in members per carrier in Iowa. The key for each graph is in descending order of total member months. A complete set of data can be found in *Appendix A*.

¹ Coventry Health & Life Insurance Company left the individual market in 2012. This may cause some inconsistencies with the 2012 report because historical values will not include Coventry Life and Health information.

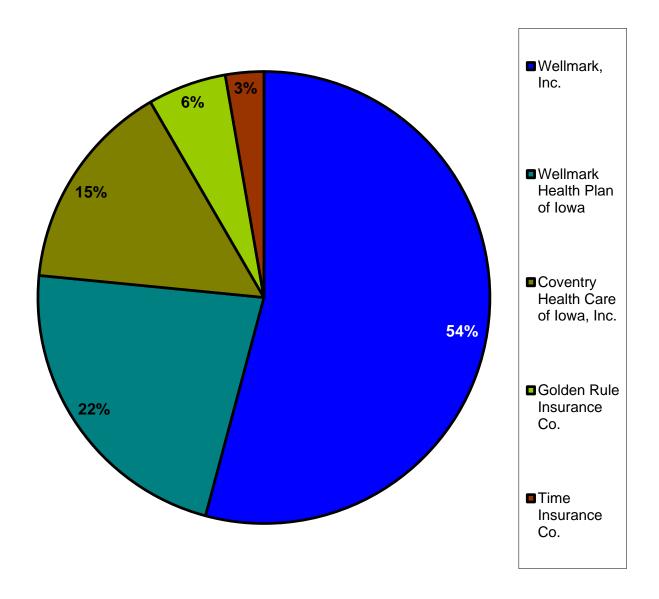

² Federated Mutual Insurance Company left the individual market in 2012. They were excluded from the individual market in the 2012 report due to low market share.

³ In past reports, Time Insurance Company was combined with John Alden and named Assurant for the purposes of this report; however, John Alden was not included in this 2015 data call. This may cause inconsistencies with past reports.

⁴ Note that in this report loss ratios are calculated as incurred claims over earned premium and not using the federal rebate formula definition for medical loss ratio.

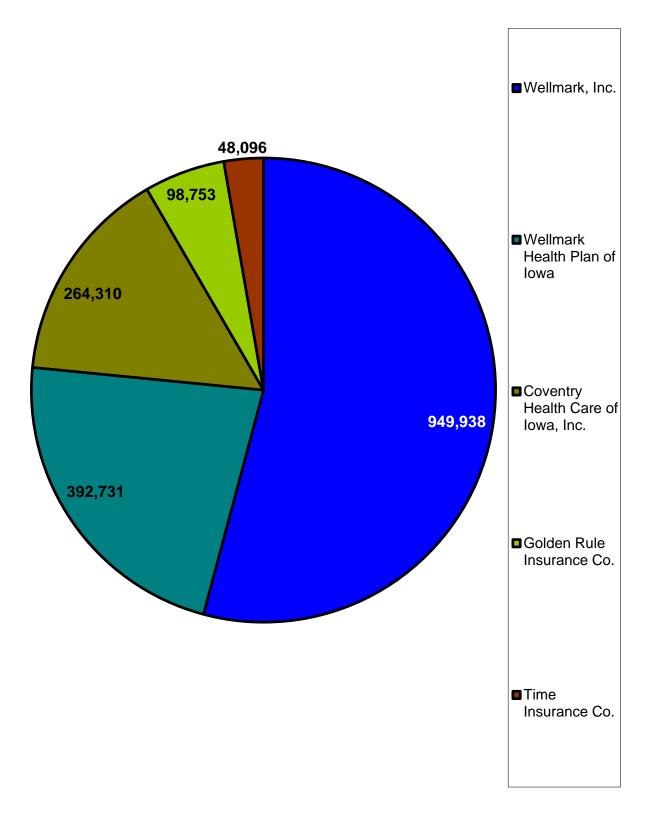

⁵ Member months are the number of total months covered for all individuals insured by a carrier in a market.

2014 Individual Comprehensive Major Medical ("ICMM") Member Months by Percent

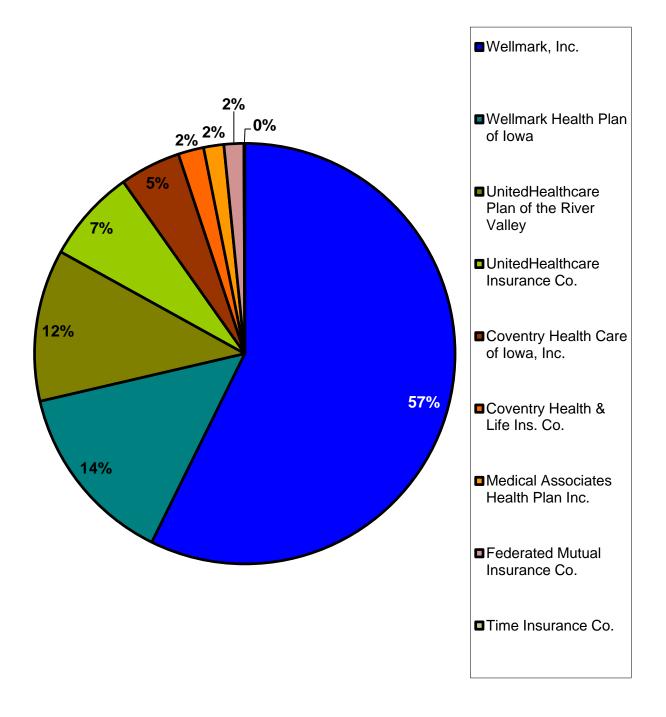

^{*} The legend lists the companies in descending order by member months.

2014 Individual Comprehensive Major Medical ("ICMM") Member Months

2014 Large Group Member Months by Percent

^{*} The legend lists the companies in descending order by member months.

2014 Large Group Member Months

^{*} The legend lists the companies in descending order by member months.

This report is structured to follow the requirements of the annual report required by Iowa Code §505.18. The summary of the results are first presented, followed by a section with more detail for each requirement, and finally the appendices containing all of the raw data in tabular format.

a. Aggregate health insurance data concerning loss ratios of health insurance carriers licensed to do business in the state.

A loss ratio is the ratio of claims to premiums. In addition to direct claims payments for medical services, the claims used in the loss ratio may include case management services, the cost of quality improvement efforts and other costs related to health care services not directly delivered to members. No specific definition of claims was provided to carriers. The federal health insurance reform requires carriers in a state to provide a rebate to policyholders if the carrier's loss ratio is less than 80% for the individual or small group markets and 85% for the large group market. The remaining 20% or 15% is the amount of premium that is available for the cost of administering the insurance (commissions, paying claims, tracking enrollment changes, etc.) and for company profits. Under the MLR standards, only Golden Rule Insurance Company (of the companies included in the data) paid rebates in 2015 for 2014. Golden Rule paid \$634,942 in rebates in the individual market. On average for 2014, commission percentage was 2.55% and administrative cost excluding commissions averaged 13.24% of premium (See *Appendix G* for more detail).

The detail provided below shows that 2014 average loss ratios are 89%, 76% and 86% for individual, small group, and large group respectively on a non-weighted basis. When loss ratios are weighted by membership in the 10 companies, the averages are 91%, 80% and 86% for individual, small group, and large group respectively. Average weighted loss ratios showed a 5% increase in the individual market, a 0% increase in the small group market and a 3% increase in the large group, indicating insurers were slightly less profitable or had slightly less administrative costs.

There is wide variation in loss ratios from company to company. Individual loss ratios varied from 70% to 98% in 2014. Small and large group varied from 58% to 90% and 77% to 93% respectively.

⁶ Not enough information was accessible to calculate the federal loss ratios. All loss ratios in this report are the ratio of claims to premiums.

⁷ https://www.cms.gov/CCIIO/Resources/Data-Resources/Downloads/Issuers_Owing_Refunds_for_2014.pdf

⁸ Some companies may have split items out of administrative costs that others included so this percentage may be somewhat understated. See Appendix G for the detail replies.

b. Rate increase data.

The average individual rate increases⁹ for 2010 to 2014 are 17%, 12%, 10%, 4%, and 8% on a non-weighted basis and 19%, 9%, 9%, 9%, and 6% on a weighted basis.

The average small group rate increases for 2010 to 2014 are 15%, 10%, 11%, 11%, and 3% on a non-weighted basis and 16%, 11%, 8%, 8%, and 5% on a weighted basis.

The average large group rate increases for 2010 to 2014 are 12%, 5%, 6%, 5%, and 7% on a non-weighted basis and 14%, 8%, 6%, 6%, and 6% on a weighted basis.

In 2014 individual rate increases varied from 1% to 20%, small group from -11% to 9%, and large group from 2% to 13%.

c. Health care expenditures in the state and the effect of such expenditures on health insurance premium rates.

Health care expenditures drive health insurance premiums. As the cost of health care services increase due to either the cost of the individual services or the use of the services, that cost increase is passed on to policyholders in the form of premium increases. In previous reports, we have used the CMS provider expenditure report to look at the trend in health expenditures in Iowa, but this data has not been updated since 2009, which is pre-ACA and therefore outdated. As an alternative we have used experience data from the federal Unified Rate Review Templates (URRT) in the ACA-compliant filings submitted in the last 3 years. This includes 2012, 2013, and 2014 data by benefit category for the individual and small group markets only, as large group market rate filings are not required to provide the URRT.

Note this information is only representative ACA compliant products, as non-ACA business such as grandfathered and transitional business will not be included. Currently ACA compliant products represent a large portion of the market.

For consistency with the rest of this report, we are looking at the companies that were included as part of the data call, meaning they are within the top 95% of the health insurance market by premium. Of these companies, Coventry Health and Life, Golden Rule Insurance Company, and Time Insurance Company are not included because they will not sell ACA compliant coverage in 2016, and therefore were not required to submit a URRT.

10

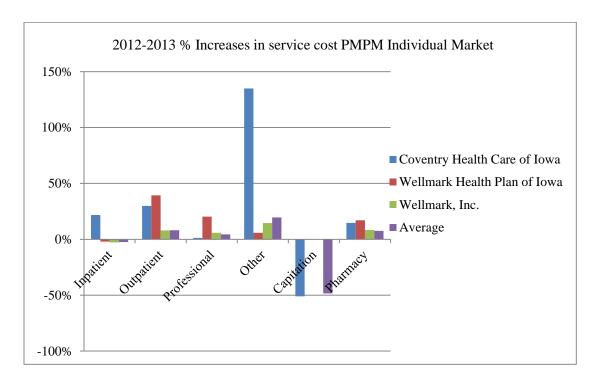

⁹ This is an example of historic values that may not match previous reports due to the companies that have left the market and were removed from historic data.

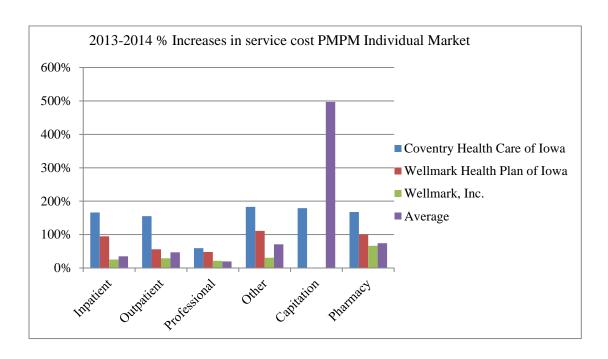

To show how these companies compare to the whole of the Iowa market, we have included an "average" category, which is the average of the entire ACA compliant market including companies not included in the data call. The table below details the actual percentage increases for the individual market.

2012-2013 % Increases (Individual Market)							
Carrier	Inpatient	Outpatient	Professional	Other	Capitation	Pharmacy	
Coventry Health Care of Iowa	22%	30%	1%	135%	-51%	15%	
Wellmark Health Plan of Iowa	-2%	39%	20%	6%	0%	17%	
Wellmark, Inc.	-3%	8%	6%	14%	0%	8%	
Average	-3%	8%	4%	20%	-48%	8%	

2013-2014 % Increases (Individual Market)							
Carrier	Inpatient	Outpatient	Professional	Other	Capitation	Pharmacy	
Coventry Health Care of Iowa	166%	155%	59%	183%	179%	167%	
Wellmark Health Plan of Iowa	95%	56%	48%	111%	0%	100%	
Wellmark, Inc.	25%	29%	22%	31%	0%	66%	
Average	35%	47%	20%	71%	497%	74%	

The graphs below illustrate the increases in the individual market.

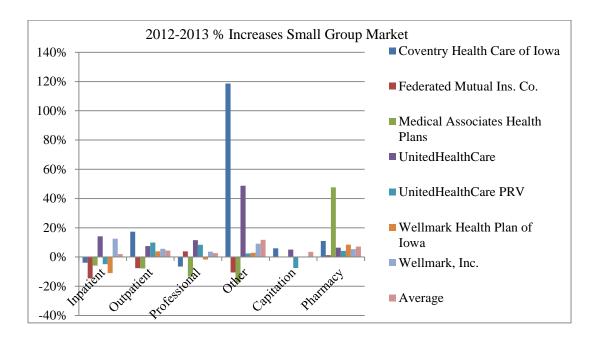

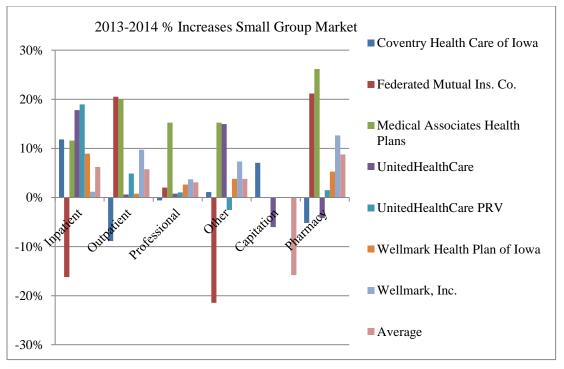

The table below details the actual percentage increases for the small group market.

2012-2013 % Increases (Small Group Market)							
Carrier	Inpatient	Outpatient	Professional	Other	Capitation	Pharmacy	
Coventry Health Care of Iowa	-4%	17%	-7%	119%	6%	11%	
Federated Mutual Ins. Co.	-15%	-8%	4%	-11%	0%	1%	
Medical Associates Health Plans	-6%	-8%	-13%	-17%	0%	48%	
UnitedHealthCare	14%	7%	12%	49%	5%	6%	
UnitedHealthCare PRV	-5%	10%	8%	2%	-8%	4%	
Wellmark Health Plan of Iowa	-11%	4%	-2%	3%	0%	8%	
Wellmark, Inc.	12%	6%	4%	9%	0%	5%	
Average	2%	4%	3%	12%	4%	7%	

2013-2014 % Increases (Small Group Market)							
Carrier	Inpatient	Outpatient	Professional	Other	Capitation	Pharmacy	
Coventry Health Care of Iowa	12%	-9%	-1%	1%	7%	-5%	
Federated Mutual Ins. Co.	-16%	21%	2%	-21%	0%	21%	
Medical Associates Health Plans	12%	20%	15%	15%	0%	26%	
UnitedHealthCare	18%	1%	1%	15%	-6%	-4%	
UnitedHealthCare PRV	19%	5%	1%	-3%	0%	1%	
Wellmark Health Plan of Iowa	9%	1%	3%	4%	0%	5%	
Wellmark, Inc.	1%	10%	4%	7%	0%	13%	
Average	6%	6%	3%	4%	-16%	9%	

The graphs below illustrate the increases in the small group market

Note that the impact of increased health care expenditures and the increase in premiums are not in the same proportion. This discrepancy is due to other factors affecting premiums such as changes in benefits and changes in the population covered by a particular carrier.

d. A ranking and quantification of those factors that result in higher costs and those factors that result in lower costs for each health insurance plan offered in the state.

Overall, carriers reported \$262.5 million rise in health care costs from the top five increase drivers and \$117.2 million reduction in the top five decrease drivers. The top five increase drivers accounted for 99% of the increases. The top five decrease drivers accounted for 94% of the decreases.

The top five drivers of health care cost increases are physician, prescription drug, outpatient hospital, surgery, and inpatient hospital. The top five services that have decreased costs are physician, inpatient hospital, outpatient hospital, surgery, and skilled nursing facilities. The explanation of how a service can be on both lists is that some aspects of a cost or service are increasing and some are decreasing. In all cases of overlap, the increasing aspects were higher than the decreasing aspects. A detailed list of drivers by carrier can be found in *Appendix D*.

e. The current capital and surplus and reserve amounts held in reserve by each health insurance carrier licensed to do business in the state.

Reserves represent liabilities that are set aside to pay claims that have not been paid as of the financial statement date. Reserves vary significantly by the size of the carrier.

Capital and surplus are amounts that protect companies from losses due to claims cost being higher than premiums or from the loss of value in the assets owned by the carrier. These risks increase by the size of the company, since losses are experienced as a percentage of premiums or a percentage of assets so as a company has higher premium volume or more assets the total amount of risk is larger.

Risk-based capital ("RBC") is a measure developed by the National Association of Insurance Commissioners ("NAIC") and measures a company's capital compared to some of its risk as measured by the NAIC Health RBC formula.

The 2014 RBC for the companies in this report varied from 363% to 1983%. In 2013 the companies that reported varied from 402% to 1871%.

f. A listing of any apparent medical trends affecting health insurance costs in the state.

The answer to item d. above provides a more thorough answer to this question, but carriers listed Physician (\$88,813,005) (an increase), as the top driver of healthcare cost overall. The next four largest drivers are Prescription Drug (\$76,399,686) (an increase), Physician (-\$69,909,604) (a decrease), Outpatient Hospital (\$40,891,659) (an increase), and Inpatient Hospital (-36,472,022) (a decrease).

g. Any additional data or analysis deemed appropriate by the commissioner to provide the general assembly with pertinent health insurance cost information.

Information was requested from carriers of per-member-per-month ("PMPM") cost by market segment. Many factors affect the PMPM costs including wide variations in benefit design, but the PMPM costs do provide some insight into affordability of health insurance in Iowa.

Individual average PMPM claim cost went from \$107.45 in 2005 to \$214.95 in 2014 (Increase of 100%). For small group and large group these ranges were \$161.17 to \$258.72 (Increase of 60.5%) and \$192.37 to \$318.53 (Increase of 65.6%) respectively. More detail can be found in *Appendix G*.

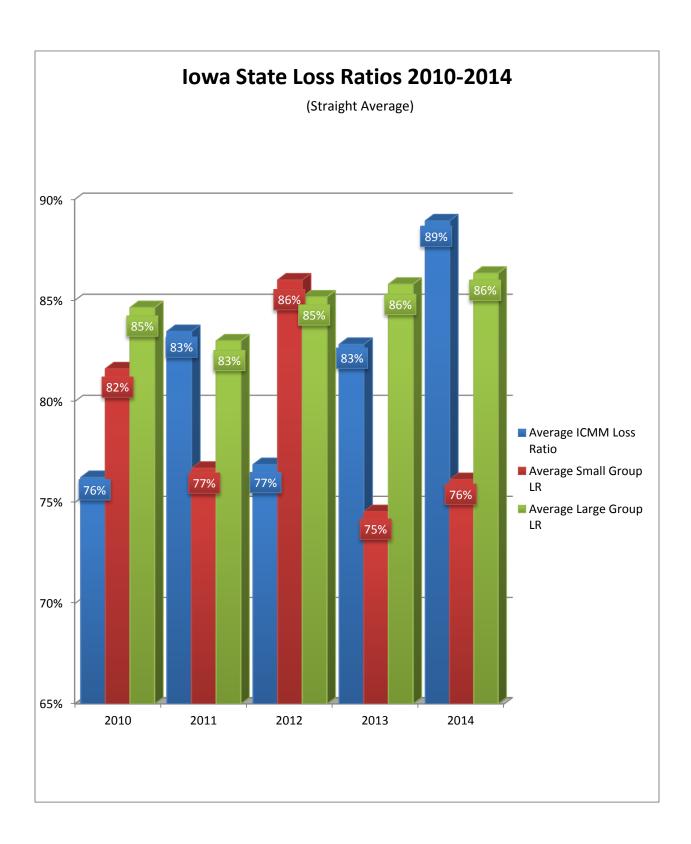

Information was also requested concerning the level of commissions and administrative costs. This information has been presented with the loss ratio information and details can be found in *Appendix G*.

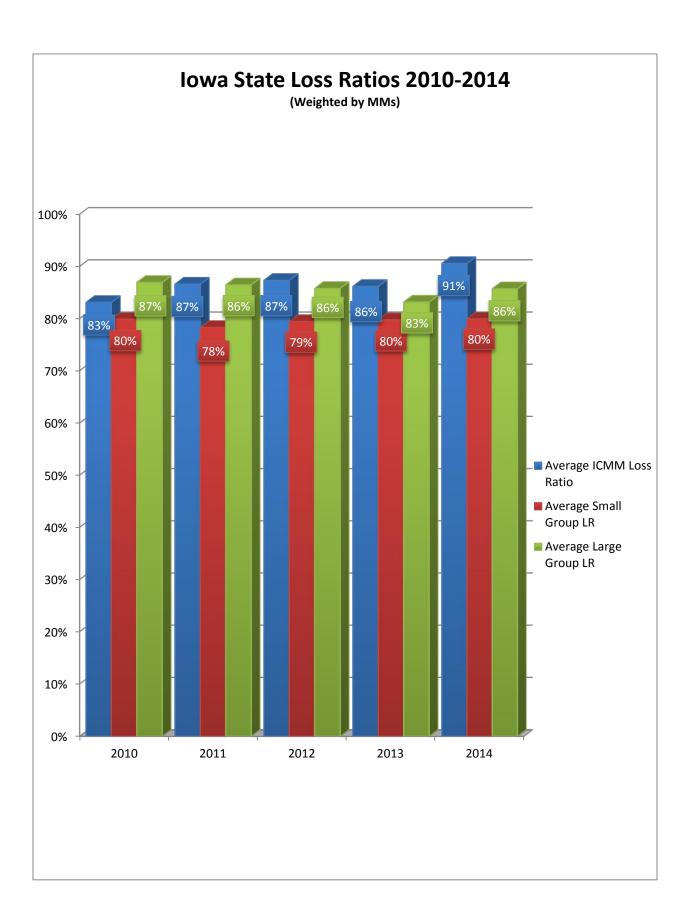

Loss Ratios

a. Aggregate health insurance data concerning loss ratios of health insurance carriers licensed to do business in the state.

A complete set of data can be found in *Appendix B*.

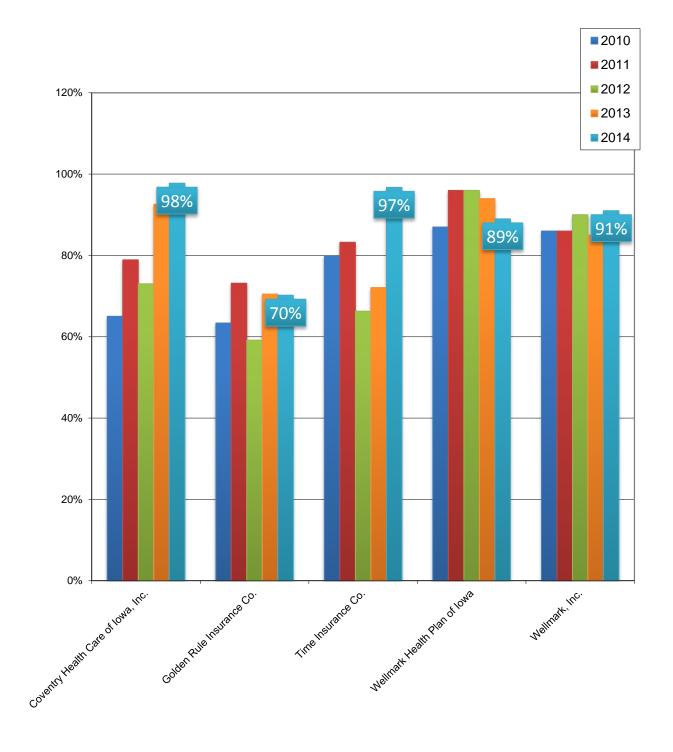

The following charts are loss ratios using straight averages and loss ratios weighted by membership. The weighting results in loss ratios closer to those of Wellmark, Inc. and is more representative of the actual loss ratio average in Iowa. The loss ratios displayed here do not use the federal medical loss ratio (MLR) formula used for the federal MLR rebate calculation. The rebate MLR is typically higher than the traditional loss ratio displayed here.

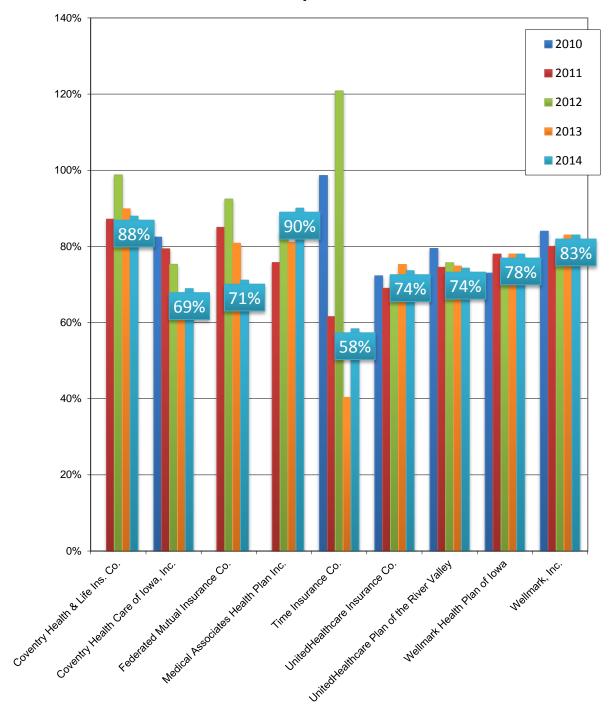

The following charts compare companies for each market segment for 2010-2014. Note that companies without business in a market segment are not included.

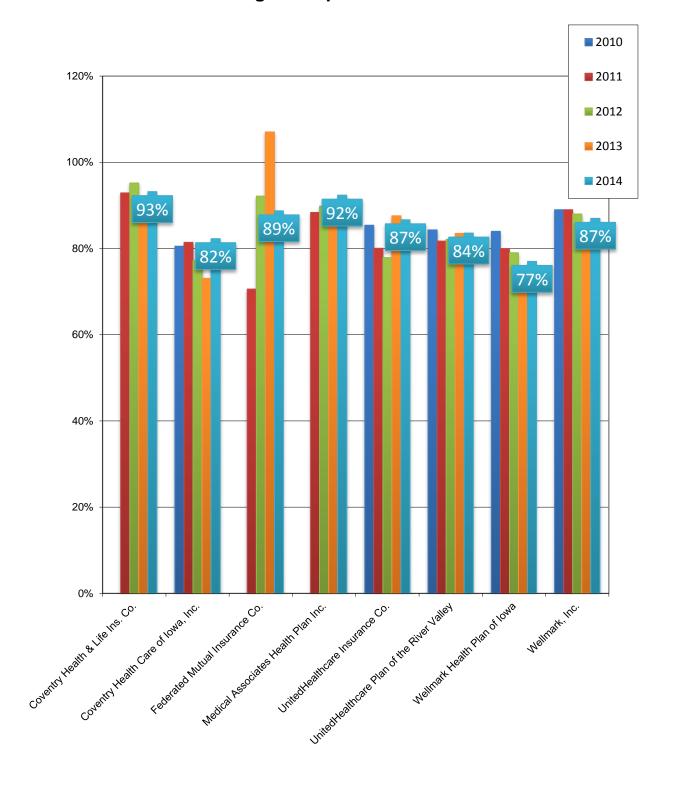

ICMM Loss Ratios 2010-2014

Small Group Loss Ratios 2010-2014

Large Group Loss Ratios 2010-2014

The following three charts rank the companies by loss ratio for each market for 2014:

2014 ICMM Loss Ratios					
Coventry Health Care of Iowa, Inc.	98%				
Time Insurance Co.	97%				
Wellmark, Inc.	91%				
Wellmark Health Plan of Iowa	89%				
Golden Rule Insurance Co.	70%				

2014 Small Group Loss Ratios	
Medical Associates Health Plan Inc.	90%
Coventry Health & Life Ins. Co.	88%
Wellmark, Inc.	83%
Wellmark Health Plan of Iowa	78%
UnitedHealthcare Plan of the River Valley	74%
UnitedHealthcare Insurance Co.	74%
Federated Mutual Insurance Co.	71%
Coventry Health Care of Iowa, Inc.	69%
Time Insurance Co.	58%

2014 Large Group Loss Ratios	
Coventry Health & Life Ins. Co.	93%
Medical Associates Health Plan Inc.	92%
Federated Mutual Insurance Co.	89%
Wellmark, Inc.	87%
UnitedHealthcare Insurance Co.	87%
UnitedHealthcare Plan of the River Valley	84%
Coventry Health Care of Iowa, Inc.	82%
Wellmark Health Plan of Iowa	77%

Under the federal health insurance reform rebate regulations from CMS, carriers with less than 75,000 life years are allowed to take an adjustment to the medical loss ratio used in the rebate formula. The adjustment is intended to compensate for the larger statistical fluctuations found in smaller less credible blocks of business. This credibility adjustment increases the actual loss ratio used for rebate calculation purposes based on the size of the carrier with smaller carriers receiving larger adjustments. As was the situation for 2014 rebates, all carriers in Iowa except for Wellmark, Inc., will receive a credibility adjustment for 2015 rebates.

The part of the premium not used for claims is used for other expenses and profits. Companies surveyed reported a wide range of commission percentages and administrative percentages. The average commission percentage in 2014 was 2.55%, but it ranged from 0% to 7%. Commissions for individual products are traditionally higher than for small group products and commissions for large group products are traditionally lower. The mix of business between individual and

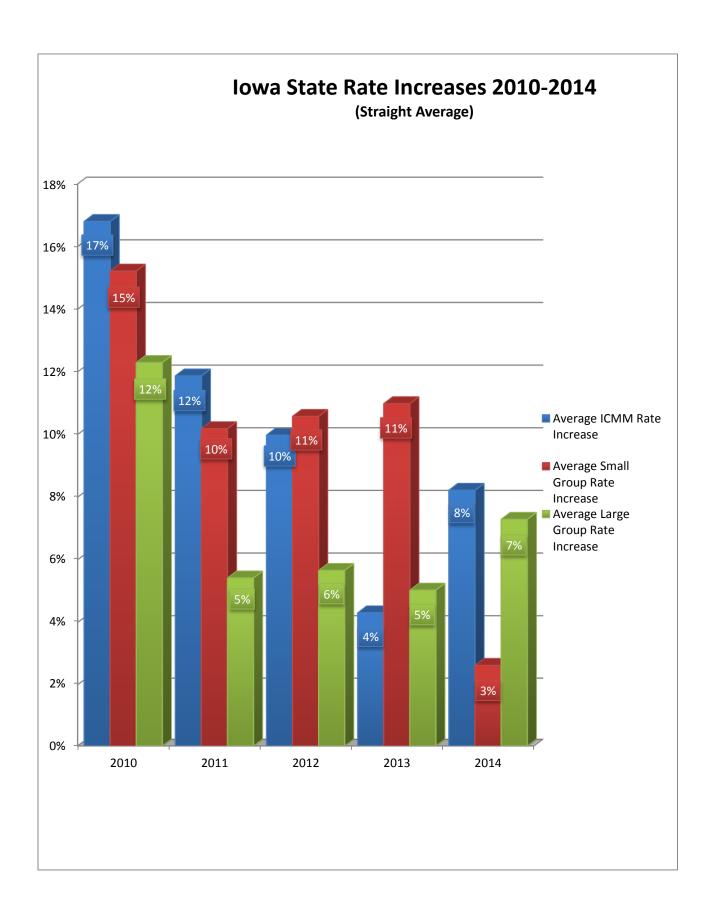

group may explain some of the variation between the companies because these lines of business have different levels of administrative cost. The average administrative expense percent of premium in 2014 was 13.24%, but the percentages ranged from 9.9% to 20.8% (See *Appendix G* for more detail on the 10 highest percentages of other administrative costs reported by the companies).

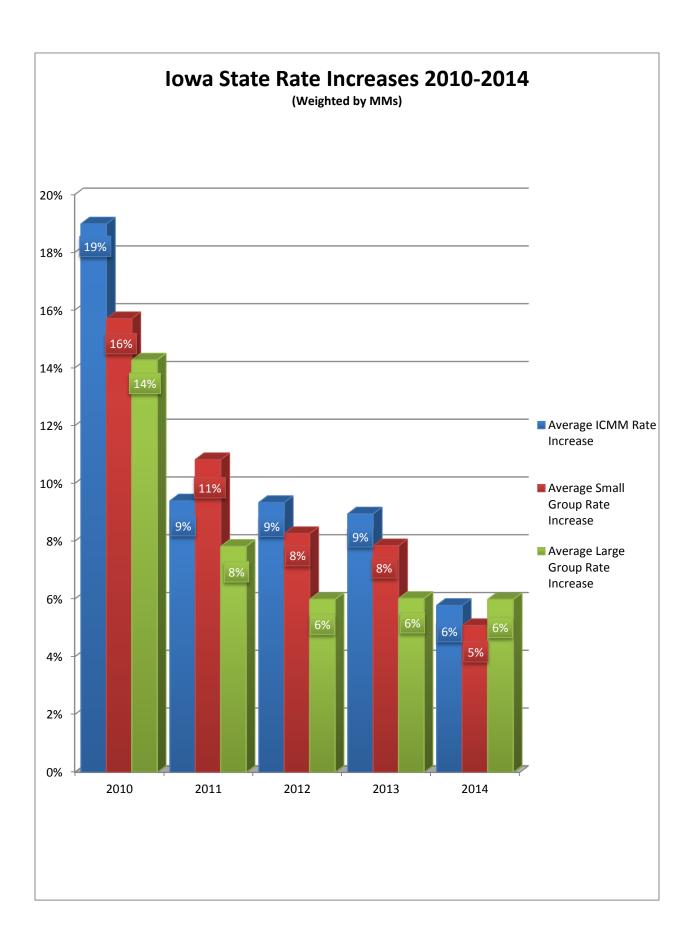

Rate Increase History

b. Rate increase data.

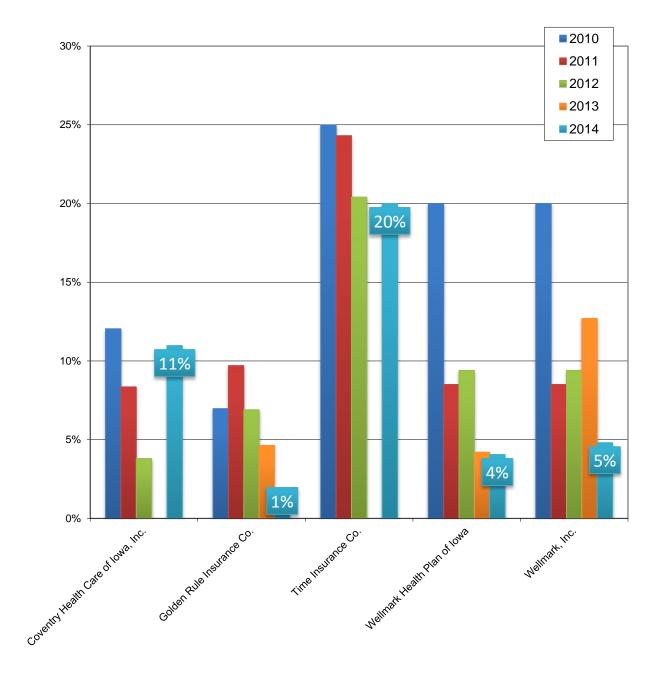

A complete set of data can be found in Appendix C.

The following charts show rate increases using straight averages and rate increases weighted by membership.

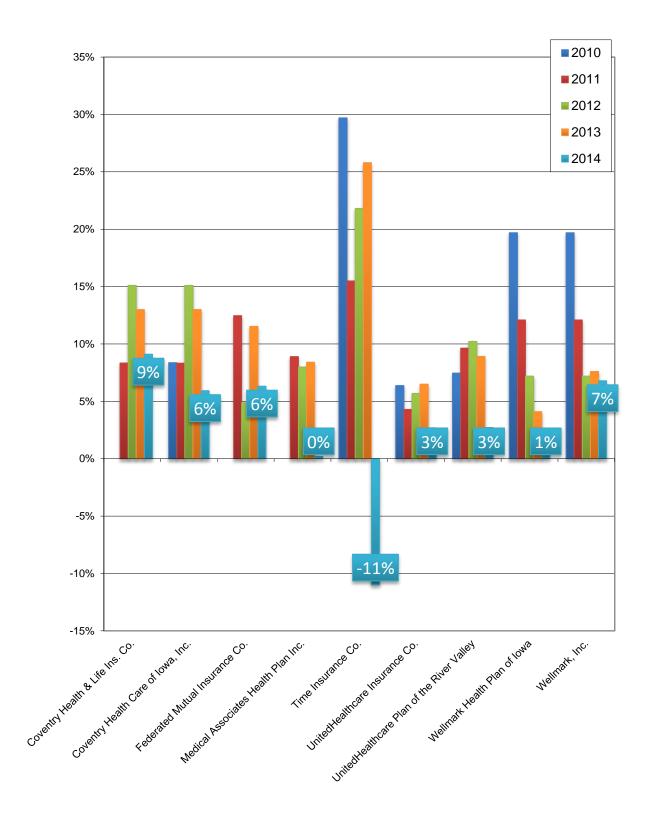

ICCM Rate Increases 2010 - 2014

 $^{^{10}}$ The percentages in the following charts represent rate increases for 2010-2014 for each company. Only 2014 labels are included for readability.

Small Group Rate Increases 2010 - 2014

Large Group Rate Increases 2010 - 2014

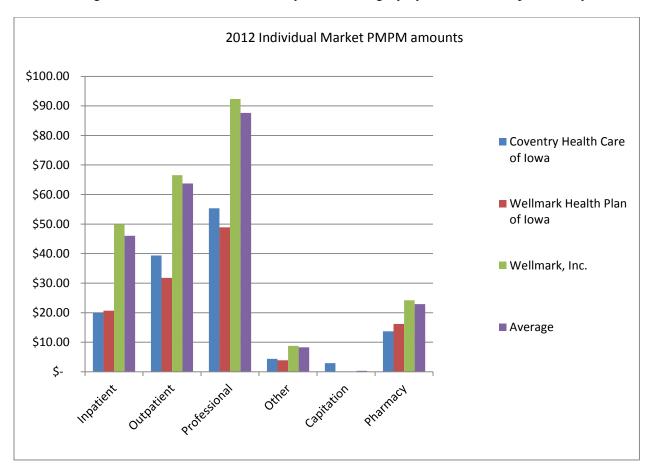

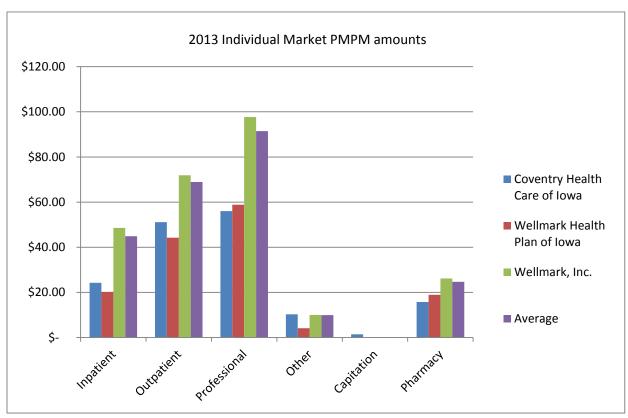

Health Care Expenditures

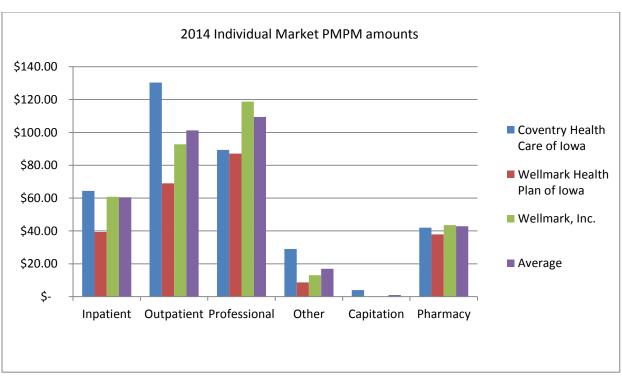

c. Health care expenditures in the state and the effect of such expenditure on health insurance premium rates.

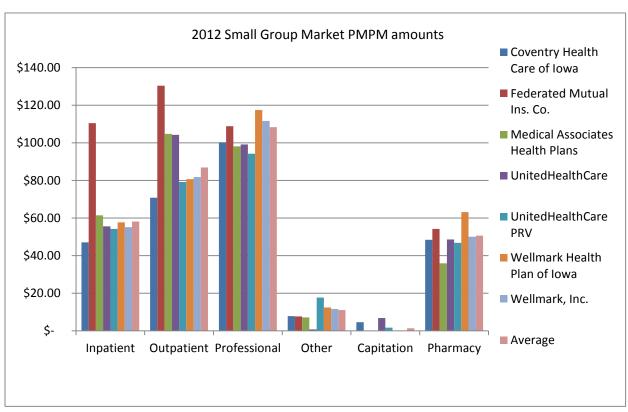

Since premiums are typically calculated based on estimated health care claims, as health care expenditures increase, premium rates increase. Premiums typically increase faster than health care expenses for many reasons. One reason for higher premium increases is that deductible amounts do not increase therefore all of the increases in health care dollars are used to increase premiums, which results in a higher percentage increase. For example if a policy has a \$2,000 deductible and a \$5,000 estimated claims cost (\$7,000 total health care costs), and health care costs are expected to increase \$700 or 10%, that is added to the estimated claims cost of \$5,000 for a 14% increase in claims cost.

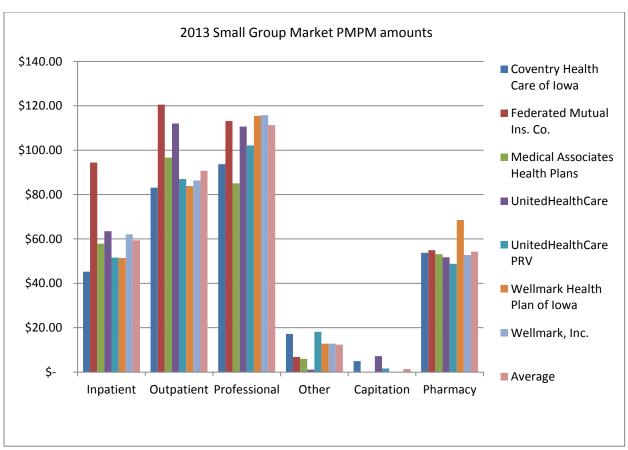

The following tables show the PMPM costs by benefit category by market for the past three years.

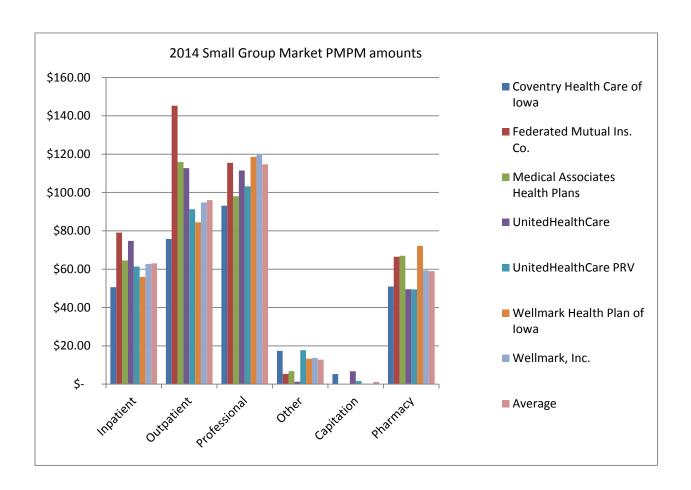

Drivers of Higher Costs and Cost Reductions

d. A ranking and quantification of those factors that result in higher costs and those factors that result in lower costs for each health insurance plan offered in the state.

Many carriers were not able to break out individual, small group, and large group cost drivers. Carriers also used varying terminology and aggregation levels to describe the health care categories for the cost drivers. We consolidated the cost drivers for all carriers at total market level to avoid providing an inaccurate picture of a market segment based on limited data. All of the data provided can be found in *Appendix D*. We also converted definitions to a set of common terms. This conversion is a bit problematic due to overlapping terms. For example, one carrier may have used inpatient hospital as a category which may have included surgery costs, and another carrier broke out all surgery costs separately. *Appendix H* shows a mapping of the original categories provided to the categories used below.

Overall, carriers reported \$262.5 million spent in the top five increase drivers and \$117.2 million spent in the top five decrease drivers. The top five increase drivers accounted for 99% of the increases. The top five decrease drivers accounted for 94% of the decreases.

The following is a ranking of the health care services that are driving increases and decreases in health insurance premiums, as reported by carriers in Iowa after consolidation and redefinition.

Increases:

Company Reported Service			
(Standardized Category)	Increases		% of Total Listed Increases
Physician	\$	88,813,005	33%
Prescription Drug	\$	76,399,686	29%
Outpatient Hospital	\$	40,891,659	15%

Reserves, Capital and Surplus, Risk-based Capital

e. The current capital and surplus and reserve amounts held in reserve by each health insurance carrier licensed to do business in the state.

Reserves

Carriers are required to hold sufficient reserves to pay for claims that have not been paid and for the possibility that in the future claims will be higher than premiums. It is important for policyholder safety that these reserves are set aside to ensure that claims can be paid. If sufficient reserves are not set aside in the form of liabilities, there is a danger that the carrier will not be able to pay claims. Carriers are required to provide an actuarial opinion with their statutory annual financial statement from an actuary with experience in the type of insurance sold by the carrier verifying that reserves will be adequate to pay claims. Therefore, the level of reserves held represent the level of claims that the carrier is liable for and has not paid as of the financial statement date.

The following table shows the 2014 reserves held by each carrier to pay claims:

Company	2014 Reserves
Coventry Health & Life Ins Co.	704,332,655
Coventry Health Care of Iowa, Inc.	28,245,328
Federated Mutual Insurance Co.	47,820,580
Golden Rule Insurance Company	251,043,311
Medical Assoc. Health Plan Inc.	9,860,319
Time Insurance Company	394,923,949
United HealthCare Insurance Company	5,377,960,774
United HealthCare Plan of the River Valley	395,495,041
Wellmark Health Plan of Iowa, Inc.	34,053,084
Wellmark, Inc.	1,359,749,051

Capital and Surplus

Capital and surplus represents the financial resources available to a company that protect it from insolvency in years where it experiences adverse financial situations such as underwriting losses or loss in the value of its assets. The larger a company is in respect to its total annual claims payments, the more capital and surplus it requires to protect against insolvency.

When capital and surplus rise above the level needed for solvency protection, a company can use it for other purposes such as capital investments to continue to operate efficiently, expand operations, stockholder dividends (for-profit organizations), policyholder dividends (mutual insurance companies), or as additional protection against adverse situations.

Capital and surplus by company for 2014 is displayed below:

Company	2014 Capital and Surplus
Coventry Health & Life Ins Co.	704,240,085
Coventry Health Care of Iowa, Inc.	25,557,975
Federated Mutual Insurance Co.	2,657,097,279
Golden Rule Insurance Company	309,919,923
Medical Assoc. Health Plan Inc.	19,304,672
Time Insurance Company	387,221,709
United HealthCare Insurance Company	5,592,828,416
United HealthCare Plan of the River Valley	600,328,649
Wellmark Health Plan of Iowa, Inc.	159,317,952
Wellmark, Inc.	310,305,386

Risk-based Capital

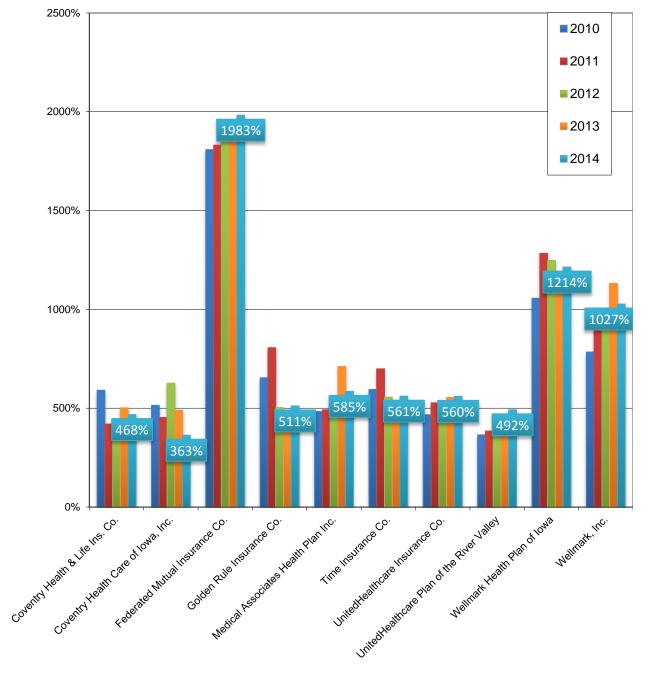

A complete set of data can be found in Appendix E.

We have included not only the capital and surplus, but also the risk-based capital ("RBC"). RBC is a measure developed by the NAIC that measures a company's capital compared to some of its risk.

The following table shows the RBC percentages for 2014:

Company	2014 RBC %
Coventry Health & Life Ins Co.	468%
Coventry Health Care of Iowa, Inc.	363%
Federated Mutual Insurance Co.	1983%
Golden Rule Insurance Company	511%
Medical Assoc. Health Plan Inc.	585%
Time Insurance Company	561%
United HealthCare Insurance Company	560%
United HealthCare Plan of the River Valley	492%
Wellmark Health Plan of Iowa, Inc.	1214%
Wellmark, Inc.	1027%

Risk Based Capital 2010 - 2014

As a generality, falling RBC is an indication of losses in a company and rising RBC is an indication of profits in a company.

Medical Trends

f. A listing of any apparent medical trends affecting health insurance costs in the state.

We standardized the answers provided by carriers. We tallied how many carriers identified each category as affecting the decrease or the increase of health insurance costs. The most commonly listed trends affecting health insurance costs include: (See Appendix F)

	# of Cor	npanies
Company Reported Service (Standardized Category)	Decrease	Increase
Ambulance	1	2
Anesthesia		1
Benefit Changes	2	
Chiropractic		1
Cost Shifting - Medicare		2
Deductible Leveraging		2
Diagnostic Imaging & Tests	1	
Emergency Room	2	
Equipment and Supplies	3	1
Inpatient Hospital	22	10
Laboratory and X-ray	1	1
Medical Technology		2
MH/CD	2	
Other	5	4
Outpatient Hospital	5	11
Physician	19	17
Population Change		3
Prescription Drug	1	11
Preventative	3	
Radiology	2	5
Rehab	1	2
Skilled Nursing Facilities	2	1
Surgery	6	13
Therapy		1
Underwriting Wear-off		1

Additional Data – PMPM Costs

g. Any additional data or analysis deemed appropriate by the Commissioner to provide the general assembly with pertinent health insurance cost information.

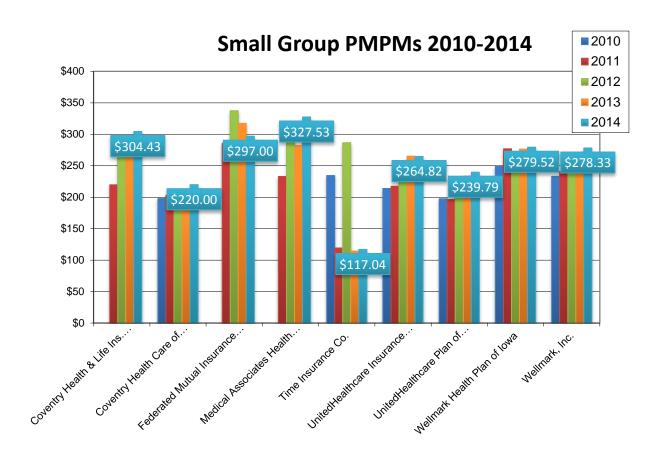

A complete set of data can be found in Appendix G.11

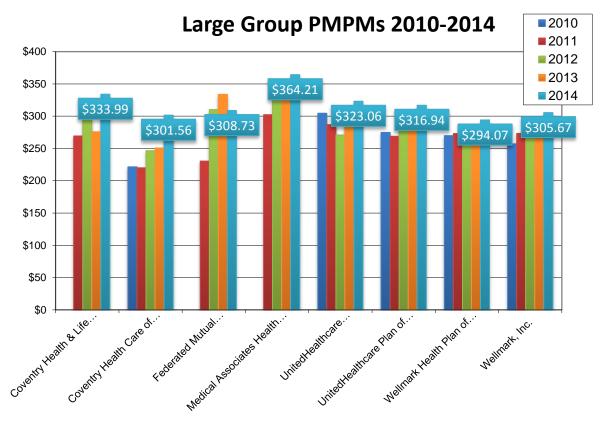

Information was requested from carriers of per-member-per-month ("PMPM") health care cost by market segment. Many factors affect the PMPM costs such as wide variation on benefit design, reduced comparability. That said, PMPM costs do provide some insight into affordability of health insurance in Iowa, because higher PMPM health care costs result in higher health insurance premiums. Note, only 2014 dollar values are shown for readability.

-

¹¹ The PMPM values shown in the following charts refer to 2013 PMPM costs for each company.

Appendix F: Medical Trends

Below are the medical trends from 2006 to 2014.

Golden Rule Insurance Company has not answered since 2009 due to small membership and replied this year with:

"Since our IA membership is small, any trend analysis specific to particular procedures or services would be deemed non-credible. However, medical insurance has historically been subject to cost factors beyond pure price inflation. Increased utilization, deductible/copay leveraging, changes in technology and services, and the wear-off of underwriting have always played a role in creating medical insurance premium trends that are greater than overall medical inflation. In addition, particular blocks will experience different trends based on the overall changes in insured demographics, benefit selection options, and underwriting procedures."

We have included the categories from the 2014 report for comparison purposes. Only the carriers providing data are included.

Coventry Health Care of Iowa, Inc.								
Service Category	2007	2008	2009	2010*	2011	2012	2013	2014
Anesthesia costs due to increased pain mgt therapy			11%					
Cancers		33%

_

¹² Underwriting wear-off is the situation where when policies are underwritten the claims cost are lower in the early years due to the underwriting, but as time passes the effect of underwriting disappears or wears-off.

Appendix H: Health Care Cost Category Standardization

Original Service	Standard Name
17 - Myeloproliferative DDs (Poorly Differentiated Neoplasms)	Inpatient Hospital
5 - Circulatory System	Inpatient Hospital
Acute inpatient admissions	Inpatient Hospital
Acute inpatient allowed per admission	Inpatient Hospital
Acute Inpatient Facility	Inpatient Hospital
Air Ambulance	Ambulance
Ambulance	Ambulance
Ambulatory Surgery	Surgery
ANC FREESTANDING CLINICAL LAB	Laboratory and X-ray
ANC - HOME HEALTH	Other
ANC OUTPATIENT SURGERY	Surgery
ANC RADIOLOGY SERVICES	Radiology
Ancillary	Ancillary
Ancillary Ambulance Cost/Case	Ambulance Cost
Ancillary Durable Medical Equipment Cases/1000 Ancillary Durable Medical Equipment Cost/Day	Equipment and Supplies Equipment and Supplies
Ancillary Hospice Care Cases/1000	Other
Ancillary Prosthetics Cost/Case	Equipment and Supplies
Ancillary Providers	Physician
Anesthesia	Anesthesia
Anti-Selective Lapse	Population Change
ASC	Outpatient Hospital
Attained Age	Population Change
Behavioural Health	MH/CD
Benefit Buy-Down	Other
Benefit Design	Other
Blepharoplasty, Upper Eyelid; With Excessive Skin Weighting Down Lid	Surgery
Blood & Blood Products	Equipment and Supplies
Сар	Other
Chemotherapy	Chemotherapy
Chiropractic	Chiropractic
Coronary Care Room & Board	Inpatient Hospital
Coronary Care/General Classification	Inpatient Hospital
Cost Shifting	Cost Shifting - Medicare
Cost Shifting - Low Medicare Reimbursement	Cost Shifting - Medicare
Ct Angio Abd & Pelvis	Surgery
Decrease in Insured Members from 2008-2009	Population Change
Deductible Leveraging	Deductible Leveraging Diabetic
Diabetic Diagnostic Agents	Prescription Drug
Diagnostic Agents Diagnostic Imaging & Tests	Diagnostic Imaging & Tests
Diagnostic Radiology & Nuclear Medicine	Radiology
Dialysis	Outpatient Hospital
DME Supplies	Equipment and Supplies
Doctor Visit	Physician
Drug	Prescription Drug
Drug allowed per script	Prescription Drug
Drug Card allowed per script	Prescription Drug
Drug Card utilization	Prescription Drug
Drug Card/Medco Data	Prescription Drug
Drug included in health	Prescription Drug
Drug Utilization	Prescription Drug
EKG	Preventative
Emergency Medicine	Physician
Emergency Room	Emergency Room
Emergency, Urgent, Observation Rooms	Emergency Room
Enteral/Parenteral Formulas	Other
Equipment and Supplies	Equipment and Supplies
External Ambulatory Infusion Pump, Insulin	Prescription Drug
Facility outpatient allowed per service	Outpatient Hospital
Facility Outpatient utilization	Outpatient Hospital
Facility/Emergency Room	Emergency Room
Facility/Hospice	Inpatient Hospital

Original Complex	Otan dand Name
Original Service	Standard Name
