

Infrastructure Report (2016)

Criminal Justice Information System (CJIS) Integration Project Status Report

December 21, 2015

Project Name and Description – The goal of the project is to enter criminal justice data once, and then share the data automatically with other criminal justice agencies.

Criminal Justice Information System (CJIS) Integration Project – Using a centralized computer system that meets or exceeds all federal and state security requirements, this initiative continues to develop a seamless, real-time, electronic information sharing “system of systems” for members of the criminal justice community in Iowa. Historically, criminal justice information systems have been developed in isolation, resulting in independent systems that may share many common data concepts without being able to effectively communicate. Iowa’s CJIS Project was born out of the need for these systems to share information and work product in a timely, secure, accurate, and comprehensive manner. As criminal justice information sharing is a high priority of federal law enforcement agencies, the CJIS system has adopted national standards that effectuate its design to enable the timely, efficient, and automated sharing of information within and between criminal justice entities at the state, local, and national levels. Sharing is accomplished without sacrificing the independence of criminal justice entities and without forcing them to incur costly upgrades to their distinct technological architectures.

Iowa’s CJIS system has received national awards for excellence and is a national leader in criminal justice information sharing.

Progress of Work –

A significant amount of progress has been made on this project since its development began in 2007, and specifically during the last year. The electronic exchange of real-time justice information is in process in more than 170 jurisdictions around the state (detailed information provided below). The CJIS Program Office, pursuant to CJIS Advisory Committee directives, has plans to continue expansion of current information exchanges to local jurisdictions and to implement new information exchanges during the current fiscal year. CJIS-brokered information is now a part of the daily business process and workflow of the statewide court system and state and local criminal justice agencies and offices. On average, it takes approximately three seconds to perform a round trip, electronic transmission of CJIS information for any given information exchange.

Examples of the benefits that accrue to the public and to agencies participating in CJIS exchanges include:

- As soon as a judge approves a protective order, the information is transmitted to the Iowa On-line Warrants and Articles (IOWA) System. That information is now available to law enforcement responders anywhere from 12 to 36 hours sooner than it was with paper transmission. Since the first 24 hours following a domestic incident are the most dangerous, immediate information helps officers protect victims from further violence.
- When the Department of Corrections documents a change in the address of a sex offender, that information is electronically sent to the Division of Criminal Investigation (DCI) which allows for faster and more accurate updating of the State's sex offender registry and website. As a result, the public is made safer by the publishing of more timely information, and law enforcement officers save time in documenting and verifying addresses of sex offenders.
- Law enforcement agencies across the state and nation are routinely and instantly provided correctional related information upon request, including photographs of suspects. As a result, the personal safety of officers and the public is enhanced. This exchange is used by law enforcement over eighteen thousand times per day.
- Law enforcement officers are able to spend less time on paperwork and more time on investigations and patrol by preparing electronic complaints. The Complaint and Affidavit exchange is now in all 99 counties. The Iowa State Patrol can file a complaint in any county. These complaints are electronically delivered to the Court Clerk and, in thirty-eight (38) counties, the County Attorney. When delivered, the complaint information is automatically populated in the Court and County Attorney databases. This exchange assists the Electronic Data Management System (EDMS) that the Judicial Branch has expanded to all 99 Iowa counties.
- The Office of Driver Services is now receiving electronic conviction and suspension information from the Judicial Branch, increasing the Department of Transportation's efficiency in handling convictions and suspensions of driver licenses.

The benefits of CJIS also include the elimination of information errors and redundant data entry, allowing for improved and more immediate decision-making, operational efficiency, and an enhanced ability to evaluate the effectiveness and cost-effectiveness of local, as well as state-wide, justice related programs and laws. The CJIS Project collaborates with several criminal justice information system initiatives throughout the State of Iowa:

- Appriss (VINE system which provides notices to victims and others)
- The Traffic and Criminal Software (TraCS) system, which is administered by the Iowa Department of Transportation (IDOT) and used by 170 law enforcement agencies

including the Iowa State Patrol and IDOT Motor Vehicle Enforcement (compared to 141 at the end of 2014).

- The Iowa Online Warrants and Articles (IOWA) System, which is administered by the Department of Public Safety and is accessed by all of law enforcement and numerous criminal justice agencies in the state.
- The Department of Corrections (DOC), Iowa Corrections Offender Network (ICON).
- The Iowa Court Information System (ICIS), which is the case management system used by all judges and court clerks, and the companion Electronic Document Management System (EDMS), which the Judicial Branch implemented on a county-by-county basis with the last of the 99 counties going live in June of 2015
- The County Attorneys’ ProLaw Case Management System
- The County Attorneys’ Judicial/Dialog Case Management System
- Intergraph, the Records Management System (RMS) vendor for Des Moines and Cedar Rapids Police Departments. These agencies host RMS services for Polk and Linn County Sheriffs, respectively, as well as several of the suburban agencies
- ShieldWare, the RMS vendor for Waterloo PD, Black Hawk County Sheriff, and approximately 40 smaller jurisdictions
- Sypherlink, a law enforcement integration services provider working in Ames, Story County, and with the Iowa State University police agency.

During the past year, CJIS migrated all of its exchanges from a 10G server to an 11G server. This was a significant undertaking, and one that was necessary to keep all of the current data exchanges working productively and optimally.

Currently, the CJIS Program Office has a number of exchanges in various stages of implementation. A fully implemented exchange means that: 1) the exchange is “in production” as the CJIS centralized computer system has been fully programmed to automatically receive and automatically transmit the information to be exchanged; and 2) that all possible state, local (and in some cases, federal) agencies are actively sharing the information through the CJIS system.

Status of CJIS exchanges:

Exchanges in Production: 100% implemented

- **Adult Data Warehouse.** The ICIS system sends information on all case filings and dispositions in adult criminal court to the Iowa Adult Data Warehouse (ADW) within the Division of Criminal and Juvenile Justice Planning (CJJP).
- **Juvenile Data Warehouse.** Exchanges juvenile case petitions and adjudications from ICIS to the Iowa Juvenile Data Warehouse (JDW).

- **Protective Order.** Exchanges information relating to the issuance of protective orders from the Judicial Branch to the Department of Public Safety (DPS) and to local law enforcement through the IOWA System.
- **Protective Order Served.** The Protective Order Served exchange sends information from the courts or DPS to the VINE system (Victim Information and Notification Everyday). When a protective order is served, either in court or by law enforcement, the information is sent to VINE, enabling victims to have immediate access to that information.
- **Order for Pre-Sentence Investigation.** The Order for Pre-Sentence Investigation Exchange, which is the order issued by the Judicial Branch to the DOC requesting the completion of a pre-sentence investigation (PSI), has been implemented in all judicial districts. This exchange may be expanded to also provide a copy of the Order to the relevant County Attorney's system.
- **Pre-Sentence Investigation Report.** The completed PSI report is transmitted from DOC's ICON system to the Court's ICIS system.
- **ICIS to NICS.** Following the 2007 fatal shootings at Virginia Tech by an assailant who had a history of mental health orders, Congress expanded the National Instant Check System (NICS). This exchange automatically populates the NICS database maintained by the FBI with mental-health-related court orders, and judgments of Not Guilty by Reason of Insanity.
- **OWI Disposition.** This exchange sends information from the Courts to the Department of Transportation. When a defendant is found guilty of an OWI offense the disposition is sent to the DOT's driver license system. Automatic updates at DOT ensure that the appropriate actions relating to driving privileges are enforced immediately.
- **Sex Offender Address Updates (DOC to DCI).** A change in the documented address of sex offender triggers an exchange to update the DPS-Division of Criminal Investigation's (DCI's) Sex Offender Registry (www.iowasexoffender.com), keeping this important public resource on sex offender tracking as current as possible.
- **Sex Offender Address Updates (DCI to DOC).** When sex offenders' addresses or other important information are updated on the sex offender registry by the DCI (information usually obtained from local Sheriffs), the information is pushed to the Department of Corrections. The DOC is then better able to supervise sex offenders, which may result in quicker probation/parole revocations of sex offenders who violate supervision terms.
- **DPS-ICON.** Query from DPS to DOC for offender information, including photo identification. Officers are able to query DOC through the IOWA system to access data on any person who has been incarcerated or is under community supervision. This

capability has been extended to Nlets, the International Justice and Public Safety Network, providing information to investigators in other states, further leveraging Iowa's investigative resources.

- **Court Disposition & Payments (Court to Polk Co. Sheriff).** Dramatically increases collections from convicted criminals by sending of disposition and collection information from the Polk County Court to the Polk County Sheriff's Office. This has improved the collection rates for administrative fees due to the Polk County Sheriff's Office.
- **Felony Convictions to the Secretary of State's Office.** The ICIS system pushes information to the Secretary of State's Office for each defendant newly convicted of a felony. This data transfer replaces a monthly paper report, saving data-entry time for Secretary of State's staff.
- **Convictions and Suspensions to the DOT.** The ICIS system pushes driving related conviction and suspension information to the DOT's Office of Driver's Services. This data transfer replaces a periodic paper report and allows the DOT to better automate suspension and revocation related notices.
- **Complaint.** Automates delivery of the Complaint and Affidavit from law enforcement via Iowa's Traffic and Criminal Software (TraCS) system, to the Courts' ICIS system for review and further processing. Third-party law enforcement records management system (RMS) products are also programmed to file complaints through this standards-based exchange.
 - Iowa State Patrol and DOT's Division of Motor Vehicle Enforcement are able to use the Complaint form statewide, filing electronically in all counties via EDMS. Previously, paper complaints were still required in some counties until electronic-filing capability became statewide on June 30, 2015.
 - 146 local agencies (Sheriff's Office and local Police Departments) are now able to electronically file complaints (as compared to 70 at the end of 2014).
 - Additionally, two County Attorneys, those in Polk and Linn Counties, regularly file Complaints directly with the courts.

There are a number of exchanges "in production" but not completely rolled out to all eligible systems or agencies (e.g., all County Attorneys' systems, or all law enforcement agencies using the TraCS software). CJIS continues to work with agencies to implement (roll out) these exchanges when the agencies have completed necessary programming on their computer systems. Listed below are the exchanges in production and still in the process of roll-out.

Exchanges in Production/Exchanges less than 100% Implemented

- **EDMS Integration Exchanges.** These exchanges interoperate with the courts' Electronic Document Management System (EDMS). This "bundle" of exchanges allows law enforcement and prosecutors to interact with EDMS directly through their own data systems – TraCS, ProLaw, Judicial/Dialog, and other case management or records management systems (RMS or CMS). These exchanges are in production to some extent in all of Iowa's 99 counties, as part of the Judicial Branch's EDMS system.
 - **Court Notice.** This exchange returns court case information upon filing of a complaint or trial information, enabling more up-to-date case tracking in RMSs and CMSs. Thirty-eight (38) county attorneys are currently able to receive this information directly from the Courts (as compared to 13 at the end of calendar year 2014).

- **Electronic Citations (ECCO).** The ECCO exchange automatically transmits traffic citations from law enforcement agencies to the clerks of court. To date, it has been implemented by 168 agencies (compared to 128 at the end of calendar year 2014), including:

City / University Agencies (93)

Adel Police Department	Coralville Police Department
Algona Police Department	Corydon Police Department
Altoona Police Department	Council Bluffs Police Department
Ames Police Department	Creston Police Department
Anamosa Police Department	Davenport Police Department

Winneshiek County Sheriff's Office
Woodbury County Sheriff's Office
Wright County Sheriff's Office

State Agencies (5)

Motor Vehicle Enforcement
Bureau of Investigation & Identity Protection - DOT
DNR
DNR Parks Bureau
Iowa State Patrol

Currently, the CJIS network is transmitting approximately 6,000 citations per week. This represents over 85 percent of all traffic citations written in Iowa. The goal of the CJIS Program Office and the TraCS program is to roll out the ECCO exchange to additional agencies that, together with the existing agencies, comprise 90 percent of the citations written in the State.

This exchange saves a significant amount of time for both law enforcement and the clerks of court. The estimated 300,000 tickets created annually in this manner do not need to be hand written by law enforcement or hand entered into the ICIS system by the clerks of court, allowing for more efficient and accurate transfer of information.

- **Victim Information Transfer.** Upon conviction, victim contact information is transferred to the DOC to enable notifications via Offender Release and the VINE network. This has been implemented in the DOC and 36 county attorneys' offices.

- **Offender Release.** The Offender Release Exchange, which provides offender release information to county attorneys so that they can uphold their statutory obligation to provide notice to victims about the offender’s release, has been implemented in the DOC and 36 county attorneys’ offices.
- **OWI Implied Consent Exchange (MOWI) and OWI Report** have been replaced by the general-purpose Complaint and Affidavit.
- **Registered Victim Notification.** The Registered Victim Notification exchange sends information from county attorneys to the Attorney General. This supports the Attorney General’s responsibility of notifying victims when defendants file appeals to their criminal case. This exchange has been deployed in Linn County.
- **Hearing Order.** The Hearing Order exchange sends information regarding hearings from the Court to the County Attorney’s office. The Hearing Order Exchange has been implemented and is in production in 49 counties.
- **Arrest Warrant.** The Arrest Warrant exchange sends warrant information from the Court to the IOWA system. Upon verification by the law enforcement agency responsible for final processing of the warrant (usually the Sheriff’s Department in the county of issue), the warrant is accessible by every law enforcement agency throughout the state. Development of the Arrest Warrant Exchange has been completed. Piloting of the full “suite” of warrant exchanges, including Warrant Clear and Warrant Cancel, will resume in 2016, following resolution of remaining business and technical issues to ensure accurate cancellations of warrants.
- **Statewide Charge Code Table.** The Statewide Charge Code Table exchange sends information from a centralized charge table to the Judicial Branch, DPS, DOC, DOT, County Attorneys, and local law enforcement. Traditionally, each of these recipients had maintained its own version of a table listing all Iowa criminal statutes and municipal ordinances in various level of detail. This exchange ensures that all of the participating agencies are using the same information and that charge information remains current and consistent. Efficiencies should be realized by local law enforcement agencies, county attorneys, and the Judicial Branch, when all are utilizing the identical, up-to-date list of chargeable offenses. The table is also available through a web portal for use by the public, academics and other government agencies.

Exchanges in Development (Exchanges not yet in Production):

- **ICON/Computerized Criminal History (CCH) Offender Movement.** Automates transmission of offender custody statuses from DOC to the DCI IDENT section. Custody statuses are descriptions of the subject’s movements through DOC’s ICON system such as: “County Jail Hold”, “Probation Discharge”, “Escape Warrant Requested”, etc.

Deployment has been delayed until 2016 due to resource and scheduling constraints for both agencies.

- **Disposition-Matching in Real Time.** This project replaces a current weekly, flat-file transfer from the Courts to the State’s official CCH housed at DPS. The exchange will send a transaction each time a court clerk enters a disposition into ICIS. The dispositions will update CCH on a more timely and complete basis than currently accomplished by the legacy, flat-file exchange.
- **Disposition Tracking Number (Green Sheet).** This project will create a CJIS exchange that will be triggered by the creation of a new disposition tracking number (DTN) on Iowa DPS’ CCH system. That trigger will send a message to the CJIS enterprise service bus (ESB). This message will be made available to any Iowa justice endpoint system that is involved in the current, paper-based process of transmitting the DTN as the case progresses through the system.
- **Dispositions to County Attorneys.** This exchange leverages a portion of the work on the Dispositions and Payments exchange implemented in Polk County in 2012. Focusing on disposition and sentencing data only, this exchange provides a more efficient roll-out strategy for that exchange, by breaking it into two pieces. A Collections and Payments Data exchange would effectively roll-out the other portion of that information to county attorneys at a later date.
- **Warrant Clear.** Sends information from DPS to the courts that a warrant has been served or is no longer necessary.
- **Warrant Cancel.** Information from the Courts to DPS that a warrant has been canceled and is no longer in effect.
- **Incident Report.** The Incident Report exchange will send information from local law enforcement to the county attorney and on to the Federal Bureau of Investigation’s (FBI) N-DEx (National Data Exchange) database. The FBI’s N-DEx system brings together data from law enforcement agencies throughout the United States, including incident and case reports, booking and incarceration data, and parole/probation information. N-DEx detects relationships between people, vehicles, property, locations, and/or crime characteristics. It “connects the dots” between data that are not seemingly related. The N-DEx system is accessed by participating law enforcement agencies throughout the nation. The CJIS program has made concerted efforts to promote and encourage law enforcement agencies to implement N-DEx between local agency RMS applications and the FBI.
- **Juvenile Delinquency Petition.** This exchange would be patterned after filing of criminal complaints and affidavits, from County Attorneys to the Clerk Review

application at ICIS. However, the exchange will be secured and “firewalled” from Criminal complaints, to provide the necessary protection for juveniles.

Exchanges Requested, Not Yet in Development

- **Application for No Contact Order.** The Application for No Contact Order exchange automates transmission of the County Attorneys Application for No Contact Order to the Court. This exchange will allow the County Attorney’s office to submit the applications from the CMS to the Courts ICIS system electronically. With this exchange, upon acceptance by the Court, all information required for issuance of a Temporary No Contact Order will immediately be available for review. This will allow the Court to review the request for protection, thereby increasing the ability for the judiciary to more immediately respond to the County Attorneys request.
- **Probation Report of Violation.** The Probation Report of Violation exchange would automate transmission of information from a DOC probation violation report to the County Attorney. This information will provide the County Attorney with data needed to initiate probation revocation proceedings, or, when necessary, to initiate targeted follow-up investigations of possible additional charges.
- **Notice following Initial Appearance.** The Notification of Initial Appearance exchange would automate transmission of Notification of Initial Appearance data from the Court to the County Attorney. With this exchange, the Court will be able to submit all notifications electronically from the ICIS system to the County Attorney Case Management System (CMS).
- **Final Disposition Report.** The Final Disposition Report exchange depends on implementation of the Green Sheet exchange, above. Once that is in place, this exchange would automate transmission of Final Disposition data from the County Attorney or the Courts to DPS. This exchange will increase the number of incidents that have Court or County Attorney dispositions associate with the incident.

With this exchange, the County Attorney’s office will submit Final Disposition Reports electronically from the CMS to the Iowa system, and the courts will also be able to immediately submit Final Disposition Reports from ICIS to the IOWA System. Another advantage to immediately sharing disposition data, in contrast to the current batch processing of this information, is the ability to reconcile the data being transmitted in real-time, leading to more efficient reconciliation of miss-matched records.

- **Order to Transport.** The Order to Transport exchange would automate transmission of transport orders from the Court ICIS system into the DOC’s ICON system.

- **LEA/DPS Fusion Center.** The LEA/DPS Fusion Center exchange would automate transmission of local Law Enforcement Agency (LEA) complaint type data to the DPS Fusion Center. Fusion Centers are concerned with collecting and analyzing Suspicious Activity Reports. This exchange would likely comply with National Information Exchange (NIEM) specifications.
- **DPS/DOC Live Scan Booking.** The DPS/DOC Live Scan Booking exchange would notify the DOC whenever an individual is booked so that the ICON system could notify an offender’s supervisor that his or her charge has had contact with law enforcement.

Total Estimated Cost of the Project

Project planning began in 2001, and the total estimated cost of project development (from all sources of funds) through FY2022 is expected to be \$22,500,000.

Total expenditures for the project through the end of fiscal year 2015 are \$12,332,288.48.

List of All Revenue Sources Used for the Project

State appropriation; National Governor’s Association (NGA) Grants; Byrne Grants; Justice Assistance Grants (JAG); National Criminal History Improvement Program (NCHIP) Grants; Return on Investment (ROI) Funds; Homeland Security Funds; Local Government Innovation Funds; Agency Operating Funds; American Recovery and Reinvestment Act (ARRA) Funds.

Financial Summary –

ITEM	FY 2012	FY 2013	FY 2014	FY 2015	Expected FY16
Travel	\$ 156.78	\$ 137.00	\$ 4,213.01	\$ 1,160.91	\$ 12,747.41
Office supplies	\$ 0	\$ 67.62	\$ 0	\$ 918.63	\$ 100.00
Printing	\$ 0	\$ 0	\$ 0	\$ 0	\$ 0
ITD Reimburs.	\$ 73,670.23	\$ 78,816.04	\$ 61,888.26	\$ 44,992.35	\$ 50,000.00
IT Outside Services	\$ 933,417.03	\$ 980,159.76	\$ 1,063,933.32	\$ 1,033,452.50	\$ 1,051,872.40
Software & Equip	\$ 497,574.47	\$ 177,321.03	\$ 117,932.17	\$ 498,609.10	\$ 409,475.39
Indirect/Other	\$ 7,108.38	\$ 0	\$ 26,839.20	\$ 52,687.50	\$ 25,804.80
Total	\$ 1,511,926.89	\$ 1,236,501.45	\$ 1,274,805.96	\$ 1,631,820.94	\$ 1,550,000.00

Of the yearly appropriations made by the General Assembly, actual CJIS expenditures have totaled between \$1.2 million and \$2.08 million dollars. The FY 2015 expenditures include purchases of replacement servers and software licenses.

Date of Project Completion or Estimated Completion

The estimated project completion date is June 30, 2022, however it is expected that additional exchanges will need to be developed to comply with federal regulations, changes in state laws, and needs of the Judicial Branch, Executive Branch, and local law enforcement agencies. There will also remain a need to update hardware and maintain current software licenses as long as information continues to be exchanged using CJIS. In Iowa, when an exchange of criminal justice information is necessary, CJIS is the first and most cost-effective option.
