annually. The HHS anticipated that the fiscal impact could be absorbed by the surplus within the Child Care Development Fund.

The **Notes on Bills and Amendments** for HF 2658 included an estimate for an increased cost of approximately \$15.0 million annually for the child care reimbursement rate portion of the Act. The federal share is estimated to be approximately \$11.7 million, and the State share is estimated to be approximately \$3.3 million. The HHS stated that the federal share could be absorbed by the surplus within the Child Care Development Fund and the State share could be covered by shifting State expenditures in other areas to federal funding sources, freeing up State moneys.
