

Joint Enrollment of High School Students at Community Colleges

FY 2023 Statewide Joint Enrollment by Type

Joint Enrollment consists of three types of enrollment:

- 1) Contracted (or concurrent) — Offered under negotiated agreements, generally between individual high schools and community colleges, not included in the college's offerings to adult students. Cost to the school district is determined under the agreement. School districts receive additional funding for these students, generated by a weighting in the school aid formula, to offset the additional cost. The funding may be more or less than the actual cost to the school district.
- 2) Postsecondary Enrollment Options (PSEO) — A high school student may take a class at a community college if the class is not offered at the high school. The cost to the school district is \$250.
- 3) Tuition — A high school student may take a class at a community college by paying the regular rate of tuition. There is no cost to the school district.

FY 2023 Joint Enrollment — Percentage of Community College Students and Tuition/Fee Revenue
