2023	2,992,114	3,564,323	9,972	1,523	2	1,525
2024	2,992,114	2,772,490	10,758	1,434	4	1,438

**Notes:**

- 1) Concerned person includes spouses, children, parents, and friends. Service hours include treatment and prevention services.
- 2) In August 2021, Iowa transitioned data collection systems to the Iowa Behavioral Health Reporting System (IBHRS). Due to this transition, the Iowa Department of Health and Human Services has updated the number of patients screened and referred to gambling treatment to reflect data in this system at the time of reporting. The number is unique patients who received a gambling screening and were recommended to an American Society of Addiction Medicine level of care as reported by all licensed problem gambling treatment providers.
