

## IOWA HIV STATISTICS 2006 - 2015

Calendar Year	HIV Diagnosis	Deaths	Persons Living with HIV Infections	Federal Funds
2006	108	25	1,427	\$ 4,007,248
2007	124	36	1,524	4,770,791
2008	101	24	1,611	4,762,424
2009	126	34	1,722	4,896,292
2010	114	27	1,823	5,723,260
2011	118	33	1,939	5,629,460
2012	117	37	2,023	5,328,544
2013	121	46	2,100	5,209,384
2014	98	46	2,369	5,197,192
2015	124	25	2,496	4,374,726

**NOTES:**

- 1) HIV stands for human immunodeficiency virus, the cause of the condition known as HIV infection or HIV disease. Persons with HIV infections are classified according to a measure of their immune function.
- 2) HIV diagnosis reflects all persons diagnosed with HIV infection for the first time, regardless of stage of infection, who were residents of Iowa at diagnosis.
- 3) Deaths of persons with HIV infection are not restricted to HIV-related causes. They include all causes of death. Death data for 2015 is provisional.
- 4) Annual increases in the number of persons living with HIV infection are due to fairly stable HIV diagnosis rates and widespread use of multi-drug antiretroviral therapies that have allowed HIV-infected persons to live longer.
- 5) Federal funds are grants primarily for prevention, education, surveillance, support (including treatment and counseling) of HIV-infected persons, and indirect support costs for grant handling.
