

Bridge Conditions on the Primary Highway System by County — 2017

Map figures represent the following:
 Number of Bridges in Good Condition
 Number of Bridges in Fair Condition
 Number of Bridges in Poor Condition

Bridges Built or Reconstructed by Year and Condition

Note: A bridge is in good condition if all elements of the bridge are sound, and no maintenance is needed. A bridge is in fair condition if all elements of the bridge are sound, but some preventive maintenance would prolong the life of the bridge. A bridge is in poor condition if one or more elements of the bridge are deteriorating, and repairs or replacement will be needed in the near future.

For more detailed bridge information, see the Iowa DOT:
