Fiscal Note Version – New

**Description**
House File 2170 increases the earnings limitation from $30,000 annually to $50,000 annually for retirees under the age of 65 who return to work for an Iowa Public Employees’ Retirement System (IPERS)-covered employer. The Bill takes effect upon enactment.

**Background**
Iowa Code section 97B.48A provides that a retiree who has not reached age 65 and returns to work in an IPERS-covered employer will have the retiree’s retirement allowance reduced by $0.50 for every $1 the retiree earns over $30,000 for the remainder of the calendar year. The earnings limit was last increased from $14,000 to $30,000 during the 2002 Legislative Session (2002 Iowa Acts, chapter 1135).

As of June 30, 2021, there were 9,484 retired, reemployed IPERS members. IPERS paid out $2.365 billion in retirement benefits in FY 2021, and the IPERS Trust Fund balance was $42.850 billion.

**Assumptions**
- For calendar year (CY) 2021, there were 136 IPERS members under the age of 65 who exceeded the annual $30,000 earnings limit.
- The average annual earnings of the 136 members who exceeded the limit totaled $50,000.
- The total average reduction per member was approximately $8,000, resulting in approximately $1.1 million remaining in the IPERS Trust Fund due to the penalty.

**Fiscal Impact**
Increasing the earnings income limit to $50,000 will result in members receiving approximately $1.1 million in retirement benefits annually that under current law would have been retained in the IPERS Trust Fund. The assumed loss of reduced retirement benefits is a nominal liability to the IPERS Trust Fund of approximately 0.003%.
