## BUDGET UNIT BRIEF – FY 2026

Fiscal Services Division

August 18, 2025

---

Ground Floor, State Capitol Building

Des Moines, Iowa 50319

515.281.3566

## AG Cybersecurity and Technology

### Background

In 2021, the Department of Management Division of Information Technology (DOM DoIT) (formerly the Office of the Chief Information Officer) performed a cybersecurity and information technology infrastructure risk assessment for the Attorney General's Office (AG). In its report, the DoIT found multiple vulnerabilities that presented risks to the AG's cybersecurity. To address those risks, the DoIT made various recommendations related to improving the AG's basic cyber hygiene and deploying core cybersecurity protections to defend against foreign and domestic cyber threats.

### Funding — State General Fund

Since 2021, the AG has received annual General Fund appropriations of approximately \$202,000 to improve cybersecurity and technology infrastructure. The AG is using this funding to undertake modernization efforts to prepare for statewide cyber improvements being led by the DoIT. These efforts include improving the tools the AG uses to manage its information technology systems and addressing unsupported and end-of-life information technology systems.
