Tax Credit: Solar Energy System Tax Credit

The Solar Energy System Tax Credit is available for qualified installations at a residence or business located in Iowa. The Iowa credit is a percentage (50.0% or 60.0%) of the federal credit for solar installations. The federal credit is equal to 30.0% of installation costs. The federal credit was set to expire December 31, 2016, but was extended in 2015. The federal credit equaled 30.0% through 2019 and will phase down through calendar year 2021. The federal and State credits will not be available under current law for installations placed in service on January 1, 2022, and after.

Per-installation State tax credit maximums apply. Taxpayers may receive tax credits for more than one installation, but the installations must be separate and distinct. The total amount of State tax credits approved in a year for all taxpayers combined is limited to \$5.0 million. Taxpayers must submit applications to the Iowa Department of Revenue and receive a tax credit certificate before a tax credit may be claimed. Applications in excess of the \$5.0 million cap are placed on a wait list for the next year's annual allocation. The tax credit is not refundable or transferable, but unused credits may be carried forward.

Tax Credit Background

- Enabling Legislation: [2012 Iowa Acts, chapter 1121](#) (Tax Credits and Exemptions Act)
- Iowa Code Citations:
 - [Section 422.11L](#) — Individual Income Tax
 - [Section 422.33\(29\)](#) — Corporate Income Tax
 - [Section 422.60\(12\)\(a\)](#) — Bank Franchise Tax
 - [Section 533.329\(2\)\(l\)](#) — Credit Union Moneys and Credits Tax
- Administrative State Agency: Department of Revenue
- Sunset Date: December 31, 2021 (federal tax credit sunset date)
- Transferable: No
- Refundable: No
- Carryforward: Up to 10 years
- Legislative Tax Expenditure Committee Review Years: None

Legislative History

As originally enacted, the Solar Energy System Tax Credit was equal to 50.0% of the federal credit, and the total amount of tax credits issued in a year could not exceed \$1.5 million. The annual cap was increased to \$4.5 million for calendar year 2014 and to \$5.0 million for calendar year 2015 and after. The tax credit percentage was raised to 60.0% for calendar years 2014 and 2015, before returning to 50.0% for calendar year 2016 and after. As originally enacted, the credit could only be used by individual and corporate income tax filers. Banks (franchise tax) and credit unions (moneys and credits tax) were added beginning with calendar years 2014 and 2015, respectively.

In December 2015, the U.S. Congress revised and extended the federal solar energy credit. The 2016 Legislature coupled Iowa's tax code with the federal change ([HF 2468](#), section 4). The combined State and federal action extended the availability of the Iowa tax credit through calendar year 2021.

Tax Credit Review, Usage, and Future Liability

The Solar Energy System Tax Credit is not included on the list of tax credits to be reviewed by the Tax Expenditure Committee. However, the Department of Revenue is required to file an annual report with the Governor and General Assembly.

The Solar Energy System Tax Credit was first available for 2012 installations. The 2019 annual report filed by the Department covered installations and tax credits earned from 2012 through December 2019. A total of 5,158 projects were awarded \$31.6 million in State tax credits. Residential installations accounted for 58.1% of the projects and 29.8% of the awarded tax credits. Using the \$249.0 million in reported installation costs and the State tax credit award amount, and assuming federal tax credits totaling \$74.7 million (30.0% of \$249.0 million), the combined federal-State tax credit amount of \$106.3 million represents 42.7% of installation costs across the 5,158 solar projects benefiting from the State tax credit.

Solar Energy System Tax Credit Statistics

Through December 2019

	# of Projects	% of Total	Tax Credit Amount Awarded	% of Total	Total Installation Cost	% of Total	Kilowatts Installed – 2014 through 2019 *	% of Total
Residential	2,997	58.1%	\$ 9,445,311	29.8%	\$ 72,772,729	29.2%	21,164	26.2%
Commercial	2,161	41.9%	\$ 22,203,257	70.2%	\$ 176,203,638	70.8%	59,510	73.8%
Total	5,158	100.0%	\$ 31,648,568	100.0%	\$ 248,976,367	100.0%	80,674	100.0%

*4,178 projects (81.0%) reported the amount of kilowatts installed.

The Department of Revenue reports on the annual credit usage for the Solar Energy System Tax Credit in its periodic [Contingent Liabilities Report](#). Based on Table 9 of that report, the following table and graph provide credit redemption history and projections for the Solar Energy System Tax Credit on a fiscal year basis. The blue bars of the graph indicate actual credit redemptions, while the red bars are Department of Revenue projections of future redemptions.

Solar Energy System Tax Credit History

*Projected

Fiscal Year	Tax Credit Redemptions	Fiscal Year	Tax Credit Redemptions
FY 2006	\$ 0	FY 2016	\$ 3,097,823
FY 2007	0	FY 2017	3,787,993
FY 2008	0	FY 2018	3,772,980
FY 2009	0	FY 2019	4,197,641
FY 2010	0	FY 2020	3,833,011
