Technology Reinvestment Fund

Iowa Code section [8.57C](#) establishes the Technology Reinvestment Fund (TRF) for the purposes of acquiring computer hardware and software, software development, acquiring telecommunications equipment, maintenance, lease agreements associated with technology components, and the purchase of equipment intended to provide an uninterruptible power supply. The TRF was created in 2006 Iowa Acts, chapter [1179](#) (FY 2007 Infrastructure and Capital Projects Appropriations Act), under the direction of the Department of Management.

Funding

Iowa Code section [8.57C](#) provides a standing appropriation of \$17.5 million from the General Fund to the TRF. Unlike most funds, the TRF does not receive taxes or fees directly. This means that if the General Assembly elects to suspend the standing appropriation, the TRF will receive no new funding without legislative action. In FY 2016 and FY 2017, the TRF did not receive funding from any source. During these years, the technology projects typically funded from the TRF were instead funded from the Rebuild Iowa Infrastructure Fund (RIIF).

Since FY 2009, the General Assembly has appropriated funding to the TRF exclusively from non-General Fund sources. However, in FY 2015 the Governor vetoed a provision that suspended the General Funding appropriation. This veto meant that the TRF received the General Fund standing appropriation of \$17.5 million in FY 2015. In total, the TRF has received \$168.8 million since the inception of the Fund. Of the total, 31.1% was from the General Fund and 68.9% was provided from other sources. The chart below displays funding provided to the TRF by year.

Chart 1 — Appropriations to the Technology Reinvestment Fund (TRF) (in millions)

LSA Staff Contact: Adam Broich (515.281.8223) adam.broich@legis.iowa.gov

Chart 1 shows that no funding was appropriated in FY 2016 and FY 2017 to the TRF. For both of these years, technology projects were funded directly from the RIIF. The General Assembly appropriated \$10.5 million from the RIIF for technology projects in FY 2016 and \$8.7 million for technology projects in FY 2017.

Appropriations

Since 2007, the General Assembly has appropriated funding from the TRF to State agencies for programs and projects nine times. Generally, appropriations from the TRF match the funding appropriated to the TRF (**Chart 1**). Appropriations by Department are displayed in **Chart 2**. The top two recipients are the Department of Education (27.9%) and the Iowa Communications Network (ICN) (15.6%).

Chart 2 — Appropriations from the TRF to State Agencies – FY 2007 to Estimated FY 2019 (in millions)

Projects and acquisitions funded by the TRF are typically completed and do not require ongoing annual appropriations. However, several departments have received ongoing appropriations for technology systems and projects. These projects, listed below, will receive a total of \$5.2 million (36.1% of TRF appropriations) in estimated FY 2019, and have received between 36.1% and 56.8% of available TRF resources.

- Iowa Communications Network

Other projects have required multi-year appropriations but for a limited term. These projects may tie down funding for a number of years before completion. Multi-year projects that are ongoing in FY2019 are displayed in **Table 2**.
