A large number of people attended  
the horse sale of J. B. Foster, living  
three miles this side of New Market,  
last Wednesday afternoon. The rail-  
road track runs through Mr. Foster's  
farm, and the passenger train stopped  
there for a few minutes to let the peo-  
ple off, and took them on again in the  
evening on the return to Clarinda.  
Among those who left our station were:  
Chas. Foster, R. P. Doughit, R. Hal-  
stead, Al Davidson, J. C. Welch, of  
Clarinda; John R. Weaver, a horse  
buyer of Coin, Chas. and Ed Brown,  
Shambaugh and Ed. Bolen, living north  
of town.

The funeral of Chas. Linderman was  
conducted at the home yesterday after-  
noon at two o'clock, attended by a  
large concourse of friends. The fune-  
ral sermon was delivered by the Rev.  
J. N. Maclean, pastor of the Presby-  
terian church, whose text was taken  
from the seventh verse of the tenth  
chapter of Proverbs: "The memory of  
the just is blessed." The discourse  
was very simple and practical and full  
of tender sympathy. Music was furn-  
ished by Mrs. H. E. Parslow, Miss  
Bertha Loranz, and Messrs. J. D.  
Keener and H. R. Spry. The rites at  
the cemetery were conducted by the  
Masons, with Dr. T. E. Powers as  
master of ceremonies. In spite of the  
stormy day there was a large attend-  
ance, which showed the esteem in  
which Mr. Linderman was held by  
his neighbors and friends.

from Des Moines, were here Thursday,  
attending the funeral of Mr. Linderman,  
who was a member of both of these or-  
ganizations. They brought with them

### Bird Prisoners.

A remarkable mode of incarceration  
is practiced by the hornbills, birds  
with immense bills and horny crests  
which inhabit southern Asia, the Ma-  
layan islands and central and southern  
Africa. In most if not all species the  
brooding female is walled up in a hol-  
low tree and fed by her mate. She re-  
mains confined in her prison until the  
eggs are hatched and in some species  
until the young birds are able to fly.  
Meanwhile the mother has become  
temporarily incapable of flight, as she  
has molted or at least shed all her  
wing feathers during her captivity.  
But the male is indefatigable in pro-  
viding for his family and is said to  
work so hard that he is a skeleton at  
the end of the brooding season.
