- He had a sandy complexion, red hair. He prepared the first volume of a book which was published, wherein the letters of the alphabet were classified according to the organs used in uttering them. These were then subdivided according to the special action of the organs used. The book showed much thought, and as a theory had some things to commend it, but before a pupil could comprehend it, a full knowledge of physiology was necessary. The book became impracticable and useless as a text book.
- The above book was a result of his hobby about a grammar constructed upon physiological principles.
- He was a physician in Richland Township, Chickasaw County, Iowa.
- The 1870 census seems to prove the family moved to Jasper County, Missouri, with the county seat of Cothagen.
- From there he is least to rise as the researcher.

A bloody fight occurred last evening all along Fourth street from Main to Lyon, between a tailor and a painter of this city. The difficulty resulted from an uncomplimentary remark of the latter with reference to a lady acquaintance of the former. The tailor drew the first blood by knocking his antagonist down with his fist, and afterwards broke his cane over him. Further down the street the fight was renewed and the painter was again knocked down and kicked in the ribs. He retaliated when he got up by striking the tailor in the back of the head with a rock making a severe wound
