## GOVERNOR'S SIGNING MESSAGE

[SENATE FILE 383](#)

June 11, 2025

The Honorable Paul Pate  
Secretary of State of Iowa  
State Capitol Building  
LOCAL

Dear Mr. Secretary,

I hereby transmit [Senate File 383](#), an act relating to pharmacy benefits managers, pharmacies, prescription drugs, and pharmacy services administrative organizations, and including applicability provisions.

As Governor of this great state, I have worked tirelessly to transform legacy systems of taxation, regulation, education, healthcare, workforce, and economic development in an effort to provide Iowans with the best possible return on their investment and continue to move this state forward.

After extensive research and thoughtful conversations with employers and stakeholders on all sides of this complex issue, I made the decision to sign [SF 383](#) in an effort to continue improving our healthcare system by bringing greater accountability to the role of Pharmacy Benefit Managers (PBMs). In enacting this bill into law, Iowa joins Texas, Georgia, Indiana and Montana that this year passed similar legislation to address this important issue along with several other states that have done so previously, bringing the total to 32 states.

PBMs play a central role in the pharmaceutical supply chain, negotiating drug prices and access for millions of Americans. Over time, consolidation has led to three major PBMs controlling 80% of the market and a close affiliation with both insurers and pharmacies. This vertical integration gives them outsized power over which medications patients receive and what they pay—often resulting in unaffordable drug costs, difficult choices for families, and reimbursement below pharmacy acquisition cost.

The new bill takes steps toward addressing these challenges by targeting PBM practices that harm both patients and independent pharmacies. Local pharmacies, especially in rural areas, are vital to community health and local hospitals but are being driven out by opaque, one-sided contracts—evidenced by the closure of 34 rural pharmacies in Iowa last year. Additionally, this legislation amplifies the rural healthcare bill we passed this session and is a meaningful step toward a fairer, more transparent, and accessible healthcare system for all.

But this bill does not signify an end. The complexity and lack of verifiable data made signing this bill a difficult decision, and my administration will closely monitor implementation to mitigate and ensure that any unintended consequences for private

employers are addressed. We will also be launching a reverse auction to ensure Iowa's state health plan continues to keep costs as low as possible for the state and its employees.

Sincerely,

Kim Reynolds  
Governor of Iowa

## GOVERNOR'S ITEM VETO MESSAGE

### [SENATE FILE 647](#)

June 11, 2025

The Honorable Paul Pate  
Secretary of State of Iowa  
State Capitol Building  
LOCAL

Dear Mr. Secretary:

I hereby transmit [Senate File 647](#), an Act relating to and making appropriations to the education system, including the funding and operation of the department for the blind, department of education, and the state board of regents, and including contingent effective date provisions.

[Senate File 647](#) is approved this date with the following exception of Section 6(4)(e), which appropriates \$1,500,000 for in-state tuition for students who reside in contiguous states and enroll in the undergraduate program offered by University of Northern Iowa. While I support this proposed program, I disapprove of this subsection. UNI initially requested \$3 million in one-time funding to jump start a program that would thereafter be self-sustaining, but this bill provides \$1.5 million with an expectation of ongoing funding. The contours of the program are also unclear as it relates to existing out-of-state students. I look forward to working with UNI next year to further develop the details of the program and see it launched.

For the above reasons, I respectfully disapprove [Senate File 647](#) in part only as specified above, in accordance with Article III, Section 16, of the Constitution of the State of Iowa. The remainder of [Senate File 647](#) not disapproved of as stated herein is approved as of this date.

Sincerely,

Kim Reynolds  
Governor

Clerk of the House

## GOVERNOR'S VETO MESSAGES

[HOUSE FILE 383](#)

June 11, 2025

The Honorable Paul Pate  
Secretary of State of Iowa  
State Capitol Building  
LOCAL

Dear Mr. Secretary:

I hereby transmit [House File 383](#), an act relating to the controlled substance crystalline polymorph psilocybin.

[House File 383](#) would allow for Iowa doctors to prescribe a synthetic version of psilocybin, a psychedelic compound found in mushrooms, should the United States Food and Drug Administration (FDA) approve the drug at some future date.

Psilocybin has been classified by the Drug Enforcement Agency (DEA) as a Schedule I controlled substance since 1970, which means that the scientific evidence has shown that there is a high potential for abuse, it has an increased likelihood of causing severe psychological and physical dependence, and there is a lack of acceptable medical uses.

I recognize and respect the growing body of research into the *potential* therapeutic benefits of psilocybin for mental health conditions such as depression and PTSD. However, this bill, in its current form, moves ahead of where our public health systems, regulatory frameworks, and law enforcement infrastructure are prepared to go at this time.

Moreover, [House File 383](#) surrenders state authority to make an informed determination about classification to federal officials at the FDA. Psilocybin should first be FDA approved and rescheduled by the DEA before the State of Iowa considers rescheduling. The pathway provided by this bill for legalization of psilocybin at the state level before we have a chance to review federal action and prepare robust, federally aligned guidelines and safeguards creates legal uncertainty, poses risks for misuse, and could undermine broader efforts to ensure safe and effective therapeutic use in the future.

This decision is not a dismissal of the emerging science or the sincere advocacy behind this legislation. Rather, it is a call for a more deliberate and Iowa-centric approach—one that engages state and federal partners, provides time to review any clinical studies and federal changes, and builds a framework for any future therapeutic access that is clear, safe, equitable, and medically sound.

For these reasons, I respectfully disapprove of [House File 383](#) in its entirety.

Sincerely,

Kim Reynolds  
Governor of Iowa

[HOUSE FILE 639](#)

June 11, 2025

The Honorable Paul Pate  
Secretary of State of Iowa  
State Capitol Building  
LOCAL

Dear Mr. Secretary:

I hereby transmit [House File 639](#), an Act relating to hazardous liquid pipelines, including common carrier requirements, proceedings under the Iowa utilities commission, including commission member attendance at hearings and informational meetings, including allowing certain persons to intervene in such proceedings, including sanctions on intervenors in contested cases, and permit, permit renewal, and operation limitations, and including effective date and applicability provisions.

Reasonable people can—and do—disagree about when government, or a private company acting with government approval, should be allowed to take private land. That debate is as old as the Republic. At its core, it asks how we protect individual property rights while still building the infrastructure—roads, utilities, pipelines—that modern life depends on.

I respect both sides of that debate. I've consistently said that if eminent domain is used, it must be rare, fair, and a last resort.

But [HF 639](#) isn't just about eminent domain. It goes much further—and in doing so, sets a troubling precedent that threatens Iowa's energy reliability, economy, and reputation as a place where businesses can invest with confidence.

For example, the bill would block a major pipeline project that uses only voluntary easements. Southwest Iowa Renewable Energy (SIRE) is in the final stages of connecting to a CO<sub>2</sub> pipeline with not a single acre condemned. Yet new insurance mandates and an arbitrary 25-year limit that [HF 639](#) places on CO<sub>2</sub> pipelines would effectively kill the project—despite the millions that have already been spent on its development. There is no clear or logical basis for that time limit—and it would make it difficult for companies like SIRE to justify the additional investment.

I understand this was not the intent. Those who crafted the bill said they don't want to stop CO<sub>2</sub> pipelines that rely entirely on voluntary agreements. But that is exactly what the bill does. For that reason alone, I cannot sign it.

Proponents of the bill have also voiced safety concerns about CO<sub>2</sub> pipelines. I raised those same concerns with the Trump Administration's Pipeline and Hazardous Materials Safety Administration (PHMSA) under the Department of Transportation, which "oversees the safety of roughly 5,300 miles of CO<sub>2</sub> pipelines that have been in operation for decades." PHMSA assured me that CO<sub>2</sub> pipelines are subject to "robust regulations"

and “have an excellent safety performance record.” In the last 20 years, there has only been “one serious incident and no fatalities,” and the “one serious incident was the result of third party damage and was not related to pipeline operations.” (PHMSA letter enclosed).

But more broadly, the bill affects more than just CO<sub>2</sub> infrastructure. It applies to all “hazardous liquid pipelines,” changing permitting rules across the board and injecting uncertainty into critical energy projects. That includes oil, gas, and fertilizer pipelines – the very systems that heat Iowa homes and power Iowa farms.

While I share the bill’s goal of protecting landowners, good policy should draw clear, careful lines. This bill doesn’t. It combines valid concerns with vague legal standards and sweeping mandates that reach far beyond their intended targets.

Iowa leads the nation in biofuels. We are at the forefront of turning corn into low-carbon energy—a leadership position we risk losing if we block the infrastructure that makes it possible. Other Midwestern states, like Nebraska, Illinois, and North Dakota are already moving forward with carbon-capture projects that would put Iowa at a competitive disadvantage if this bill became law.

That said, this debate had highlighted areas where real progress is possible. I agree we can do more to limit the use of eminent domain, promote transparency, and ensure responsible land restoration. While [HF 639](#) includes a few helpful provisions, the legislature debated—and ultimately declined—to adopt others that would have delivered meaningful reform.

We can do better. And I’m committed to working with the legislature to strengthen landowner protections, modernize permitting, and respect private property. In the meantime, though, I will ask the Iowa Utilities Commission to implement two important improvements immediately: requiring all commissioners to be present for live testimony, and ensuring that at least one commissioner attends every informational meeting. These changes—drawn from [HF 639](#)—will improve oversight and transparency now, without the need for new legislation.

For these reasons, I must respectfully disapprove [House File 639](#) in its entirety.

Sincerely,

Kim Reynolds  
Governor

The Honorable Kim Reynolds  
Governor of Iowa

Dear Governor Reynolds:

Thank you for your letter regarding carbon dioxide (CO<sub>2</sub>) pipeline safety. I appreciate your interest in this important topic and your concern for Iowans.

The Department of Transportation's Pipeline and Hazardous Materials Safety Administration (PHMSA) administers a national regulatory safety program for the approximately 3.3 million miles of pipelines in the United States, including CO<sub>2</sub> pipelines. The Pipeline Safety Act authorizes PHMSA to regulate the transportation of gas, hazardous liquids, and CO<sub>2</sub> by pipeline. PHMSA regulations govern design, construction, operation, maintenance, emergency response, personnel qualifications, public awareness, reporting, and many other functions related to the safe operation of pipelines.

The pipeline projects proposed in Iowa would transport CO<sub>2</sub> in a supercritical state, which means a fluid phase consisting of more than 90 percent compressed CO<sub>2</sub> molecules. Title 49 Part 195 of the Code of Federal Regulations contains robust regulations for such pipelines. The CO<sub>2</sub> pipelines proposed in Iowa would be governed by the full set of PHMSA safety regulations contained in Part 195 and subject to Federal safety inspections and oversight.

PHMSA currently oversees the safety of roughly 5,300 miles of CO<sub>2</sub> pipelines that have been in operation for decades. These pipelines have an excellent safety performance record. PHMSA's CO<sub>2</sub> accident data indicate one serious incident and no fatalities in the last 20 years. PHMSA considers a serious incident as one that results in fatality or injury requiring in-patient hospitalization. The one serious incident was the result of third party damage and was not related to pipeline operations.

Your letter addressed a CO<sub>2</sub> pipeline release that occurred on February 22, 2020 near Sartoria, Mississippi. PHMSA's investigation found this event was due to an unusual combination of factors. The rupture was caused by land movement at a steep embankment following heavy rains. Weather conditions and unique topography prevented the CO<sub>2</sub> vapor from rapidly dispersing as it would ordinarily, and poor communication between the pipeline operator and local responders complicated the

emergency response. Although numerous individuals were taken to the hospital, only one was admitted and for reasons unrelated to the pipeline failure.

PHMSA's investigation also found that the pipeline operator violated several regulations. As part of a Consent Agreement and Order, the operator paid \$2,868,100 in civil penalties and agreed to take numerous corrective actions. PHMSA subsequently issued an advisory bulletin to all pipeline operators reminding them of their responsibilities to monitor for, and address, earth movement and other geological hazards in proximity to their facilities.

CO2 pipelines have an overall robust safety track record. Over the last five years, CO2 pipelines have had an average reportable accident per thousand-mile rate of 0.88, lower than the general hazardous liquid pipeline reportable accident rate of 1.46.

Thank you for taking the time to contact PHMSA about this important topic. Please let me know if you require additional information, or have your staff contact Emily Wong, Director of Governmental, International, and Public Affairs, by phone at 202-366-4831 or by e-mail at [emily.wong@dot.gov](mailto:emily.wong@dot.gov).
