a. The cigarettes have been tested in accordance with the test method prescribed in section 101B.4.

b. The cigarettes meet the performance standard specified in section 101B.4.

c. A written certification has been filed by the manufacturer with the department and in accordance with section 101B.5.

d. The cigarettes have been marked in accordance with section 101B.7.

2. This chapter shall not be construed to prohibit a wholesaler or retailer from selling the wholesaler's or retailer's inventory of cigarettes existing prior to January 1, 2009, provided that the wholesaler or retailer is able to establish both of the following:

a. Tax stamps were affixed to the cigarettes on inventory pursuant to section 453A.10 before January 1, 2009.

b. The inventory of cigarettes was purchased before

3 4 January 1, 2009, in comparable quantity to the amount of
3 5 inventory of cigarettes purchased during the same period of
3 6 the prior year.

3 7 3. This chapter shall not be construed to prohibit any
3 8 person from selling or offering for sale cigarettes that have
3 9 not been certified by the manufacturer in accordance with
3 10 section 101B.5 if the cigarettes are or will be stamped for
3 11 sale in another state or are packaged for sale outside the
3 12 United States.

3 13 4. The department of public safety shall administer this
3 14 chapter and may adopt rules pursuant to chapter 17A to
3 15 administer this chapter. This chapter shall be implemented in
3 16 accordance with the implementation and substance of the New
3 17 York fire safety standards for cigarettes.

3 18 Sec. 4. NEW SECTION. 101B.4 TEST METHOD == PERFORMANCE
3 19 STANDARD == TEST REPORTS.

3 20 1. a. Testing of cigarettes shall be conducted in
3 21 accordance with ASTM (American society for testing and
3 22 materials) international standard E2187=04, standard test
3 23 method for measuring the ignition strength of cigarettes.

3 24 b. The department may adopt a subsequent ASTM standard
3 25 test method for measuring the ignition strength of cigarettes
3 26 upon a finding that the subsequent method does not result in a
3 27 change in the percentage of full-length burns exhibited by any
3 28 tested cigarette when compared to the percentage of
3 29 full-length burns the same cigarette would exhibit when tested
3 30 in accordance with ASTM international standard E2187=04 and
3 31 the performance standard in this section.

3 32 2. Testing shall be conducted on ten layers of filter
3 33 paper.

3 34 3. The performance standard shall require that no more
3 35 than twenty-five percent of the cigarettes tested in a test
4 1 trial shall exhibit full-length burns.

4 2 4. Forty replicate tests shall comprise a complete test
4 3 trial for each cigarette tested.

4 4 5. The performance standard required by this section shall
4 5 only be applied to a complete test trial.

4 6 6. a. Testing shall be conducted by a laboratory that has
4 7 been accredited pursuant to international organization for
4 8 standardization/international electrotechnical commission
4 9 standard 17025 or other comparable accreditation standard
4 10 required by the department.

4 11 b. Laboratories conducting testing in accordance with this
4 12 section shall implement a quality control and quality
4 13 assurance program that includes a procedure that will
4 14 determine the repeatability of the testing results. The
4 15 testing repeatability shall be no greater than nineteen
4 16 one-hundredths.

4 17 7. This section shall not require additional testing if
4 18 cigarettes are tested consistent with this chapter for any
4 19 other purpose.

4 20 8. Each cigarette listed in a certification submitted in
4 21 accordance with section 101B.5 that uses lowered permeability
4 22 bands in the cigarette paper to achieve compliance with the
4 23 performance standard pursuant to this section, shall have at
4 24 least two nominally identical bands on the paper surrounding
4 25 the tobacco column. At least one complete band shall be
4 26 located at least fifteen millimeters from the lighting end of
4 27 the cigarette. For cigarettes on which the bands are
4 28 positioned by design, there shall be at least two bands fully
4 29 located at least fifteen millimeters from the lighting end and
4 30 either ten millimeters from the filter end of the tobacco
4 31 column, or ten millimeters from the labeled end of the tobacco
4 32 column for nonfiltered cigarettes.

4 33 9. a. The manufacturer of a cigarette that the department
4 34 determines cannot be tested in accordance with the test method
4 35 prescribed in this section shall propose a test method and
5 1 performance standard for the cigarette to the department.
5 2 Upon approval of the proposed test method and a determination
5 3 by the department that the performance standard proposed by
5 4 the manufacturer is equivalent to the performance standard
5 5 prescribed in this section, the manufacturer may employ the
5 6 test method and performance standard to certify the cigarette
5 7 in accordance with section 101B.5.

5 8 b. If the department determines that another state has
5 9 enacted reduced cigarette ignition propensity standards that
5 10 include a test method and performance standard that are the
5 11 same as those contained in this chapter and the department
5 12 finds that the officials responsible for implementing those
5 13 requirements have approved the proposed alternative test
5 14 method and performance standard for a particular cigarette

5 15 proposed by a manufacturer as meeting the fire safety
5 16 standards of that state's law or regulation under a legal
5 17 provision comparable to this subsection, the department shall
5 18 authorize that manufacturer to employ the alternative test
5 19 method and performance standard to certify that cigarette for
5 20 sale in this state, unless the department demonstrates a
5 21 reasonable basis why the alternative test should not be
5 22 accepted under this chapter. All other applicable
5 23 requirements of this chapter shall apply to the manufacturer.

5 24 10. A manufacturer shall maintain copies of the reports of
5 25 all tests conducted on all cigarettes offered for sale for a
5 26 period of three years and shall make copies of the reports
5 27 available to the department and the office of the attorney
5 28 general upon written request.

5 29 11. Testing performed or sponsored by the department to
5 30 determine a cigarette's compliance with the performance
5 31 standard required by this section shall be conducted in
5 32 accordance with this section.

5 33 Sec. 5. NEW SECTION. 101B.5 CERTIFICATION.

5 34 1. Each manufacturer shall submit a written certification
5 35 to the department attesting to all of the following:

6 1 a. Each cigarette listed in the certification has been
6 2 tested in accordance with section 101B.4.

6 3 b. Each cigarette listed in the certification meets the
6 4 performance standard pursuant to section 101B.4.

6 5 2. Each cigarette listed in the certification shall be
6 6 described with the following information:

6 7 a. The brand or trade name on the package.

6 18 laboratory, if different than the manufacturer, that conducted

6 20 j. The date the testing was performed.

6 21 3. Each cigarette certified under this section shall be
6 22 recertified every three years.

6 23 4. The manufacturer shall, upon request, make a copy of
6 24 the written certification available to the office of the
6 25 attorney general and the department of revenue for purposes of
6 26 ensuring compliance with this chapter.

6 27 5. For each cigarette listed in a certification, a
6 28 manufacturer shall pay a fee of one hundred dollars to the
6 29 department.

6 30 6. If a manufacturer has certified a cigarette pursuant to
6 31 this section, and makes any change to the cigarette thereafter
6 32 that is likely to alter the cigarette's compliance with the
6 33 reduced cigarette ignition propensity standards mandated by
6 34 this chapter, prior to the cigarette being sold or offered for
6 35 sale in this state, the manufacturer shall retest the
7 1 cigarette in accordance with the testing standards specified
7 2 in section 101B.4 and shall maintain records of the retesting
7 3 as required pursuant to section 101B.4. Any altered cigarette
7 4 that does not meet the performance standard specified in
7 5 section 101B.4 shall not be sold in this state.

7 6 Sec. 6. NEW SECTION. 101B.6 NOTIFICATION OF
7 7 CERTIFICATION.

7 8 1. A manufacturer certifying cigarettes in accordance with
7 9 section 101B.5 shall provide a copy of the certification to

7 13 manufacturer in accordance with section 101B.7 for each
7 14 retailer to whom the wholesalers or agents sell cigarettes.

7 15 2. A wholesaler or agent shall provide a copy of the
7 16 cigarette packaging markings received from a manufacturer to
7 17 all retailers to whom the wholesaler or agent sells
7 18 cigarettes. A wholesaler, agent, or retailer shall permit the
7 19 state fire marshal, department of revenue, or the office of
7 20 the attorney general to inspect markings of cigarette
7 21 packaging marked in accordance with section 101B.7.

7 22 Sec. 7. NEW SECTION. 101B.7 MARKING OF CIGARETTE
7 23 PACKAGING.

7 24 1. Cigarettes that have been certified by a manufacturer
7 25 in accordance with section 101B.5 shall be marked to indicate

7 26 compliance with the requirements of this chapter. The marking
7 27 shall be in eight point type or larger and consist of one of
7 28 the following:

7 29 a. Modification of the product's universal product code to
7 30 include a visible mark printed at or around the area of the
7 31 universal product code. The mark may consist of an
7 32 alphanumeric or symbolic character or characters permanently
7 33 stamped, engraved, embossed, or printed in conjunction with
7 34 the universal product code.

7 35 b. Any visible alphanumeric or symbolic character or
8 1 combination of alphanumeric or symbolic characters permanently
8 2 stamped, engraved, or embossed upon the cigarette package or
8 3 cellophane wrap.

8 4 c. Printed, stamped, engraved, or embossed text that
8 5 indicates that the cigarettes meet the standards of this
8 6 chapter.

8 7 2. A manufacturer shall use only one marking, and shall
8 8 apply the marking uniformly for all packages including but not
8 9 limited to packs, cartons, and cases and to brands marketed by
8 10 that manufacturer.

8 11 3. The manufacturer shall notify the department of the
8 12 marking selected.

8 13 4. Prior to the certification of any cigarette, a
8 14 manufacturer shall present its proposed marking to the
8 15 department for approval. Upon receipt of the request, the
8 16 department shall approve or disapprove the marking offered. A
8 17 marking in use and approved for the sale of cigarettes in the
8 18 state of New York shall be deemed approved. A proposed
8 19 marking shall be deemed approved if the department fails to
8 20 act within ten business days of receiving a request for
8 21 approval.

8 22 5. A manufacturer shall not modify its approved marking
8 23 until the modification has been approved by the department in
8 24 accordance with this section.

8 26 1. A manufacturer, wholesaler, agent, or other person who

8 30 thousand dollars for each sale of the cigarettes.

9 14 sale of the cigarettes, provided that the total number of
9 15 cigarettes sold or offered for sale in such sale exceeds one
9 16 thousand cigarettes, and provided that the penalty against the
9 17 retailer does not exceed twenty-five thousand dollars in any

10 10 However, prior to the destruction of any cigarettes forfeited,
10 11 the holder of the trademark rights in the cigarette brand
10 12 shall be permitted to inspect the cigarettes.

10 13 7. In addition to any other remedy provided by law, the
