Request No. 82-340

In compliance with a written request received March 31, 19 82, there is hereby submitted a Fiscal Note for Amend. H-5544 to S.F. 2203 pursuant to Joint Rule 16. Background information used in developing this Fiscal Note is available from the Legislative Fiscal Bureau, to members of the Legislature upon request.

Amendment H-5544 to S.F. 2203 requires that the building design for the proposed addition to the Oakdale Medical and Security Facility take maximum advantage of passive and active solar technology and have a design energy budget not to exceed 75,000 BTU's per square foot per year.

The current schematic design satisfies all state building energy efficiency standards and the design team believes that the current building design will meet the 75,000 BTU per square foot per year energy budget specified in Amendment H-5544. However, it is anticipated that the redesigning of the addition to incorporate solar energy systems could add one month to the design schedule and increase the likelihood of a delay in the start of construction.

While the full impact of incorporating solar energy systems cannot be fully assessed without detailed design review and analysis, it would necessitate either a significant increase in the project budget or a reduction in the bed capacity of the addition. If the bed capacity of the addition is maintained, it is estimated that the additional costs would be:

Additional design cost	\$ 25,000
Additional construction costs	<u>1,000,000</u>
Total	\$1,025,000
