51451 Section 1. Section 109.38, subsection 1, Code 1989, is
2 amended by adding the following new unnumbered paragraph:

51453 NEW UNNUMBERED PARAGRAPH. The commission shall adopt a
4 rule permitting a crossbow as approved by the commission to be
5 used by a handicapped individual under the conditions in which
6 the use of a bow and arrow is permitted. The commission shall
7 prepare an application to be used by an individual requesting
8 handicapped status, which requires that the individual's
9 attending physician sign a form declaring that the individual
10 is handicapped, is not able to use a bow and arrow, and is
11 eligible for handicapped status. The license that is issued
12 to a handicapped individual shall include a supplement
13 indicating the handicapped status.

14 EXPLANATION

15 This bill requires the natural resource commission of the
16 department of natural resources to adopt a rule to allow
17 handicapped individuals to use a crossbow in situations when a
18 bow and arrow is permitted.

SENATE FILE 58

3270

Amend Senate File 58 as follows:

1. By striking everything after the enacting clause and inserting the following:

"Section 1. Section 321.438, subsection 2, Code 1989, is amended by striking the section and inserting in lieu thereof the following:

2. a. A person shall not operate a motor vehicle on a highway in this state if the motor vehicle has a sunscreen device on the windshield, the front side wings, and side windows adjacent to the right and left of the driver and windows to the rear of the driver that do not meet the requirements of this subsection. However, if the motor vehicle is not required to be registered in this state, the motor vehicle shall be deemed to meet the requirements of this subsection if the motor vehicle meets the light reflectance and transmission requirements of the state or country of registration.

b. A sunscreening device when used in conjunction with the windshield shall be nonreflective and may not be red in color. A sunscreening device may be used only along the top of the windshield and may not extend downward more than five inches from the top of the windshield.

c. A sunscreening device when used in conjunction with the safety glazing materials of the side wings or side windows, or both, located at the immediate right and left of the driver shall be nonreflective and shall have light transmission of not less than thirty-five percent.

d. A sunscreening device when used in conjunction with the safety glazing of the rear-most window and the side windows behind the driver shall be nonreflective and shall have a light transmission of not less than twenty percent. However, a sunscreening device shall not be used in conjunction with the rear-most window unless one right and one left outside rearview mirror is provided on the motor vehicle.

e. Sunscreen devices offered for sale or use in Iowa may bear a label not to exceed one and one-half square inches in size, with a means for the permanent and legible installations between the sunscreening material and each glazing surface to which it is applied that contains the manufacturer's name and its percentage of light transmission. The label shall be placed in the left lower corner of each glazing surface when facing the vehicle from the outside.

f. This subsection does not apply to a motor vehicle registered in this state in the name of a person, or the person's legal guardian, who has an

S-3270

Page 2

1 affidavit signed by a physician, as defined in section
2 135.1, that states that the person has a physical
3 condition that makes it necessary to equip the motor
4 vehicle with sunscreening material which would be of a
5 light transmittance otherwise in violation of this
6 subsection. The affidavit shall be in the possession
7 of the person so afflicted, or the person's legal
8 guardian, at all times while being transported in the
9 motor vehicle.

10 g. The light transmittance requirement of this
11 subsection does not apply to windows behind the driver
12 on motor trucks, motor homes, and multipurpose
13 vehicles.

14 h. Industry film card strips shall be used by
15 peace officers for the enforcement of this subsection.

16 3. As used in this subsection:

17 a. "Sunscreening device" means a film material or
18 device that is designed to be used in conjunction with
19 motor vehicle safety glazing materials for reducing
20 the effects of the sun.

21 b. "Light transmission" means the ratio of the
22 amount of total light to pass through a product or
23 material to the amount of the total light falling on
24 the product or material.

25 c. "Nonreflective" means a product or material
26 designed to absorb light rather than to reflect it."
