33 This bill relates to fetal deaths, fetal death certificates,  
34 and disposition of bodily remains.

35 FETAL DEATHS AND DISPOSITION OF BODILY REMAINS. The bill

1 amends provisions in Code chapter 144 (vital statistics) to  
2 establish a process for a woman to direct the final disposition  
3 of bodily remains following a fetal death. The bill provides  
4 definitions for the purposes of the bill. The bill provides  
5 that when a fetal death occurs in an institution or medical  
6 facility, the individual in charge of the institution or  
7 medical facility shall inform the woman that the woman may  
8 determine the final disposition of the bodily remains. A  
9 determination request by the woman may be made within the time  
10 frame established by rule of the department of public health  
11 (DPH). The individual in charge of the institution or medical  
12 facility where the bodily remains were expelled or extracted  
13 shall obtain from the woman a written authorization for final  
14 disposition on a form prescribed and furnished or approved by  
15 DPH.

16 The authorization may allow final disposition to be  
17 by the individual in charge of the institution or medical  
18 facility or another person assuming responsibility for the  
19 final disposition of the bodily remains. In the written  
20 authorization, the woman may provide for disposition of the  
21 bodily remains as specified in the bill. When the bodily  
22 remains are the result of an induced termination of pregnancy,  
23 a spontaneous termination of pregnancy, or a stillbirth,  
24 disposition may be only by burial, interment, or cremation.  
25 When the bodily remains are the result of a spontaneous  
26 termination of pregnancy or a stillbirth, disposition may also  
27 be made in compliance with Code chapter 142C (the revised  
28 uniform anatomical gift Act). When the bodily remains are  
29 the result of an induced termination of pregnancy and the  
30 pregnant woman is a minor, the institution or medical facility  
31 shall obtain parental consent for the authorization of final  
32 disposition of the bodily remains, unless the minor has  
33 received a waiver of notification pursuant to Code chapter 135L  
34 (notification requirements regarding pregnant minors).

35 The individual in charge of the institution or medical

1 facility where the bodily remains were expelled or extracted or  
2 the person assuming responsibility for the final disposition  
3 of the bodily remains shall ensure that the final disposition  
4 of the bodily remains is performed in compliance with the  
5 authorization for final disposition, and such person shall  
6 retain the authorization as specified by rule of DPH.

7 If the woman chooses a location of final disposition other  
8 than the location of final disposition that is usual and  
9 customary for the institution or medical facility, the woman is  
10 responsible for the costs related to the final disposition of  
11 the bodily remains at the chosen location.

12 The final disposition of the bodily remains shall not be  
13 by simultaneous cremation. The bodily remains shall not be  
14 treated as medical waste.

15 The bodily remains may be moved from the place where the  
16 bodily remains were expelled or extracted to be prepared for  
17 final disposition with the consent of the person who certified  
18 the death. The final disposition of the bodily remains  
19 under the bill shall comply with all other requirements for  
20 disposition of bodily remains under Code chapter 144 and other  
21 applicable laws.

22 A person who knowingly violates a provision of the bill  
23 relating to the final disposition of bodily remains after a  
24 fetal death is guilty of a serious misdemeanor. A serious  
25 misdemeanor is punishable by confinement for no more than one  
26 year and a fine of at least \$315 but not more than \$1,875.

27 FILING OF FETAL DEATH CERTIFICATE. The bill requires a fetal  
28 death certificate to be filed for each fetal death which occurs  
29 in the state after a gestation period of 12 completed weeks or  
30 greater. Current law requires a fetal death certificate to  
31 be filed for each fetal death which occurs in the state after  
32 a gestation period of 20 completed weeks or greater or for a  
33 fetus with a weight of 350 grams or more.
