EXPLANATION

3

The inclusion of this explanation does not constitute agreement with
4 the explanation's substance by the members of the general assembly.

4

5 This bill requires a health carrier (carrier) to reimburse
6 a health care professional (professional) or facility for
7 health care services (services) provided to a covered person
8 by telehealth on the same basis and at the same rate as the
9 carrier would apply to the same services provided to the
10 covered person by the professional or facility in person. As
11 a condition of reimbursement, the carrier is prohibited from
12 requiring that an additional professional be located in the
13 same room as the covered person while services for a mental
14 health condition, illness, injury, or disease are delivered via
15 telehealth by another professional to the covered person.

16 The bill defines "telehealth" as the delivery of services
17 through the use of real-time interactive audio and video, or
18 other real-time interactive electronic media, regardless of
19 where the professional and covered person are each located, not
20 including the delivery of services delivered solely through an
21 audio-only telephone, electronic mail message, or facsimile
22 transmission. Current law defines "telehealth" as the delivery
23 of services through the use of interactive audio and video,
24 not including the delivery of services through an audio-only
25 telephone, electronic mail message, or facsimile transmission.

26 The bill applies to services provided by a professional or a
27 facility to a covered person by telehealth on or after January
28 1, 2022.
