Monthly General Fund Revenue Receipts Through April 30, 2019

The attached spreadsheet presents FY 2019 General Fund total net receipts with comparable figures for actual FY 2018. The figures can be compared to the FY 2019 estimate of \$7.611 billion set by the Revenue Estimating Conference (REC) on March 15, 2019, and adjusted for the enactment of [SF 220](#) (Corporation Section 179 Expensing Act). The FY 2019 estimate is an increase of \$347.6 million (4.8%) compared to FY 2018 actual receipts (excluding transfers). The next REC meeting has not been scheduled.

Overview of Current Situation

April 2019 net General Fund revenue was \$215.4 million (35.8%) above the April 2018 revenue level. Cash fiscal year-to-date net receipts are \$369.2 million (6.1%) higher than FY 2018. There are some major factors affecting these comparisons:

- A change in the Iowa personal income tax withholding tables that took effect in January 2019 will decrease deposits moving forward.
- The increased sales and use tax base that took effect January 2019 will increase deposits moving forward. April 30, 2019, was the first filing deadline for quarterly sales and use tax since this law change went into effect.

Major sources of revenue and their contributions to the FY 2019 year-to-date revenue change include:

- Personal income tax (positive \$142.0 million, 3.6%).
- Sales/use tax (positive \$92.3 million, 3.8%).
- Corporate tax (positive \$127.7 million, 29.5%).
- Other taxes (positive \$32.6 million, 17.1%).
- Other receipts (positive \$20.7 million, 8.2%).
- Tax refunds not including school infrastructure refunds (negative \$3.6 million).
- School infrastructure sales/use tax refunds (negative \$42.4 million).

Status of the Economy

Iowa Nonfarm Employment was reported at 1,568,000 for the month of March 2019 (not seasonally adjusted), 4,200 (0.3%) higher than March 2018.

Iowa's 12-month average nonfarm employment is presented as the blue line on **Chart 5**. Iowa's average nonfarm employment last peaked in October 2008 at 1,526,300, which was 47,600 above the peak reached prior to the previous recession (January 2001). The current 12-month average reading is now 1,586,300, resulting in an annual average Iowa nonfarm employment level that is 60,000 above the 2008 peak.

The red line on **Chart 5** presents Iowa nonfarm employment as a percent of U.S. nonfarm employment. Iowa's share of U.S. nonfarm employment decreased noticeably from 1999 through 2002, decreased at a much slower pace from 2002 through 2007, and increased from January 2008 through June 2010. However, Iowa's percentage of U.S. employment has declined as the percentage growth in U.S. employment has exceeded the percentage growth in Iowa employment since June 2010. Iowa's percentage of U.S. employment is currently at its lowest level in the history of the indicator and continues to fall.

The Consumer Price Index (CPI) through March 2019 was 254.2 (1983/84=100).

Consumer prices increased 0.6% in March (not seasonally adjusted), and the annual rate of inflation increased to 1.9%, an increase of 0.3% from the previous month's level.

Core CPI, an inflation measure excluding food and energy expenditures, increased 0.3% in March 2019 and increased 2.0% year-over-year. This is the 13th month the core inflation rate has been at or above 2.0% since March 2017. For the two components excluded from the core rate, energy prices are down 0.4% year-over-year and food prices are up 2.1%.
