

Percent of Age 0-5 Population at 185% of Poverty Level by ECI Area

FY 2013

Note: Early Childhood Iowa (ECI) provides funds on a regional basis to families with children ages 0-5. A portion of State funding is allocated based on level of poverty. Percentages are calculated as the number of children, age 0-5, with family income below 185.0% of the poverty level divided by the total age 0 - 5 population in each ECI area. The figure for each ECI area represents the total number of children age 0-5 with family income below 185% poverty.
