 6 13 \$ 500,000

Rebuild Iowa Infrastructure Fund appropriation to the DNR for the Water Trails and Low Head Dam Public Hazard Program. This appropriation is exempted from the vertical infrastructure requirement in Iowa Code section [8.57\(5\)\(c\)](#).

DETAIL: These funds support grant awards to local entities for water trail enhancements and dam mitigation grants to dam owners, including State and local government entities and private owners, to improve low head dam safety. State-designated water trails are designed to provide four basic types, or levels, of recreational experiences: Gateway, Recreational, Challenge, and Wilderness. Each segment of a water trail is assigned one of these experience ratings, that reflect a range of conditions available to the user in the designated waterways.

While there are different types of low head dams, they generally consist of a river-wide dam that is normally overtopped by the entire river’s flow. Flood gates may or may not be present to reduce upstream flooding effects. The height of these dams is less than 30 feet. Low head dams were originally constructed throughout Iowa to power gristmills and sawmills. They were later used for hydroelectric

generation. Low head dams can be extremely dangerous due to the powerful recirculating hydraulics that are generated. Prior year appropriations for the Water Trails and Low Head Dam Public Hazard Program include:

- FY 2019: \$500,000 from the RIIF.
- FY 2018: No appropriation.
- FY 2017: \$1,000,000 from the RIIF.

DETAIL: Since FY 2014, \$180,032,149 has been appropriated to the Board of Regents to fund payments on debt service. This appropriation replaces student tuition and fees that pay the debt service on academic revenue bonds authorized in prior fiscal years. Iowa Code chapter [262A](#), enacted in the 1969 Legislative Session, authorizes the sale of academic revenue bonds by the Board of Regents.

The first academic revenue bonds were issued in 1970 and provided the primary source of funds for construction of academic facilities at the universities for several decades. Academic revenue bonds are secured by student tuition and fees. The appropriation is not mandatory by statute, but the Board of Regents indicated that without a tuition replacement appropriation, an aggregate tuition increase of 4.10% across the universities will be required to pay the debt service.

Funding for tuition replacement has been provided for many decades. Until FY 2002, the appropriation was made solely from the General Fund. After FY 2002, portions were funded from the General Fund and from infrastructure-related funds such as the RIIF and the RCF. From FY 2006 to FY 2008, funding for this appropriation was divided between the General Fund and the RIIF. Since FY 2009, the entire appropriation has been funded from the RIIF.

The tuition replacement appropriation provides most of the annual debt service on the academic revenue bonds, but a portion of the debt service is paid from reserve fund interest.
