Rebuild Iowa Infrastructure Fund appropriation to the DNR for the Water Trails and Low Head Dam Public Hazard Program. This appropriation is exempt from the vertical infrastructure requirement in Iowa Code section [8.57\(3\)\(c\)](#).

DETAIL: Projects related to eligible water bodies as defined in Iowa Code section [456A.33C](#) (On-Stream Impoundment

Restoration Fund) are eligible for grants from the Water Trails and Low Head Dam Safety grants appropriation in FY 2026.

These funds support grant awards to local entities for water trail enhancements and dam mitigation grants to dam owners, including State and local government entities and private owners, to improve low head dam safety. State-designated water trails are designed to provide the following four basic types, or levels, of recreational experiences: gateway, recreational, challenge, and wilderness. Each segment of a water trail is assigned one of these experience ratings to reflect a range of conditions available to the user in the designated waterways.

While there are different types of low head dams, they generally consist of a riverwide dam that is normally overtopped by the entire river's flow. Flood gates may or may not be present to reduce upstream flooding effects. The height of these dams is less than 30 feet. Low head dams were originally constructed throughout Iowa to power gristmills and sawmills. Some dams were later used for hydroelectric generation. Low head dams can be extremely dangerous due to the powerful recirculating hydraulics that are generated. Since FY 2009, appropriations for the Water Trails and Low Head Dam Public Hazard Program from the RIIF have totaled \$16,800,000. Recent prior year appropriations for the Water Trails and Low Head Dam Public Hazard Program include the following:

- FY 2023 through estimated net FY 2026: \$1,500,000 each year from the RIIF
- FY 2022: \$1,000,000 from the RIIF
- FY 2021: \$250,000 from the RIIF
- FY 2020: \$500,000 from the RIIF

7 5 \$ 1,000,000

address neglected commercial or public structures that have sat vacant for at least six months. The Program’s main focus is landfill diversion through the recycling and reuse of building materials and the elimination of hazards, both inside and out, posed by these empty structures. This appropriation would be used to support the additional requests in funding received by the Program in recent years. The Program receives its funding from the DNR’s Solid Waste Alternatives Program.

The Iowa National Guard armories are facing a backlog of deferred maintenance and equipment upgrade needs. Funding will be used for priority and emergency repairs first and then to address the backlog as funding is available. Generally, the State appropriation acts as a match to draw down federal funding on a one-to-one basis.

<p>7 21 b. In 2025, the Federal Aviation Administration pledged \$10,000,000 in FY 2026 and \$10,000,000 in FY 2027 for the projects. According to the DPD, it is anticipated that the end of the runway's useful life will be in 2027.</p>
<p>7 34 e. DETAIL: A lease-purchase contract was signed with Motorola in 2015 at an estimated cost of \$39,500,000 (\$36,400,000 in principal and \$3,100,000 in interest) over 10 years. The tenth and final payment was made by the State in FY 2026. This appropriation will be used to fund the ongoing tower maintenance agreement.  8 20 and utility services at the institutions:
 8 21 FY 2026-2027:
 8 22 \$ 25,000,000

Rebuild Iowa Infrastructure Fund appropriation to the Board of Regents to replace tuition used to pay debt service on academic revenue bonds.

DETAIL: This appropriation replaces student tuition and fees that pay the debt service on academic revenue bonds authorized in prior fiscal years. Iowa Code chapter [262A](#), enacted in the 1969 Legislative Session, authorizes the sale of academic revenue bonds by the Board of Regents.

The first academic revenue bonds were issued in 1970 and provided the primary source of funds for construction of academic facilities at the universities for several decades. Academic revenue bonds are secured by student tuition and fees. The appropriation is not mandatory by statute, but the Board of Regents indicated that without a tuition replacement appropriation, an aggregate tuition increase of 3.40% across the universities will be required to pay the debt service.

Funding for tuition replacement has been provided for many decades. Until FY 2002, the appropriation was made solely from the General Fund. Beginning in FY 2002, portions were funded from the General Fund and from infrastructure-related funds such as the RIIF and the Restricted Capitals Fund. From FY 2006 to FY 2008, funding for this

					<p>appropriation was divided between the General Fund and the RIIF. Since FY 2009, the entire appropriation has been funded from the RIIF. The exception to this is FY 2018, in which appropriations were made from both the RIIF and the State Bond Repayment Fund.</p> <p>The tuition replacement appropriation provides most of the annual debt service on the academic revenue bonds, but a portion of the debt service is paid from annual reductions in the Debt Service Reserve Fund.</p>
