"The object of the academy shall be the encouragement of scientific work in the state of Iowa." Membership is open to all persons interested in scientific subjects. Members of the academy are divided into three groups: (1) fellows, who are actively engaged in scientific work; (2) associates, who are interested in the progress of science, but not direct contributors to original research, and (3) honorary fellows, elected by vote from outstanding investigators in science. Papers of general interest in addition to those that are technically scientific are presented at each annual meeting. Meetings are held each spring, time and place fixed by the executive committee. By authority of law the academy publishes each year at state expense a volume containing the papers which have been presented at that time.
