The Board of Medical Examiners was created by the 21st General Assembly in 1886. The Board of Osteopathic Examiners was established in 1907. These two agencies became a composite Board of Medical Examiners by action of the 60th General Assembly in 1963. Board members are appointed by the governor for three-year terms, with confirmation by the Senate.

The board meets nine times annually and has the responsibilities to administer and enforce the laws and administrative rules relating to the licensure and practice of medicine and surgery, osteopathic medicine and surgery, osteopathy, and advanced emergency medical technicians and paramedics.

The board conducts two licensure examinations each year. The examination administered is the Federation Licensing Examination (FLEX), and is given to both allopathic (M.D.) and osteopathic (D.O.) physicians. The board also determines the eligibility of physicians for licensure by endorsement or reciprocity from other states, and issues resident physician licenses, as well as temporary and special licenses.

The board is empowered with the duty and responsibility of licensure discipline, which involves the investigation of complaints, review of evidence, initiation and prosecution of disciplinary proceedings, and imposition of licensee discipline. The board may, if necessary, petition the District Court for enforcement of its authority. The board registers and establishes peer review committees to investigate and report on evaluation of certain complaints or other evidence of acts or omissions possibly constituting cause for licensee discipline. The board issues license renewals and determines requirements for continuing medical education. It also issues certifications for licensure in other jurisdictions.

The board also reviews and investigates all professional liability claims filed against its licensees, including medical malpractice suits, to determine if the acts from which the claims were filed involved the violation of statutes, rules, or standards of practice.
