

INFO

Proactive Protection from Gun Violence

A.I.-powered, human-verified gun detection software that **works with existing video surveillance cameras.**

Save time to save lives

Detect brandished guns, verify the firearm, and dispatch an alert in as little as 3-5 seconds.

Situational awareness

Provide authorities and first responders with critical information including location, weapon type, and description.

Protects data and privacy

We detect brandished weapons, not faces, racial data, gender, or clothing. We never store data on detections.

Trusted by Organizations Nationwide

Addressing a Shared Concern

Gun violence impacts us all in several ways

Challenge

Facilities and campuses are large, making it difficult to locate and detain threats.

Many active shooter incidents occur outside.

It's hard to get accurate information during an incident due to chaotic conditions.

Solution

First responders get real-time data, including the shooter's geolocation and photograph.

Gun detection software can be installed on indoor and outdoor security cameras.

ZeroEyes provides 24/7/365 human-verified gun detection, alerting local law enforcement in as fast as 3-5 seconds.

Department of Homeland Security SAFETY Act Designation

Founded, owned, and operated by Navy SEALs veterans

Patented technology is verified by humans to ensure no false alerts

Serving businesses, schools, and government facilities in most states

Get in touch with a team member

ZeroEyes has a team of highly trained security specialists who can help you assess security questions and needs. They have deep knowledge of gun violence types, response options, and business environments.

Brandished Gun Detection Without Bias

Working Together to Combat Gun Violence and Mass Shootings

A bi-partisan approach using AI-powered technology, human verification, and unbiased detections.

No Infringement of Rights

ZeroEyes doesn't target legal gun owners, just illegally brandished guns. Detecting brandished firearms where they aren't allowed—in schools, offices, parks, event venues, and more - is our focus. We only dispatch alerts for brandished, not holstered, firearms.

No Profiling or Bias

Our AI-powered software doesn't detect faces, behavior, clothing style, skin color, or anything other than brandished weapons. We're exclusively looking for one object: a firearm. Biases aren't an issue with ZeroEyes firearm detection.

No Data Repository

ZeroEyes brandished firearm detections aren't part of a database that tracks individuals. Detection images are not made public—only specified personnel and law enforcement receive dispatched detections for situational awareness purposes.

Mass Shootings Don't Choose a Political Party

When it comes to combating mass shootings, ZeroEyes serves every side. Founded by Navy SEALs and elite technologists who are Department of Homeland Security SAFETY Act Designation recipients—we're only about detecting brandished firearms.

We're on a Mission to End Mass Shootings

ZeroEyes delivers a proactive A.I. gun detection solution that integrates into existing security cameras to stop mass shootings and gun violence by reducing response times, providing actionable, human-verified intelligence and delivering clarity – ultimately saving lives.

Most security camera footage is used forensically after an incident has occurred. ZeroEyes' proactive solution is solely focused on weapons detection to identify guns as soon as they enter the frame of an existing security camera. We help you:

- Dramatically improve response times.**
 On average, customers saw a 50% reduction in 911 dispatch response times during active shooter drills with ZeroEyes' solution.
- Equip first responders with accurate, real-time data.** Often, first responders arrive at the scene without clear, up-to-

date information. With ZeroEyes, first responders and other personnel have the right details in real-time.

- Enact security protocols faster.** By knowing exactly where the shooter is, staff can lock entry points, move people to safety, and direct first responders to the threat.

ZEROEYES' AI GUN DETECTION CAN BE USED IN EVERY CRITICAL SECTOR

The ZeroEyes Difference

Developed by former Navy SEALs and technology experts, ZeroEyes' A.I. Gun Detection Software integrates with current security cameras – all to stop gun-related violence by identifying visible guns to save time and save lives.

- ✓ **Proprietary, real-world and comprehensive datasets for unmatched accuracy**
- ✓ **Extensive military experience for unrivaled situational awareness**
- ✓ **Exclusive focus on weapons detection to protect privacy**
- ✓ **Collaboration with customers and local first responders**

WE'RE ON A MISSION TO END MASS SHOOTINGS

TIME IS LIFE: CRITICAL SECONDS MATTER

:00
SECONDS

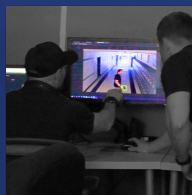

MONITOR
anywhere there's a camera with 24/7/365 coverage.

:01
SECONDS

DETECT
guns with actionable visual intel of location & description of perp.

:02
SECONDS

VERIFY
every alert through our human operators to prevent false positives.

:03-05
SECONDS

ALERT
security and first responders of the threat in just 3-5 seconds.

PROTECT

RESPOND
to the threat with real-time intel that aids first responders.

PROTECT
against an active shooter crisis by reducing response times.
