

IowaGrants.gov

“The State of Iowa is committed to ensuring efficiency and transparency in managing grant dollars. It is the intent of this administration to expand the use of IowaGrants.gov to automate, streamline and create consistency in the reporting and management of all grant moneys received by the state.”

David Roederer, Director

State departments currently utilizing IowaGrants.gov:

What is it and how can it help my department ?

IowaGrants.gov provides grant management software that encapsulates the entire grant management life-cycle allowing Iowa’s state agencies to automate 100% of their grant management processes online. IowaGrants.gov is capable of managing the grant tracking, application, selection, award/contracting, monitoring, communications, modification, reporting, close-out, and financial management processes.

IowaGrants.gov is available to all state agencies that administer a variety of state and federal competitive and pass-through grant programs. While the grant management process generally follows a rather standard set of steps from application through grant closeout, the particular requirements of each state agency and of each grant program requires a configurable approach. IowaGrants.gov accommodates unique requirements in the management of each individual grant program.

Iowagrants.gov will improve Iowa’s grant management process in the following areas:

- * Allow departments to serve sub-grantees in a consistent, customer-focused manner;
- * Ensure that all state government funding opportunities are easily identifiable and applications are accessible and straightforward;
- * Improve communication between applicant and grantor;
- * Provide transparency of Iowa’s grant making process and resource allocation;
- * Expand accessibility to grant information ensuring accountability to legislators, boards, commissions, stakeholders and citizens;
- * Eliminate the costs of continued investments in the development and operation of agency-unique grant management systems;
- * Improve audit trails throughout the entire process of awarding grants;
- * Reduce staff time spent managing and administering grants;
- * Reduce costs associated with processing applications (printing, paper, postage);
- * Provide access to a rich source of project and financial information.

Iowagrants.gov receives special mention.....

“The second of OEI’s promising practices is its robust internet based grants information management system. IowaGrants.gov (www.iowagrants.gov) allows seamless management of grant announcements, applications, and sub-recipient reporting and invoicing, Davis Bacon reports, and energy measurement and verification data. The IowaGrants.gov system eliminates paper reporting and invoicing, and sends semi-automatic reminders to sub-recipients when quarterly reports are due. Agreement information is then uploaded from IowaGrants.gov to the Reporting Iowa web page, which serves as Iowa’s Recovery Act public information and transparency portal.”
